Introductionxxiii

Chapter 1: Introduction to WebAssembly and Blazor 1

 A Tale of Two Wars 1

 The First Browser War 2

 The Second Browser War 3

 Introducing WebAssembly..... 4

 Which Browsers Support WebAssembly? 6

 WebAssembly and Mono 7

 Interacting with the Browser with Blazor 8

 How Does It Work? 8

 Blazor Server 10

 Pros and Cons of the Blazor Server..... 11

 Your First Blazor Project..... 12

 Installing Blazor Prerequisites..... 13

 Using Visual Studio 13

 Using Visual Studio Code 15

 Understanding the Blazor Templates for VS/Code 16

 Generating the Project with Dotnet CLI 17

 Generating Your Project with Visual Studio 18

 Running Blazor with Visual Studio Code..... 20

 Running the Generated Project 20

 Examining the Project's Parts 23

The Server Project.....	24
Using a Shared Project.....	27
Understanding the Client Blazor Project.....	28
Layout Components.....	30
Debugging Client-Side Blazor.....	31
Debugging with Visual Studio.....	32
Debugging with Visual Studio Code.....	34
Developing with Hot Reload.....	36
Hot Reload with .NET CLI.....	36
Hot Reload with Visual Studio.....	37
The Blazor WASM Bootstrap Process.....	37
The Blazor Server Bootstrap Process.....	41
Nullable Reference Types.....	43
An Apology.....	43
Using Null in C#.....	43
Using References.....	46
The Null-Forgiving Operator.....	47
Nullable Reference Types and .NET Libraries.....	49
Summary.....	49
Chapter 2: Data Binding.....	51
A Quick Look at Razor.....	51
One-Way Data Binding.....	53
One-Way Data Binding Syntax.....	53
Attribute Binding.....	55
Conditional Attributes.....	56
Event Handling and Data Binding.....	57
Event Binding Syntax.....	57
Event Arguments.....	57
Using C# Lambda Functions.....	58
Two-Way Data Binding.....	59

Two-Way Data Binding Syntax.....	59
Binding to Other Events: @bind:{event}.....	61
Preventing Default Actions.....	62
Stopping Event Propagation.....	63
Formatting Dates.....	66
Change Detection.....	66
The PizzaPlace Single-Page Application.....	69
Creating the PizzaPlace Project.....	69
Adding Shared Classes to Represent the Data.....	70
Building the UI to Show the Menu.....	75
Converting Values.....	78
Adding Pizzas to the Shopping Basket.....	79
Displaying the Shopping Basket.....	81
Entering the Customer Information.....	86
Debugging Tip.....	88
Blazor Validation.....	90
Letting Entities Validate Themselves.....	90
Using FormField and InputText to Enable Validation.....	91
Showing Validation Errors.....	92
Customizing the Validation Feedback.....	95
Summary.....	97
Chapter 3: Components and Structure for Blazor Applications.....	99
What Is a Blazor Component?.....	99
Examining the SurveyPrompt Component.....	100
Building a Simple Alert Component with Razor.....	101
Separating View and View Model.....	105
Creating a DismissibleAlert Component.....	105
Understanding Parent-Child Communication.....	107
Adding a Timer Component.....	107
Using Two-Way Data Binding Between Components.....	110
Using EventCallback<T>.....	114

