Introduction	5
1 Education and Integration in the Context of Specific Learning Disabilities	
<i>Zdeňka Michalová, Ilona Pešatová</i>	6
1.1 Definition of Integration/Inclusion	6
1.2 A Brief Excursion into the Field of Education in the Czech Republic	7
1.2.1 Objectives of Current Education	7
1.2.2 The Legislative Framework for Integrative Education	9
1.3 Education in the Area of Specific Learning Disabilities	11
1.3.1 The Specification of Specific Learning Disabilities	12
1.3.2 The Definition of Specific Learning Disabilities	13
1.3.3 The Etiology of Specific Learning Disabilities	14
1.3.4 Types of Specific Learning Disabilities	17
1.3.5 The Incidence of Dyslexia	21
1.3.6 Modification of Teachers' Approach to Integrated Students with SLDs	23
1.4 Conclusion	27
2 Academic Self-esteem – Innovation in the Education of Students with Physical Disabilities	
<i>Terézia Harčariková</i>	28
2.1 Introduction	28
2.2 Self-esteem and Self-perception of Individuals with Disabilities	28
2.3 Self-esteem in Students with Disabilities	29
2.3.1 Academic Self-esteem of Students with Disabilities	33
2.4 Conclusion	50
3 New Perspectives of Special Education: Transfer of Knowledge in Neurosciences to Development and Innovation in Rehabilitation, Corrective and Therapeutic Methods Based on Interdisciplinary Intervention with a Focus on Children with CNS Damage	
<i>Alica Vančová</i>	52
3.1 Disability, CNS Damage, Cerebral Palsy in Childhood, Neuro-psycho-educational Intervention, Neuro-psycho-physical Optimisation (Correction)	52
3.2 Psychomotor and Motor Development from the Neuroscience Perspective; Biochemical and Bioelectric Activity in the CNS	58
3.3 Plasticity of the Brain, the Role of Stimulation in the Learning Process in Normal and Damaged CNS	63
3.4 Intact and Anomalous Motor Development Sector – Phylogenetic and Ontogenetic Contexts	67
3.5 Application of Knowledge from Neurophysiology, Neuropsychology and Biomechanics in Educational Activities	73
3.6 Neurokinesitherapy as a Therapy of an Interdisciplinary Nature and its use in Special-educational Practise	74
3.7 Hand and Brain – Relationships	76
3.8 The Results of Research on the Impact of Neurokinesitherapy Knowledge on the Development of Motor Skills and the Functional Areas of Self-care, Hygiene, Mobility and Social Skills in Children with Cerebral Palsy and Mental Retardation	77
3.9 Conclusions	88

4 Complementary Factors Causing and Supporting the Development of Risk Behaviour of Individuals in Residential Care	
<i>Ilona Pešatová</i>	89
4.1 Introduction	89
4.2 Socialization in Relation to Ethopedy	89
4.3 Risk Child Development	90
4.4 Family in Relation to Risk Child Development	92
4.4.1 Risk Factors of Social Environment	93
4.5 Research Data from the Analysis of Family Environment	95
4.5.1 Research Methodology	96
4.5.2 Family Structure of the Respondent at the Time of Arrival at the Institute	97
4.5.3 Unemployment of Respondent's Parents	99
4.5.4 Excessive Alcohol Use of Respondent's Parents	100
4.5.5 Frequency of Parents Convicted of Criminal Activity	102
4.5.6 Current Parents' Stay in Prison at the Time of Respondent's Arrival at the CDI 103	
4.6 Recommendations to Eliminate the Risk Phenomena in the Care of High-risk Individuals and their Families	105
4.7 Conclusion	106
5 Information and Communication Technology and Education of Pupils with Special Educational Needs	
<i>Miroslav Meier</i>	108
5.1 Introduction	108
5.2 Information and Communication Technologies in Education	108
5.3 Pupils with Special Educational Needs	109
5.4 Study Propositions – Study Tool and Sample	110
5.5 Obtained Findings	110
5.5.1 Representation of Pupils with Different Handicaps	110
5.5.2 Information and Communication Technologies Applied in Education of Pupils with Special Educational Needs – Intensity	111
5.5.3 Difficulties in Utilization of Information and Communication Technologies in the Education of Pupils with Special Educational Needs	114
5.5.4 Frequency of Utilization of Information and Communication Technologies by Teachers	116
5.5.5 The Utility of Utilization of Information and Communication Technologies in the Education of Pupils with Special Educational Needs	117
5.6 Conclusion	118
6 Multimedia Technology in Instruction for Special Educators	
<i>Pavel Pešat</i>	120
6.1 An Introduction	120
6.2 Multimedia in Lecturing	120
6.3 A Multimedia Kit for New Teaching Methods in Special Education	122
6.4 Conclusion	126
Resources	128
Summary	140
Authors	142
