<b>Introduction</b>	1
<b>1 Methodology of social sciences</b>	5
1.1 Statistical simulation . . . . .	6
1.2 Main approaches to statistical simulation . . . . .	7
1.2.1 Discrete event simulation . . . . .	7
1.2.2 Continuous simulation and System dynamics . . . . .	7
1.2.3 Agent-based simulations . . . . .	8
1.2.4 Combined techniques (hybrid simulations) . . . . .	9
1.2.5 Serious gaming or participatory simulations . . . . .	10
1.3 Chapter summary . . . . .	11
<b>2 Multi-agent systems</b>	13
2.1 Application domains . . . . .	14
2.1.1 Robotics and cybernetics . . . . .	14
2.1.2 Artificial intelligence and machine learning . . . . .	15
2.1.3 Software engineering . . . . .	15
2.1.4 Networking . . . . .	16
2.1.5 Search engines and text analysis . . . . .	16
2.1.6 Electronic commerce and trade . . . . .	17
2.1.7 Simulation and modeling . . . . .	17
2.2 Chapter summary . . . . .	19

<b>3 Agents</b>	<b>21</b>
3.1 Agent environments . . . . .	21
3.2 Agent characteristics . . . . .	23
3.3 Reactive agents . . . . .	29
3.4 Deliberative Agents . . . . .	40
3.4.1 Utility-based approach . . . . .	42
3.4.2 Logic-based approach . . . . .	46
3.4.3 BDI approach . . . . .	52
3.5 Hybrid agents . . . . .	60
3.6 Chapter summary . . . . .	62
<b>4 Agent interactions</b>	<b>63</b>
4.1 Agent communication . . . . .	69
4.2 Chapter summary . . . . .	70
<b>5 Agent-oriented programming</b>	<b>71</b>
5.1 Principles of software agents . . . . .	72
5.2 Agents as software entities . . . . .	76
5.2.1 Behaviors . . . . .	77
5.2.2 Data . . . . .	77
5.2.3 Goals . . . . .	77
5.3 Agent features . . . . .	78
5.4 Chapter summary . . . . .	79
<b>6 Agent-oriented methodologies</b>	<b>81</b>
6.1 Agent Oriented Methodology for Enterprise Modeling . . . . .	82
6.2 AUML . . . . .	82
6.2.1 Agent Class Diagram . . . . .	83
6.2.2 Interaction Diagrams . . . . .	84
6.2.3 UML 2.1 . . . . .	85
6.3 Cassiopeia . . . . .	86
6.4 CoMoMAS . . . . .	86
6.5 Gaia . . . . .	87
6.6 HIM . . . . .	88
6.7 MaSE . . . . .	89
6.8 MASim . . . . .	89
6.9 Prometheus . . . . .	91
6.10 Tropos . . . . .	92
6.11 Chapter summary . . . . .	93

<b>7</b>	<b>Limits of agent-based modeling</b>	<b>95</b>
7.1	Problems of agent-based modeling . . . . .	97
7.2	Lack of confidence . . . . .	98
7.3	Missing methodology for development . . . . .	98
7.4	Missing leading development frameworks . . . . .	99
7.5	Computational performance limitations . . . . .	99
7.6	Popularity . . . . .	100
7.7	Spatial factors in agent-based modeling . . . . .	101
7.8	Chapter summary . . . . .	101
<b>8</b>	<b>Agentology</b>	<b>103</b>
8.1	Roles . . . . .	105
8.2	Design and development process . . . . .	106
8.2.1	Step 1 – Task formulation . . . . .	108
8.2.2	Step 2 – Task evaluation . . . . .	111
8.2.3	Step 3 – Conceptual modeling . . . . .	114
8.2.4	Step 4 – Consistency check . . . . .	118
8.2.5	Step 5 – Selection of a development platform . . . . .	121
8.2.6	Step 6 – Transformation guide . . . . .	124
8.2.7	Step 7 – Platform-specific model . . . . .	128
8.2.8	Step 8 – Development, debugging and testing . . . . .	134
8.2.9	Step 9 – Model evaluation . . . . .	136
8.3	Agent Conceptual Modeling . . . . .	137
8.3.1	Agent Diagrams . . . . .	138
8.3.2	Particle diagrams . . . . .	154
8.4	Drawbacks . . . . .	166
8.5	Chapter summary . . . . .	167
<b>A</b>	<b>Jackson Structured Programming</b>	<b>169</b>
<b>B</b>	<b>Agent-based modeling software</b>	<b>173</b>
B.1	Examining agent frameworks . . . . .	175
B.2	User environment . . . . .	180
B.3	Architecture . . . . .	181
B.4	Simulation language . . . . .	182
B.5	Platform . . . . .	183
B.6	Specification . . . . .	184
B.7	Scale . . . . .	185
B.8	Chapter summary . . . . .	187
<b>Bibliography</b>		<b>189</b>
<b>Index</b>		<b>201</b>
