INTERNATIONAL COMMITTEE	3
CONTENT	4
ABSTRACTS	5
MSR of the Moravian-Silesian Region for period 2014-2020	6
Challenges of genomics research in the Moravian-Silesian Region	7
Plans of IT-Innovations to support research in MSR	8
Common methods for reducing VOC emissions from industry	9
Challenging photocatalytic reactions for gas cleaning	11
Project air silesia – the transboundary (cz-pl) air pollution transport in the upper silesia region	12
The approach to use microbiological technologies for remediation of POPs - current state and future trends	13
Current state of co-incineration of waste in cement kilns in Poland	14
Perspectives of plasma incineration	15
Genotoxicity in industrial environment of MS Region	16
Multiple toxic effects of air pollutants assessed in vitro	17
Overview of modern methods in quality drug assurance	18
Permeation/penetration of drug nanoparticles through skin and their potential toxicity	19
Polymorphism and its influence to bioavailability of drugs	20
Simple laboratory tests of semi-continuous high solid anaerobic digestion	22
Evaluation of the waste tires pyrolysis process at various laboratory processing conditions	23
Evaluation of process products from pyrolysis and gasification of dried digestates	24
Direct and indirect methods in chemical and mineralogical investigations of industrial fly-ashes	25
CZECH-JAPANESE DAYS ON TECHNOLOGIES	26
Sustainable Industrial and Business Development	27
Material Reuse Project in Japanese Business for Global Environment	28
Trade business of refurbished computer and international trade networking	30
Possibilities of Energy Recovery from Municipal Waste in the Czech Republic	31
European support for SCP projects in Asia	32
Using of the ICA Method in Project and Environmental Education at VŠB – TUO	33
DATA ANALYSIS FOR ENVIRONMENTAL AND HEALTH PRACTICE	34
Re-challenge and opportunity for modern statistics of environmental and clinical data	35
Advanced Information Analysis – modern concept for Economic, Environmental and Health data	36
Proposal of training for new data analyst and final professional groups	37
ENERGY APPLICATIONS	38
Technology for maintaining the cleanliness of heat transfer surfaces of the combustion device	39
