Section I

Special Issue

Variation and Prospects of PBL in Engineering Education

Guest Editors

Xiangyun Du – Qatar University and Aalborg PBL Centre, Aalborg University, Denmark

Juebei Chen – Aalborg PBL Centre, Aalborg University, Denmark

Aida Guerra – Aalborg PBL Centre, Aalborg University, Denmark

Anette Kolmos – Aalborg PBL Centre, Aalborg University, Denmark

Editorial	875
<i>Ahmad Ibrahim</i>	
Guest Editorial	876–878
<i>Juebei Chen, Aida Guerra, Xiangyun Du and Anette Kolmos</i>	
Trends in Using Student-Centred Approaches in Mathematics and its Connection with Science, Technology, and Engineering	879–891
<i>Drobnič Vidic</i>	
Repeated Use of Adaptive Comparative Judgment to Develop Student Understanding of Artificial Intelligence in Problem Based Learning Assignments	892–904
<i>Lisa Bosman, Aasakiran Madamanchi, Scott Bartholomew and Vetrica Byrd</i>	
Collaborative Graphic Simulation Experience Through Project-Based Learning to Develop Spatial Abilities	905–916
<i>Vicente López-Chao, Jose Luis Saorín, Jorge De La Torre-Cantero and Dámari Melián-Díaz</i>	
From Initiators to Free-Riders: Exploring the Spectrum of Female Engineering Students' Functional Roles in Project-Based Learning using Phenomenography	917–933
<i>Juebei Chen, Jiabin Zhu and Tianyi Zheng</i>	
Variation of PBL in Higher Education Within Engineering, Science and Mathematics	934–946
<i>Bettina Dahl and Annette Grunwald</i>	
Challenges Faced by Students in Adopting PBL in Environments of High Social Inequality: An Instructors' Perspective From a Latin American Case	947–958
<i>Carolina Rojas-Córdova, Moira Negrete-Fernández, Ariel Areyuna-Santiago, María Hilda Flores, Mariela Tapia and Ariel Salazar-Araya</i>	
Engineering Teachers' Professional Learning and Role Identity Change in An Intercultural (Study-Abroad) PBL Programme	959–973
<i>Niels E. R. Lyngdorf, Youjin Ruan, Juebei Chen, Xiangyun Du and Anette Kolmos</i>	
A PBL-Based TRIZ Training Approach for Improving Inventive Competency of Engineers in Workplace	974–989
<i>Wei Liu, Runhua Tan, Zibiao Li and Bojun Yang</i>	

Section II

Contributions in: Active Learning, STEM, Problem Solving, Gender, First Year Students, Living Community, Diversity, PBL, Quality Assurance, Faculty Development, Assessment, Prediction Model, Retention, Interdisciplinary, Extended Curriculum Program Blended Learning, Electrical Engineering, Material Science and Engineering

An Analysis of an Instructional Development Workshop to Promote the Adoption of Active Learning in STEM: Potential Implications for Faculty Developers	990–1009
<i>Laura J. Carroll, Cynthia J. Finelli, Michael J. Prince, Matthew C. Graham, Jenefer Husman, Madison E. Andrews and Maura Borrego</i>	
Characterizing Back-of-the-envelope Problem-solving in Engineering	1010–1020
<i>Gabriel Murillo-Gonzalez and Eric W. Burkholder</i>	
Impact of Grade Penalty in First-Year Foundational Science Courses on Female Engineering Majors	1021–1031
<i>Alysa Malespina and Chandralekha Singh</i>	

The Impact of a Living Community for Women Engineering Undergraduates <i>Siqing Wei, Kerry L. Meyers, Victoria Goodrich and Jazmin Jurkiewicz</i>	1032–1043
Student Experiences with Problem-Based Learning: Findings from an Electrical Engineering Course <i>Songxin Tan and Zixing Shen</i>	1044–1055
Managing the Industrial Engineering Cooperative Program Process Using a Standardization Process Model <i>Emad Hashiem Abualsauod and Asem Majed Othman</i>	1056–1072
Engineering Deans' Perspectives on the Current State of Faculty Development Programs in Engineering Education <i>Mark Huerta, Jeremi London and Ann Mckenna</i>	1073–1091
An Integrated Approach for Assessing Graduate Engineering Management Programs <i>Timothy G. Kotnour, John V. Farr and Catherine Vergopia</i>	1092–1105
Practical Prediction of Overall Performance from Formative Assessment Results of Engineering Students <i>Stephen O. Ekolu</i>	1106–1115
Retaining Engineering Students: A Case Study at Aalborg University <i>Henrik Worm Routhé and Pia Bøgelund</i>	1116–1129
Students' Attitudes Toward Interdisciplinary Learning: A High-School Course on Solar Cells <i>Aharon Gero, Heba Essami, Ofer Danino and Lior Kornblum</i>	1130–1140
Materials Selection by Competitive Analysis of Properties: A Laboratory PBL Experience in Materials Science and Engineering <i>José A. Pardo</i>	1141–1150
Improving Student Preparedness to Study Engineering: A Case Study in South Africa <i>Arthur James Swart and Danri Delpont</i>	1151–1158
Continuous e-Assessment of Student Learning Outcomes in a Multi-Agent Blended Learning System <i>Salah Hammami</i>	1159–1178
Guide for Authors	1179
