Preface ix

PART ONE

PROBABILITY

1

1

The Meaning of Probability 3

1-1 Introduction 3

1-2 The Four Interpretations of Probability 9

2

Fundamental Concepts 19

2-1 Set Theory 19

2-2 Probability Space 29

2-3	Conditional Probability and Independence	45
	Problems	56

3

Repeated Trials 59

3-1	Dual Meaning of Repeated Trials	59
3-2	Bernoulli Trials	64
3-3	Asymptotic Theorems	70
3-4	Rare Events and Poisson Points	77
	Appendix: Area Under the Normal Curve	81
	Problems	81

4

The Random Variable 84

4-1	Introduction	84
4-2	The Distribution Function	88
4-3	Illustrations	101
4-4	Functions of One Random Variable	112
4-5	Mean and Variance	121
	Problems	131

5

Two Random Variables 135

5-1	The Joint Distribution Function	135
5-2	Mean, Correlation, Moments	144
5-3	Functions of Two Random Variables	155
	Problems	165

6

Conditional Distributions, Regression, Reliability 168

6-1	Conditional Distributions	168
6-2	Bayes' Formulas	174
6-3	Nonlinear Regression and Prediction	181
6-4	System Reliability	186
	Problems	195

7

Sequences of Random Variables 197

- 7-1 General Concepts 197
- 7-2 Applications 204
- 7-3 Central Limit Theorem 214
- 7-4 Special Distributions of Statistics 219
- Appendix: Chi-Square Quadratic Forms 226
- Problems 229

PART TWO

STATISTICS

233

8

The Meaning of Statistics 235

- 8-1 Introduction 235
- 8-2 The Major Areas of Statistics 238
- 8-3 Random Numbers and Computer Simulation 251

9

Estimation 273

- 9-1 General Concepts 273
- 9-2 Expected Values 275
- 9-3 Variance and Correlation 293
- 9-4 Percentiles and Distributions 297
- 9-5 Moments and Maximum Likelihood 301
- 9-6 Best Estimators and the Rao-Cramèr Bound 307
- Problems 316

10

Hypothesis Testing 321

- 10-1 General Concepts 321
- 10-2 Basic Applications 324
- 10-3 Quality Control 342
- 10-4 Goodness-of-Fit Testing 348

- 10-5** Analysis of Variance 360
- 10-6** Neyman-Pearson, Sequential, and Likelihood Ratio Tests 369
- Problems 382

11

The Method of Least Squares 388

- 11-1** Introduction 388
- 11-2** Deterministic Interpretation 391
- 11-3** Statistical Interpretation 402
- 11-4** Prediction 407
- Problems 411

12

Entropy 414

- 12-1** Entropy of Partitions and Random Variables 414
- 12-2** Maximum Entropy and Statistics 422
- 12-3** Typical Sequences and Relative Frequency 430
- Problems 435

Tables 437

Answers and Hints for Selected Problems 443

Index 448