Referring to a Child Component..... 117

Communicating with Cascading Parameters..... 119

 Using the CascadingValue Component..... 120

 Resolving Ambiguities 122

Component Life Cycle Hooks 123

 Life Cycle Overview 123

 SetParametersAsync 128

 OnInitialized and OnInitializedAsync..... 129

 OnParametersSet and OnParametersSetAsync..... 130

 ShouldRender 131

 OnAfterRender and OnAfterRenderAsync 132

 IDisposable 133

 A Word on Asynchronous Methods 133

Refactoring PizzaPlace into Components 134

 Creating a Component to Display a List of Pizzas 134

 Showing the ShoppingBasket Component 138

 Adding the CustomerEntry Component 142

 Using Cascading Properties..... 145

 Disabling the Submit Button..... 148

Summary..... 151

Chapter 4: Advanced Components..... 153

 Using Templated Components..... 153

 Creating the Grid Templated Component..... 153

 Using the Grid Templated Component 155

 Specifying the Type Parameter's Type Explicitly..... 159

 Using Generic Type Constraints 159

 Razor Templates..... 160

 Wig-Pig Syntax 162

 Using Blazor Error Boundaries 165

 Building a Component Library..... 168

 Creating the Component Library Project 168

 Adding Components to the Library 169

 Referring to the Library from Your Project..... 170

 Using the Library Components 170

Static Resources in a Component Library..... 172

Virtualization 173

 Displaying a Large Number of Rows 173

 Using the Virtualize Component..... 177

 Adding Paging 178

Dynamic Components 182

Component Reuse and PizzaPlace..... 191

Summary..... 194

Chapter 5: Services and Dependency Injection 197

 What Is Dependency Inversion? 197

 Understanding Dependency Inversion 198

 Using the Dependency Inversion Principle 199

 Adding Dependency Injection 201

 Using an Inversion-of-Control Container..... 202

 Constructor Dependency Injection..... 202

 Property Dependency Injection..... 203

 Configuring Dependency Injection 204

 Singleton Dependencies 206

 Transient Dependencies 207

 Scoped Dependencies 208

 Understanding Blazor Dependency Lifetime 209

 Blazor WebAssembly Experiment 211

 Blazor Server Experiment..... 213

 Using OwningComponentBase 215

 The Result of the Experiment 217

Building Pizza Services	218
Adding the MenuService and IMenuService Abstraction.....	219
Ordering Pizzas with a Service.....	223
Summary.....	225
Chapter 6: Data Storage and Microservices	227
What Is REST?	227
Understanding HTTP	227
Universal Resource Identifiers and Methods	228
HTTP Status Codes	229
Invoking Server Functionality Using REST	229
HTTP Headers	230
JavaScript Object Notation	230
Some Examples of REST Calls.....	231
Building a Simple Microservice Using ASP.NET Core	233
Services and Single Responsibility.....	233
The Pizza Service	234
What Is Entity Framework Core?.....	238
Using the Code-First Approach.....	239
Preparing Your Project for Code-First Migrations.....	242
Finding Your Database Server's Connection String	244
Creating Your First Code-First Migration	246
Generating the Database	250
Enhancing the Pizza Microservice	253
Testing Your Microservice Using Postman.....	256
Summary.....	260
Chapter 7: Communication with Microservices	261
Using the HttpClient Class.....	261
Examining the Server Project.....	261
Using a Shared Project. Why?	263
Looking at the Client Project	264
Emulating a Slow Network in Chrome.....	266

Understanding the HttpClient Class	269
The HttpClientJsonExtensions Methods	270
Customizing Serialization with JsonSerializerOptions	273
Retrieving Data from the Server	273
Implementing the MenuService	275
Showing a Loading UI.....	278
Storing Changes.....	280
Updating the Database with Orders.....	280
Building the Order Microservice	284
Talking to the Order Microservice	286
Summary.....	288
Chapter 8: Unit Testing	289
Where Can We Find Bugs?	289
Requirements	290
Coding	290
Integration	291
Beta Testing.....	291
Post-release	292
Why Should We Use Unit Tests?	292
What Makes a Good Unit Test?	292
Unit Testing Blazor Components	293
Adding a Unit Test Project.....	293
Adding bUnit to the Test Project	294
Write Your First Unit Test.....	295
Writing Good Unit Test Methods	295
Running Your Tests	296
Making Your Test Pass.....	299
Using Facts and Theories	300
Checking Your Sanity.....	301

