

## TABLE OF CONTENTS

### VOLUME 1

---

#### PROLOGUE

---

<b>European construction sector towards sustainability</b> Zdeněk Bittnar (Czech Republic)	13
---	----

#### KEYNOTE ADDRESSES

---

<b>Sustainable issues facing the building sector</b> Nils Larsson (Canada)	15
<b>Rating systems in the public and financial sectors</b> Andrea Moro, Adriano Bellone, Giuseppe Piccoli (Italy)	58
<b>Sustainability assessment and/or property rating?</b> Thomas Lützkendorf, David Lorenz (Germany)	63
<b>Sustainable building in the Czech Republic – Challenge and opportunity</b> Petr Hájek, Jan Tywoniak (Czech Republic)	73
<b>Ultra-high-performance concrete: Basis for sustainable structures</b> Michael Schmidt, Thomas Teichmann (Germany)	83
<b>Building with earth - 30 years of research and development at the University of Kassel</b> Gernot Minke (Germany)	89

#### ECONOMY, POLICY AND LEGISLATION

---

<b>Resource conservation in existing commercial office buildings</b> John B. Storey (New Zealand)	99
--	----

<b>Cost planning for renewal and maintenance over the building life cycle</b> Jaroslava Tománková (Czech Republic)	<b>105</b>
<b>I-divergence function in project evaluation</b> Václav Beran, Petr Dlask (Czech Republic)	<b>111</b>
<b>Strategy for sustainable development in the building sector of Russia, Kazakhstan, and Ukraine</b> Yurij A. Matrosov (Russia)	<b>119</b>
<b>Building's value assessment using the utility and the LCC</b> Renáta Schneiderová Heralová (Czech Republic)	<b>126</b>
<b>The verification of high performance buildings in North America</b> Jiří Skopek (Canada)	<b>132</b>
<b>Questionnaire survey of environmental attitudes, management and performance of Swedish architects and technical consultants</b> Liane Thuvander, Birgit Brunklaus, Pernilla Gluch, Karin Johansson, Örjan Lundberg, Ann-Charlotte Stenberg (Sweden)	<b>143</b>
<b>Bottom-up or top-down instruments for more sustainable buildings?</b> Susanne Geissler (Austria)	<b>150</b>
<b>One m<sup>2</sup> infrastructure for one m<sup>2</sup> floor space?!</b> Clemens Deilmann, Karin Gruhler, Jörg Hennersdorf (Germany)	<b>158</b>
<b>Immo-rate: Guide for the property rating of sustainable buildings</b> Robert Lechner (Austria)	<b>164</b>

## **ASSESSMENT METHODS**

---

<b>LEnSE methodology for sustainability assessment of buildings</b> Katrien Putzeys, Johan Van Dessel (Belgium)	<b>171</b>
<b>Life cycle assessment – The first step towards sustainability</b> Timothy Cole (USA)	<b>182</b>
<b>Environmental assessment of a low-energy house</b> Roman Rabenseifer (Slovakia)	<b>187</b>
<b>Implementation of SBTool in the Czech Republic – Case studies</b> Martin Vonka, Antonín Lupíšek, Luděk Vochoč, Vladimír Žďára (Czech Republic)	<b>196</b>
<b>Aiming at sustainability by use of life cycle cost assessment in decision making in planning and design of new buildings and in refurbishment</b> Guri Krigsvoll (Norway), Pavel Frolka (Czech Republic)	<b>197</b>

<b>The critical role of process in developing a green building rating system: The LEED for homes experience</b>	<b>202</b>
Ann V. Edminster (USA)	
<b>Contribution of innovation technology to sustainable construction</b>	<b>212</b>
Jacopo Gaspari, Maria Antonia Barucco (Italy)	
<b>Designing and building green in Australia and the case of Centralplaza</b>	<b>221</b>
Steve Burroughs (Australia)	
<b>Regional strategies for the development of sustainable building</b>	<b>227</b>
Adriano Bellone, Giuseppe Piccoli, Andrea Moro (Italy)	
<b>Environmental and life cycle assessment of structural design of residential house-case study</b>	<b>232</b>
Jan Růžička, Ctislav Fiala, Antonín Lupíšek, Jan Mukařovský, Martin Vonka (Czech Republic)	
<b>Four brick passive houses with "TOTAL QUALITY" certification</b>	<b>240</b>
Gerhard Koch (Austria)	
<b>Influence of wear on building – lifetime</b>	<b>247</b>
Václav Kupilík (Czech Republic)	

