

CONTENTS

Series Editor's Introduction	vii
Preface	ix
Acknowledgments	xi
1. Introduction	1
1.1 Interaction and Social Science	1
1.2 Democracy Around the World	4
1.3 Introducing Spatial Dependence	8
1.4 Maps as Visual Displays of Data	11
1.5 Measuring Spatial Association and Correlation	14
1.6 Measuring Proximity	19
1.7 Estimating Spatial Models	28
1.8 Summary	33
Notes	34
2. Spatially Lagged Dependent Variables	35
2.1 Regression With Spatially Lagged Dependent Variables	35
2.2 Estimating the Spatially Lagged y Model	40
2.3 Maximum Likelihood Estimates of the Spatially Lagged y Model of Democracy	43
2.4 Equilibrium Effects in the Spatially Lagged y Model	44
2.5 Spatial Dependence in Turnout in Italy	50
2.6 Using Different Weights Matrices in a Spatially Lagged Dependent Variable Model	56
2.7 The Spatially Lagged Dependent Variable Versus OLS With Dummy Variables	61
Notes	64
3. Spatial Error Model	65
3.1 The Spatial Error Model	65

3.2	Maximum Likelihood Estimation of the Spatial Errors Model	67
3.3	Example: Democracy and Development	68
3.4	Spatially Lagged y Versus Spatial Errors	69
3.5	Assessing Spatial Error in Dyadic Trade Flows	70
3.6	Summary	75
	Notes	76
4.	Extensions	77
4.1	Specifying Connectivities	77
4.2	Inference and Model Evaluation	82
4.3	Summary	86
	Note	86
	Appendix: Software Options	87
	References	91
	Index	97
	About the Authors	99