Write a bUnit Tests with C# 303

 Understanding bUnit? 303

 Testing Component Interaction..... 308

 Passing Parameters to Our Component..... 311

 Testing Two-Way Data Binding and Events..... 315

 Testing Components that Use RenderFragment 317

 Using Cascading Parameters 325

Using MOQ to Create Fake Implementations 327

 Injecting Dependencies with bUnit..... 328

 Replacing Dependencies with Fake Objects 330

 Using Stubs 331

 Using Mocks 333

 Implementing Stubs and Mocks with MOQ 336

Writing bUnit Tests in Razor 339

 The First Razor Test 339

Handling Asynchronous Re-renders..... 343

Configuring Semantic Comparison 345

 Why Do We Need Semantic Comparison? 346

 Customizing Semantic Comparison..... 346

Summary..... 349

Chapter 9: Single-Page Applications and Routing..... 351

 What Is a Single-Page Application? 351

 Single-Page Applications..... 352

 Layout Components 352

 Using Blazor Layout Components..... 352

 Configuring the Default Layout Component..... 355

 Selecting a Layout Component..... 357

 Nesting Layouts..... 359

 Blazor Routing..... 360

 Installing the Router 360

 The NavMenu Component 361

Setting the Route Template 364

Redirecting to Other Pages..... 366

Understanding the Base Tag..... 368

Lazy Loading with Routing..... 369

 Lazy Loading Component Libraries 369

 Marking an Assembly for Lazy Loading..... 371

 Dynamically Loading an Assembly 372

 Lazy Loading and Dependencies..... 374

Adding Another Page to PizzaPlace 377

Summary..... 386

Chapter 10: JavaScript Interoperability 389

 Calling JavaScript from C#..... 389

 Providing a Glue Function..... 389

 Using IJSRuntime to Call the Glue Function 390

 Storing Data in the Browser with Interop..... 390

 Passing a Reference to JavaScript..... 393

 Calling .NET Methods from JavaScript..... 395

 Adding a Glue Function Taking a .NET Instance 396

 Using Services for Interop..... 398

 Building the LocalStorage Service 398

 Dynamically Loading JavaScript with Modules..... 403

 Using JavaScript Modules 403

 Loading the Module into a Blazor Service 404

 Adding a Map to PizzaPlace..... 406

 Choosing the Map JavaScript Library..... 406

 Adding the Leaflet Library 407

 Building the Leaflet Map Razor Library 408

 Registering with the Map Provider 409

 Creating the Map Component..... 409

 Consuming the Map Component 411

 Adding Markers to the Map 413

 Summary..... 419

Chapter 11: Blazor State Management.....	421
Examining Component State.....	421
What Not to Store	422
Local Storage.....	422
The Server	426
URL	432
Using Protected Browser Storage.....	433
The Redux Pattern.....	434
The Big Picture	434
The Application Store	435
Actions.....	435
Reducers	436
Views	436
Using Fluxor	436
Creating the Store	437
Using the Store in Our Blazor Application.....	438
Adding an Action.....	441
Implementing the Reducer	441
Redux Effects	443
Adding the First Action	444
Adding the Second Action and Effect	446
Summary.....	448
Chapter 12: Building Real-Time Applications with Blazor and SignalR.....	449
What Is SignalR?	449
How Does SignalR Work?	449
Building a WhiteBoard Application.....	450
Creating the WhiteBoard Solution.....	450
Implementing the Mouse Handling Logic	453
Painting the Segments on the Board.....	455
Adding a SignalR Hub on the Server.....	458
Implementing the BoardHub Class	458

Configuring the Server	459
Implementing the SignalR Client.....	461
Making the SignalR Hub Connection	461
Notifying the Hub from the Client	462
Cleaning Up the Hub Connection	463
Summary.....	464
Chapter 13: Efficient Communication with gRPC	465
What Is gRPC?.....	465
Pros and Cons of RPC	465
Understanding gRPC.....	466
Protocol Buffers.....	466
Describing Your Network Interchange with Proto Files.....	467
Installing the gRPC Tooling	467
Adding the Service Contract.....	469
Implementing gRPC on the Server	471
Implementing the Service	472
Adding gRPC.....	473
Building a gRPC Client in Blazor	475
Creating the ForecastGrpcService.....	475
Enabling gRPC on the Client.....	477
Updating the FetchData Component.....	478
Comparing REST with gRPC.....	479
Summary.....	482
Chapter 14: Supporting Multiple Languages in Your Blazor Application.....	483
Understanding Internationalization, Globalization, and Localization.....	483
Representing the User's Locale	484
CurrentCulture vs. CurrentUICulture	486
Enabling Multiple Languages.....	486
Using Request Localization	486
Internationalizing Your App	492

Localizing Your App	494
Adding Your First Resource File	494
Localizing SurveyPrompt	496
Understanding Resource Lookup	498
Adding a Language Picker in Blazor Server	499
Making PizzaPlace International	506
Enabling Globalization Data	506
Globalizing Your Components	507
Adding a Language Picker in Blazor WebAssembly	512
Using Global Resources	518
Summary	519
Chapter 15: Deploying Your Blazor Application	521
Deploying Standalone Blazor WebAssembly	521
Hosting on GitHub	521
Creating a Simple Website	523
Deploying a Simple Site in GitHub	524
Deploying a Blazor WASM Project	525
Fix the Base Tag	531
Disabling Jekyll	533
Fixing GitHub 404s	534
Alternatives for GitHub	535
Deploying Your Site As WebAssembly	535
Deploying Hosted Applications	536
Understanding the Deployment Models	536
Deploying to Microsoft Azure	537
Creating the Publishing Profile	537
Selecting Publishing Options	543
Publishing the Application	545
Summary	546

Chapter 16: Security with OpenId Connect	547
Representing the User	547
Using Claims-Based Security	547
Understanding Token Serialization	549
Representing Claims in .NET	550
OpenId Connect	551
Understanding OpenId Connect Hybrid Flow	551
Identity Providers	553
Implementing the Identity Provider with IdentityServer4	553
Adding the Login UI to Our Identity Provider	558
Understanding User Consent	561
Protecting a Blazor Server Application with Hybrid Flow	562
Adding OpenId Connect to Blazor Server	563
Implementing Authorization in Blazor Server	564
Using AuthorizeView	572
Adding and Removing Claims	577
Enabling Role-Based Security	580
Accessing a Secured API	583
Using an Access Token	584
Registering the API Project with the Identity Provider	587
Adding JWT Bearer Token Middleware	589
Enabling the Bearer Token in the Client	591
Using Policy-Based Access Control	595
Summary	603
Chapter 17: Securing Blazor WebAssembly	605
Authorization Code Flow with PKCE	605
Understanding PKCE	606
Registering the WASM Client Application	607
Creating and Examining the Application	607
Registering the Client Application	610

TABLE OF CONTENTS

Implementing Authentication	611
Customizing the Login Experience	614
Accessing a Protected API	615
Fetching Data from the WeatherService API.....	615
Using the AuthorizationMessageHandler.....	618
Adding Client-Side Authorization.....	620
Using Role-Based Security.....	621
Creating the Claims Component.....	621
Enabling RBAC.....	624
Promoting the Role Claim.....	626
Using Policy-Based Access Control.....	628
Updating Scopes.....	628
Adding Policies	629
Summary.....	631
Index.....	633