#### **POSTER**

<b>Qualitative and quantitative assessment of sustainable urban neighbourhoods</b>	<b>253</b>
Jana Zdráhalová (Czech Republic)	

#### **EDUCATION AND INFORMATION**

---

<b>Becoming sustainable: Learning in demonstration projects</b>	<b>259</b>
Barbara Rubino (Sweden)	
<b>Thermomodernisation of public buildings conducted in accordance with conditions of sustainable development – STEP</b>	<b>266</b>
Aleksander Panek, Jerzy Sowa (Poland)	
<b>Data base of planning know how for passive houses</b>	<b>272</b>
Tania Berger (Austria)	
<b>Training for renovated energy efficient social housing</b>	<b>276</b>
Bruno Peuportier (France), Uli Neumann (Germany), Jan-Olof Dalenback (Sweden), Arne Nesje (Norway), Tamas Csoknyai (Hungary), Chiel Boonstra (The Netherlands)	

<b>Prediction of a building energy conservation market</b> Dalibor Vytlačil (Czech Republic)	<b>283</b>
<b>Postgraduate course "Sustainable construction" at Graz University of Technology</b> Peter Maydl, Karin Pregartner (Austria)	<b>287</b>
<b>Postgraduate education in building science at Danube University Krems</b> Peter Holzer, Renate Hammer (Austria)	<b>293</b>
<b>Sustainable building education at Faculty of Civil Engineering CTU in Prague</b> Karel Kabele, Jiří Novák, Jan Tywoniak, Petr Hájek (Czech Republic)	<b>299</b>
<b>Holistic system of SB education in Building University in Moscow</b> Alexander Tetior (Russia)	<b>304</b>

## **BUILDING DESIGN**

---

<b>Energy efficiency in commercial buildings</b> Günter Löhnert, Sebastian Herkel, Karsten Voss, Andreas Wagner (Germany)	<b>310</b>
<b>Energy, technology and social context</b> Joseph Cory (Israel)	<b>323</b>
<b>Building of ecological education centre Slunakov</b> Ondřej Hofmeister, Pavel Kopecký, Jan Tywoniak (Czech Republic)	<b>331</b>
<b>Simplified method of designing an air-ground heat exchange</b> Szymon Firlag, Joanna Rucińska (Poland)	<b>337</b>
<b>Design of net zero energy housing</b> Vera Straka, Mark Gorgolewski (Canada)	<b>343</b>
<b>Thürnhofstrasse/Rochègasse/Trepulkagasse – Vienna 11th district – An example for sustainable building process</b> Georg W. Reinberg (Austria)	<b>353</b>
<b>Sustainability of olympic buildings – Guidelines for sustainable architecture of mega-sporting events</b> Natalie C. Eßig (Germany)	<b>361</b>
<b>Passive house technology for multiple-unit houses in Vienna and Lower Austria</b> Martin Treberspurg, Ulla Ertl (Austria)	<b>369</b>
<b>Lessons in building in a sustainable manner in a developing country: The habitat research and development centre, Namibia</b> Jacques Korrubel (Namibia)	<b>375</b>

<b>How potential builders are testing passive houses</b> Helmut Bruckner (Austria)	386
<b>Parametric design strategy aiming at environmentally sustainable residential buildings</b> Hanne Tine Ring Hansen, Mary-Ann Knudstrup, Per Heiselberg (Denmark)	391
<b>Solar systems for passive buildings – General approach and examples</b> Jan Tywoniak, Kamil Staněk, Marek Ženka, Petr Morávek (Czech Republic)	397
<b>100% solar heated monolithic clay bloc house</b> Georg Dasch, Katharina Liepach (Germany)	405
<b>Retrofit buildings close to passive house standard</b> Karl Viridén (Switzerland)	411
<b>Environmentally based optimization of RC slab floor structures</b> Ctislav Fiala, Petr Hájek (Czech Republic)	416

## POSTERS

<b>Material substance of contemporary industrial architecture</b> Ján Ilkovič, Ľubica Ilkovičová (Slovakia)	424
<b>Durability, reliability, sustainability and client's decision</b> Břetislav Teplý (Czech Republic)	430

<b>VOLUME 2</b>
-----------------

## INTERNAL ENVIRONMENT

---

<b>Modelling of indoor environment quality in sustainable building</b> Karel Kabele, Pavla Dvořáková (Czech Republic)	437
<b>Physical cavity of a double-skin facade – Experiment in-situ</b> Milan Bielek, Boris Bielek, Daniel Szabó (Slovakia)	445
<b>The influence of windscreen on wind flow</b> Katarzyna Klemm (Poland)	451

