2.5.4	Calendrical diversity: evidence from the Council of Nicaea	80
2.6	The fourth to sixth centuries: the persistence of diversity	85
2.6.1	Justinian’s decree	85
2.6.2	The <i>ketubah</i> of Antinoopolis	87
2.6.3	The Zoar inscriptions	87
2.6.4	Conclusion	97
3	The new moon	99
3.1	Introduction	99
3.1.1	The ‘new moon’: some definitions	99
3.1.2	Calculation and observation	101
3.1.3	The Jewish lunar calendar	102
3.1.4	The Magharians	104
3.1.5	The evidence of Jewish dates	106
3.1.6	Astronomical data	108
3.1.7	Visibility and sighting of the new moon	110
3.1.8	The conjunction	112
3.1.9	Non-lunar factors	113
3.2	The early period: the sighting of the new moon	113
3.2.1	John Hyrcanus and Josephus	113
3.2.2	Philo of Alexandria	116
3.2.3	The Berenike inscriptions	120
3.2.4	Cestius’ assault on Jerusalem, 66 CE	121
3.2.5	Second-century sources	123
3.3	The later period: the day of the conjunction	124

3.3.1	The Sardica document	124
3.3.2	The Catania inscription	132
3.3.3	The <i>ketubah</i> of Antinoopolis	137
3.3.4	Conclusion: the shift to the conjunction	139
3.4	The later period: the persistence of diversity	143
3.4.1	The letter of Ambrose	144
3.4.2	The Zoar inscriptions	146
3.4.3	Conclusion	153
4	The rabbinic calendar: development and history	155
4.1	The Mishnaic calendar	157
4.1.1	The new month	157
4.1.2	The intercalation	160
4.1.3	Theory and reality	162
4.2	The Talmudic period	164
4.2.1	The empirical calendar	164
4.2.2	Calendrical rules	165
4.2.3	The fixed calendar	170
4.2.4	The Hillel tradition	175
4.2.5	The 'institution' of the fixed calendar	180
4.3	The Geonic period	182
4.3.1	Evidence of divergences from the present-day rabbinic calendar	182
4.3.2	The Geonic calendar(s)	186
4.3.3	The calendrical court	188
4.4	The emergence of the present-day rabbinic calendar	191
4.4.1	The present-day rabbinic calendar: an outline	191
4.4.2	The sequence of months	194
4.4.3	The rule of <i>lo ADU</i>	194
4.4.4	The rule of <i>molad zagen</i>	195
4.4.5	The 19-year cycle	196
4.4.6	The calculation of the <i>molad</i> : the evidence	200
4.4.7	The origins of the present-day rabbinic <i>molad</i>	207
5	Calendar and community: the emergence of the normative Jewish calendar	211
5.1	Why the rabbinic calendar changed: some theories	212
5.1.1	The persecution theory	212
5.1.2	The Christian influence theory	222
5.1.3	The scientific progress theory	227
5.2	The 'one calendar' theory	232

5.2.1	The theory in Geonic and later medieval sources	232
5.2.2	'One calendar': the Christian parallel	236
5.2.3	Unification as a rabbinic policy	237
5.3	Palestine and Babylonia: the single rabbinic community	241
5.3.1	The ideal of calendrical unanimity	241
5.3.2	Calendrical unanimity and the Babylonian community	244
5.3.3	Calendrical dissidence in Babylonia	247
5.3.4	Calendar prediction in Babylonia	249
5.3.5	From calendrical rules to the fixed calendar . . .	253
5.4	The Babylonian origins of the normative Jewish calendar	257
5.4.1	Calendrical rules in Babylonia	257
5.4.2	Calendar calculation in Babylonia	258
5.4.3	The erosion of Palestinian authority	263
5.4.4	The R. Saadya–Ben Meir controversy	264
5.4.5	The 'four parts table'	268
5.4.6	The calculation of the <i>molad</i>	270
	Appendix: The Exilarch's Letter of 835/6 CE	277
