

TABLE OF CONTENTS

Preface to second edition	iii
Preface	v
The Book <i>Ch'i Min Yao Shu</i>	1
An Analysis of the Source Books from which materials were drawn for the <i>Ch'i Min Yao Shu</i>	7
I. Books prior to the 2nd century B. C.: <i>Shih Ching</i> , <i>Kuan Tzu</i> , <i>Lü Shih Ch'un Ch'iu</i> , <i>Chou Kuan</i>	7
II. Books from 200 B. C. to 400 A. D.: <i>Huai Nan Tzu</i> , <i>Wei</i> Books and lexica, <i>Fan Shêng-Chih Shu</i> , <i>Sze Min</i> <i>Yueh Ling</i> , <i>Pen Ts'ao</i> and geographical books, <i>Kuang</i> <i>Chih</i> , <i>Po Wu Chih</i> , <i>Shi Ching</i> , <i>Chia Cheng Fa</i> , etc....	13
Original Material in <i>Ch'i Min Yao Shu</i>	31
I. Realisation of the importance of proper choice of season and soil 天時, 地利	31
1. Best, medium and latest time for agrarian operations and domestic occupations	32
2. Best, medium and least suitable ground for sowing various crops	32
3. Amount of seeds to be sown	34
4. The seasonal and pedological factors interact	34
5. Other factors	34
6. The edaphic complex	35
7. Edaphic requirements	35
8. Artificial conditions	36

II. Cultivation of Cereals	37
1. Land cultivation	37
2. Varieties of crops	42
3. Seed corn	42
4. Sowing	43
5. Fertilizing the ground	44
(1) Succession of crops	44
(2) Green manure	44
(3) Mud walls	45
6. Protective maintenance	46
(1) Care for delicate objects	46
(2) Protection from frost	46
(3) Protection from insect pest	46
(4) Protection from browsing animals	47
(5) Protection from fungal infection	47
7. Harvest and safe deposit of crop	48
III. Culinary Vegetables	49
1. Varieties	49
2. Cultivation	50
3. The "interlacing plot" system	52
4. Processing for preservation of garden-vegetables	53
(1) Fresh storage in dugouts or pits	53
(2) Soya-hydrolysate-conserves	53
(3) Desiccata	54
(4) Pickles	54
IV. Fruit Trees	54
1. Varieties	55

2. Propagation.....	55
(1) Seedling-nursery	55
(2) Cuttings	56
(3) Grafting	57
3. Storage and processing of fruit	59
(1) Storage of fresh fruits	59
(2) Desiccata	60
V. Timber Woods	61
1. Kinds of trees recommended for cultivation	61
2. Management and cultivation	61
(1) Nursery work	61
(2) Transplantation	62
(3) Felling	63
VI. Other Economic Plants	64
1. Fiber crops.....	64
2. Tinctorial plants.....	64
VII. Animal Husbandry.....	65
1 Selection for breeding parents	66
2. Castration of animals for meat supply.....	68
3. Care of feeding	68
4. Produces from animal husbandry.....	70
5. Veterinary treatment	71
6. Fish-pond	72
VIII. Domestic Economy	72
1. Food-processing	73
(1) Refining of table-salt by recrystallization	74
(2) Preparation of fine starch from cereal	74

(3)	Saccharification of starch to prepare "barley sugar"	77
(4)	Fermentation	79
(i)	Alcoholic fermentation	79
(ii)	Acetic fermentation	82
(iii)	醬 <i>Chiang</i> (protein hydrolysates)	83
(iv)	豉 <i>Shih</i> (interrupted and melanised protein hydrolysates)	86
(v)	菹 <i>Tsü</i> (pickles, lactic fermentations from intrinsic carbohydrate)	87
(vi)	鮓 <i>Cha</i> (pickles, lactic fermentation from added carbohydrates).....	88
(vii)	酪 <i>Lo</i> (cheese, lactic fermentation with casein)	88
(5)	脯 <i>Fu</i> and 臘 <i>Lah</i> (jerked and salted meat).....	89
2.	Other technical instructions for commodities of daily life	89
(1)	Detergents (saponins).....	89
(2)	Extraction of pigments from bastard-saffron.....	90
(3)	Dyeing with vegetable pigments.....	91
(4)	Heating to accelerate "drying" of oils.....	92
(5)	Glue-making	93
(6)	Preparation of cosmetics.....	97
The Influences of <i>Ch'i Min Yao Shu</i> on Agricultural Sciences in China		101
Epilogue		105