<b>Solar and daylight rights in concept of performance based buildings</b>	<b>457</b>
Jozef Hraška (Slovakia)	

<b>Acoustic aspects of sustainable building</b>	<b>462</b>
Pavel Oravec, Michaela Kozáková (Czech Republic)	

**POSTERS**

<b>Sustainable greenery as an insulate rooftop in municipal buildings, also playing in municipal gardens</b>	<b>468</b>
Sergi Lopez-Grado i Padreny, Ana Maria Prados Fernández (Spain)	

<b>Floorings in buildings from lifetime point of view</b>	<b>469</b>
Věra Suchá (Czech Republic)	

**EXTERNAL ENVIRONMENT**

---

<b>Sustainable buildings in interaction</b>	<b>474</b>
Morten Elle (Denmark)	

<b>Effects of future city developments – Development scenarios of municipalities</b>	<b>480</b>
Karin Gruhler, Clemens Deilmann (Germany)	

<b>Sustainable urban development strategies for the provision of low-income housing in Pakistan</b>	<b>486</b>
Muhammad Ali Tirmizi (Pakistan)	

<b>Tectonic landscapes</b>	<b>493</b>
Boguslaw F. Witkowski (Belgium)	

<b>Display of commercial activity in architecture of industrial buildings</b>	<b>499</b>
Lubica Ilkovičová, Ján Ilkovič (Slovakia)	

<b>Study on the building conversion for temporary use by public sector</b>	<b>505</b>
Toru Eguchi, Shuichi Matsumura, Makoto Tsunoda, Akiko Inagawa, Ryunosuke Mitate (Japan)	

<b>Deep ecologization as topical basis of ecological construction</b>	<b>514</b>
Alexander Tetior (Russia)	

<b>Influence of urban structure on microclimatic conditions in virtual residential districts</b>	<b>520</b>
Katarzyna Klemm (Poland)	

<b>ENERPOS: A French research program for developing new methods for the design of zero energy buildings in hot climates</b>	<b>527</b>
François Garde, Alain Bastide, Etienne Wurtz, Françoise Thellier, Gilbert Achard, Oana Dobre, Eric Ottenwelter, Alain Bornarel (France)	

## **ENERGY**

---

<b>Energy and environmental audit for sustainable buildings</b>	<b>537</b>
Dušan Petráš (Slovakia)	
<b>"Zero-energy/emission-buildings" – Terms, definitions and building practice</b>	<b>547</b>
Karsten Voss, Miriam Kramp (Germany)	
<b>Low energy and smart buildings – Analysis of energy consumption in the all life cycle of buildings</b>	<b>553</b>
Małgorzata Fedorczyk-Cisak, Antoni Stachowicz (Poland)	
<b>Barriers for progress of low-energy construction</b>	<b>563</b>
František Macholda (Czech Republic)	
<b>Glazed facades and their influence on indoor climate in buildings</b>	<b>571</b>
Michal Jaroš, Jitka Mohelníková, Dalibor Plšek (Czech Republic)	
<b>Environmental payback of stone wool in a societal energy perspective</b>	<b>577</b>
Anders Ulf Clausen (Denmark)	
<b>Influence of micrometeorological conditions in a street canyon on energy characteristic of a building</b>	<b>583</b>
Marcin Idczak (Poland)	
<b>Experimental examination of energy and micro-climate properties in two low-energy buildings</b>	<b>589</b>
František Kulhánek (Czech Republic)	
<b>Comparison of TRYs for Bratislava</b>	<b>593</b>
Roman Rabenseifer (Slovakia), Geoff Levermore (UK), Sabine Hoffmann (Germany)	
<b>Slab cooling system design using computer simulation</b>	<b>599</b>
Miloš Lain, František Drkal, Vladimír Zmrhal (Czech Republic), Jan Hensen (The Netherlands)	
<b>In search of equilibrium in Canadian housing</b>	<b>606</b>
Woytek Kujawski (Canada)	
<b>Heat storage for energy demand reduction in low-energy buildings</b>	<b>616</b>
Milan Ostrý (Czech Republic)	

