

Outline

Foreword	2
Introduction	4
Soil	5
Chemical	5
Physical	7
Biological	8
Practical field soil tests	9
Visual Evaluation of Soil Structure (VESS)	9
Slake test (Wet Aggregate Stability)	13
Infiltration test	14
Simplified Nitrate Test	15
Soil respiration test	16
Field CO ₂ respiration test	16
Laboratory CO ₂ respiration test	17
Chemical soil analysis	18
Sampling	19
CEC: Cation Exchange Capacity	20
pH	20
Nitrogen	21
Phosphorus	21
Potassium	22
Calcium	23
Magnesium	24
Sulphur	25
Boron	25
Zinc	25
Manganese	25
Copper	26
Iron	26
Carbon inputs	27
Characteristics of carbon inputs	27
Green carbon	27
Brown carbon	28
Black carbon	29

Tillage	30
Soil compaction	30
Tillage practices for organic farms	32
Subsoiling	32
Reduced ploughing (mould board plough)	34
Shallow incorporation of biomass	36
Roller crimping with direct drilling	38
Cultivation on an organic farm	40
Prevention methods	40
Mechanical cultivation	40
Cover crops	46
Chemical fertility	46
Physical fertility	46
Biological fertility	47
Types of cover crop	48
Legumes	48
Grasses	49
Brassicas	49
Buckwheat.....	50
Establishing cover crops	51
Sowing after cash crop harvest	51
Interseeding/undersowing	51
Intercrops and living mulches	52
In-situ and ex-situ cover crop mulch	53
Crop rotation	55
General Principles to Guide Crop Rotation	56
Crop Rotation Planning Steps	56
Crop list English to Latin	57
Sources	58
