Orel V.

Opening Address	13
-----------------------	----

INTELLECTUAL BACKGROUND OF MENDEL'S RESEARCH

Session I

Orel V.

Mendel's achievement in the context of the cultural peculiarities of Moravia	23
--	----

Franke H., Orel V.

Christian Carl André (1763-1831) as a mineralogist and organizer of scientific sheep breeding in Moravia	47
--	----

Wood R. J., Orel V.

The sheep breeders' legacy to Gregor Mendel	57
---	----

De Cuenca

- Spanish merinos in relation to scientific sheep
breeding in Moravia 71

Vávra M., Matalová A.

- Cultivation of new varieties of ornamental plants
in Moravia in the period of Mendel's research ... 77

Janko J.

- Mendel's discovery and natural sciences in Prague 87

Nakazawa S.

- Development of biology from Goethe to Mendel 99

Orel V., Fantini B.

- The enthusiasm of the Brno Augustinians for science
and their courage in defending it 105

Discussion

- on the intellectual background of Mendel's research .. 111

STRUCTURE OF THE DISCOVERY

Session II

Meijer O. G.

- The essence of Mendel's discovery 123

Serré J.-L.

- Mendel's rejection of the concept of blending inhe-
ritance 179

Orel V., Kuptsov V.

- Preconditions for Mendel's discovery in the body
of knowledge in the middle of 19th century 189

Wunderlich R.

The scientific controversy about the origin of the embryo of phanerogams in the second quarter of 19th century (up to 1856) and Mendel's "Experiments in Plant Hybridization"	229
--	-----

Weiling F.

J. G. Mendel's "Experiments in Plant Hybridization" and the then prevailing theory of the fertili- zation of higher plants	237
--	-----

Krausse E.

Elucidation of the fertilization process in algae by N. Pringsheim (1823-1894) and the possible ways of transmission of that knowledge to J. G. Mendel	259
---	-----

Discussion

on the structure of Mendel's discovery	269
--	-----

CHARACTER OF THE DISCOVERER

Session III

George W.

The making of Mendel	279
----------------------------	-----

Cetl I.

The chronology of Mendel's scientific activities	289
--	-----

Matalová A.

Mendel's personality - still an enigma?	299
---	-----

Dubec K.

Mendel's attempt at a creation of a theory on the origin of the whirlwind	309
--	-----

Discussion	
on the character of the discoverer	313

LATE APPRAISAL OF THE DISCOVERY

Session IV

Allen G. E.

Mendel and 19th century mechanistic materialism: Its influence on genetics in the twentieth century	323
--	-----

Fantini B.

Mendelism and modern genetics: Stability and modifi- cations in the core of a scientific tradition	329
---	-----

Discussion

on the late appraisal of Mendel's discovery	337
---	-----

CLOSING SESSION

Richardson J. G.

From Mendel to new biotechnology	347
--	-----

Conclusions

on the role of Gregor Mendel in the foundations and early development of genetics	353
--	-----

CLOSING WORDS	361
---------------------	-----

LIST OF PARTICIPANTS	365
----------------------------	-----