<b>Connection of solar and near-surface geothermal energy in ISOMAX technology</b>	<b>622</b>
Edmond Krecke (Luxemburg), Roman Ulbrich, Grzegorz Radlak (Poland)	
<b>Energy balance of windows, solar gains and losses in passive house</b>	<b>629</b>
Miloš Kalousek, Pavel Kúdela (Czech Republic)	
<b>Guidlines on supplementary lighting related to the total daylightindex (TDI)</b>	<b>638</b>
Dariusz Heim, Eliza Szczepańska (Poland)	
 <b>POSTERS</b>	
<b>Reference building physical model of panel system T06B</b>	<b>644</b>
Roman Rabenseifer (Slovakia)	
<b>Use of water power – Small water power plant in Liběchov</b>	<b>647</b>
Ladislav Satrapa, Martin Králík (Czech Republic)	
<b>Light external walls and thermal stability of a room</b>	<b>654</b>
Monika Zachařová, Sylva Klímová, Danuše Čuprová (Czech Republic)	
<b>The energy efficiency of supplementary lighting systems</b>	<b>660</b>
Dariusz Heim, Eliza Szczepańska, Marek Jabłoński (Poland)	
 <b>MATERIALS</b>	
<b>Resource efficiency – The Cinderella of the efficiency debate</b>	<b>664</b>
Holger Wallbaum (Switzerland)	
<b>Structural connections with thermal separation</b>	<b>672</b>
Zuzana Šulcová, Zdeněk Sokol, František Wald (Czech Republic)	
<b>Fibreconcretes with aggregate from recycled materials</b>	<b>678</b>
Jaroslav Výborný, Jan Vodička, Hana Hanzlová, Vladimíra Vytlačilová (Czech Republic)	
<b>PURR-e: Tool for a green cities design</b>	<b>683</b>
Leszek Świątek (Poland)	
<b>Design for disassembly and recycling – Using radio frequency identification (RFID) technology to facilitate whole life actions for sustainable construction</b>	<b>691</b>
Graham Paterson, Steven Taylor (UK), Philip Crowther (Australia)	
<b>Earthen architecture – Regional cultural heritage</b>	<b>702</b>
Hana Urbášková, Ivana Žabičková (Czech Republic)	

<b>Inclined green roofs – Ecological and economical advantages, passive heating and cooling effects</b> Gernot Minke (Germany)	708
<b>Savings of natural resources by the use of elements from recycled municipal waste in building construction</b> Jan Mukařovský, Petr Hájek (Czech Republic)	716
<b>Prefabricated load bearing wall panels – Effective technologies for earth structures</b> Jan Růžička (Czech Republic)	723
<b>Disolution of fibers used in insulating materials production</b> Marie Strnadová, Jiří Hamáček, Aleš Helebrant (Czech Republic)	729
<b>Industrial unfired loam brick buildings with passive house standard</b> Christine Kunze, Mario Kubista, Karl Macho (Austria)	735
<b>Use of ignition layer in production of sintered fly ash aggregate</b> Veronika Kalová (Czech Republic)	741
<b>Burnt oil shale – Main constituent of portland cement</b> Lembi-Merike Raado, Viive Nurm (Estonia)	746
<b>Mechanical and hygric properties of FGD gypsum modified by secondary raw materials</b> Pavel Tesárek, Eva Mňahončáková, Miloš Jerman, Robert Černý (Czech Republic)	752
<b>Basic formulation of environmental design, maintenance and repair optimization of concrete structures</b> Petr Štěpánek, Jan Plšek (Czech Republic)	758
<b>Simulation of behaviour of FRC with recycled aggregate</b> Alena Kohoutková, Iva Broukalová (Czech Republic)	766
<b>Concrete mix and environmental load in the context of durability and reliability</b> Pavel Rovnaník, Břetislav Teplý, Pavla Rovnaníková (Czech Republic)	772
<b>Research of the substitution of bonding and modification material in the grouting system</b> Pavla Matulová (Czech Republic)	779
<b>Column behaviour of austenitic steel hollow sections</b> Michal Jandera, Josef Macháček (Czech Republic)	786

**POSTERS**

<b>Developing of new non-metallic concrete reinforcement</b> David Horák, Petr Štěpánek, Pavel Krůpa (Czech Republic)	<b>792</b>
<b>Frost resistance of self-compacting concrete</b> Januzs Szwabowski, Beata Łaźniewska (Poland)	<b>798</b>
<b>Expandable dwelling system – For cheap and fast erection and dismantling</b> Pavel Truksa (Czech Republic)	<b>804</b>
<b>Utilization of hemp as a filler of cement-bonded particleboards</b> Jiří Bydžovský, Filip Khestl, (Czech Republic)	<b>810</b>

**COMMERCIAL PRESENTATION**

---

<b>Cihelný system HELUZ pro nízkoenergetické stavění</b> HELUZ cihlářský průmysl, v. o. s. (Czech Republic)	<b>814</b>
--	------------
