

Table of Contents

ISIM'07

Invited Talk

Advanced Features of Hierarchical Component Models <i>Petr Hnětynka, Tomáš Bureš</i>	3
---	---

Software Modeling Languages and Techniques

Transformations from EDOC to EJB by Composition of Mapping Operations <i>Dariusz Gall</i>	13
---	----

Genomial Co-Design: An MDA-compliant Approach for Embedded Architectures <i>Janis Silins</i>	21
--	----

Modeling of Services and Service Collaboration in UML 2.0 <i>Petr Weiss, Jaroslav Zendulka</i>	29
---	----

Software Architectures

Performance Comparison of Distributed Object Server Implementations <i>Petr Kroha, Mathias Kurth, Michael Fleischer</i>	39
--	----

Formal Computation Independent Model of the Problem Domain within the MDA <i>Janis Osis, Erika Asnina, Andrejs Grave</i>	47
--	----

Component Model with Support of Mobile Architectures <i>Marek Rychlý</i>	55
---	----

Software Architectures for Real-time Embedded Applications for Broadcasting <i>Otto Železník, Zdeněk Havlice</i>	63
--	----

Formal Specifications

Deriving Prototypes from UML 2.0 Sequence Diagrams <i>Zbigniew Huzar, Grzegorz Loniewski</i>	73
---	----

Software Validation and Verification

Verification of Good Design Style of UML Models <i>Bogumiła Hnatkowska</i>	83
---	----

Software Project Management

The Unified Approach to Modeling of Software Project Management Processes <i>Šárka Květoňová, Zdeněk Martínek</i>	93
---	----

Information Systems in Business Environment

User Characteristics Acquisition from Logs with Semantics <i>Anton Andrejko, Michal Barla, Mária Bieliková, Michal Tvarožek</i>	103
--	-----

Adaptation of Navigation by the Modified Results of Full Scan Algorithm in Adaptive Hypermedia Systems <i>Marek Bober, Petr Šaloun</i>	111
--	-----

Using Matrix Decompositions in Formal Concept Analysis <i>Vaclav Snasel, Petr Gajdos, Hussam M. Dahwa Abdulla, Martin Polovinecak</i>	121
--	-----

Short Papers

The Analysis of UML State Machine Formal Checking Methods <i>Gundars Alksnis</i>	131
---	-----

The Art of Project Management: Key Adjustments Factors using Dynamic Techniques <i>Antonio Folgueras Marcos, Ángel García Crespo, Belén Ruiz Mezcuca</i>	137
--	-----

UML: Abstraction as a Criterion for Defining Class Diagrams and Object Diagrams <i>Ivan Pogarcic, Miro Francic, Vlatka Davidovic</i>	145
--	-----

WFM'07**Invited Talk**

Colonies – the Simplest Grammar Systems <i>Alica Kelemenová</i>	157
--	-----

Research Papers

On Vertical Grammatical Restrictions that Produce an Infinitive Language Hierarchy <i>Radek Bidlo, Petr Blatný, Alexander Meduna</i>	171
Notes on Restricted P Colonies <i>Lucie Cienčialová, Luděk Cienčiala</i>	179
Structures of the Environment in Colonies <i>Adam Kožaný, Alica Kelemenová</i>	189
Generalized # - Rewriting Systems of Finite Index <i>Zbyněk Křivka, Alexander Meduna</i>	197
General Multigenerative Grammar Systems <i>Roman Lukáš, Alexander Meduna</i>	205
A Note on the Descriptive Complexity of Semi-Conditional Grammars <i>Tomáš Masopust</i>	213
Parsing of Context-Sensitive Languages <i>Lukáš Rychnovský</i>	219
k -Limited Erasing Performed by Scattered Context Grammars <i>Jiří Techet</i>	227
Properties of Eco-Colonies <i>Šárka Vavrečková</i>	235
Short Paper	
A Note on the Parsing of Complete VHDL-2002 <i>Luboš Lorenc, Rudolf Schönecker, Zbyněk Křivka</i>	245
Author Index	249
