Chapter 1 Use of Virtual Reality in Exposure Therapy and Other Psychological Treatment Methods..... 1

Aman Sariya, Rishabh Nanawati and Supriya Agrawal

1.1 Introduction 1

1.2 Psychology 2

1.3 The workings and quality of the simulation..... 4

1.4 Benefits..... 7

1.5 VR in the Use of Specific Disorders 10

1.6 Methods to Administer VRET in Therapy 14

1.7 Issues and resolution 17

1.8 Discussion 18

References..... 19

Chapter 2 Role of Swarm Intelligence and Neural Network in Intelligent Traffic Management 27

Umesh Kumar Lilhore and Sarita Simaiya

2.1 Introduction 27

2.2 Related Work 28

2.3 Swarm Intelligence, IoT and Neural Network in ITM 29

2.4 Swarm Intelligence (SI)-Based Methods 30

2.5 Element of IoT Technology 31

2.6 IoT Architecture..... 32

2.7 Deep Learning 33

2.8 Advantages of an ITM 35

2.9 Key Applications of ITM..... 35

2.10 Intelligent Transport System (ITM) Functionalities..... 37

2.11 Challenges Besides Transport in Metropolitan Centers 38

2.12 Conclusions 40

References..... 40

Chapter 3 Image Systems and Visualizations 45

Pulkit Narwal, Neelam Duhan and Komal Kumar Bhatia

3.1 Introduction 45

3.2 Fundamentals of Computer Vision 48

3.3 Vision in Single and Multiple Images 58

3.4 Applications of Computer Vision 61

3.5	Problem Implementation: Unattended Object Detection.....	67
3.6	Conclusion	75
	References.....	76
Chapter 4	Virtual Reality in Social Media Marketing: The New Age Potential	79
	<i>Sheetal Soni, Kaustubhi Shuklaa, Usha Yadav and Harjeev Singh Ahluwalia</i>	
4.1	Introduction	79
4.2	The Changing Era of Technology.....	81
4.3	The Evolution of Marketing Strategies.....	85
4.4	Applications of Extended Reality – Companies being Innovators	86
4.5	The Future of Virtual Reality and Social Media Marketing	90
4.6	Conclusion	91
	References.....	92
Chapter 5	An Efficient Deep Learning Framework for Multimedia Big Data Analytics.....	99
	<i>G. S. Pradeep Ghantasala, L.R. Sudha, T. Veni Priya, P. Deepan and R. Raja Vignesh</i>	
5.1	Introduction	99
5.2	Deep Learning	100
5.3	Deep Learning Frameworks	107
5.4	Classification.....	109
5.5	Object Detection	115
5.6	Single Shot Detector.....	121
5.7	Applications of Multimedia Analytics Based on Deep Learning Techniques.....	123
5.8	Conclusion	125
	References.....	125
Chapter 6	An Optimal System on Data Challenge with Distributed Data Management on Cloud, Fog and Edge Computing.....	129
	<i>M. Arvindhan, Abhineet Anand and Md. Abdul Wassey</i>	
6.1	Introduction	129
6.2	Infrastructure and Integration with Provisioning and Management Systems	130
6.3	Five Challenges of a Traditional Data Warehouse	134
6.4	The Importance of Adaptation	136
6.5	Edge Taxonomy and Framework.....	138

6.6	The Fog Computing Data Platform	142
6.7	Conclusion	148
	References.....	148
Chapter 7	Anomaly Detection in Real-Time Videos using Match Subspace System and Deep Belief Networks	151
	<i>D. Ratna Kishore, D. Suneetha, G. S. Pradeep Ghantasala and B. Ravi Sankar</i>	
7.1	Introduction.....	151
7.2	Categories of Anomaly.....	151
7.3	Digital Video Tampering Detection.....	152
7.4	Spatio-Temporal Video-Volume Conformation Inside Video.....	153
7.5	Rotation-Invariant Attribute Modeling Motion Coherence (RIMOC)	153
7.6	Learning Deep Depictions of Arrival and Motion.....	153
7.7	Real-Time Troop Comportment Detection in Video	153
7.8	Locality Sensitive Hashing Filters (LSHF)	154
7.9	Frame Deletion Detection Method.....	154
7.10	Challenges	154
7.11	Related Works	155
7.12	Proposed Model	158
7.13	Anomaly Detection with One Class Support Vector Machines	163
7.14	Results.....	163
7.15	Conclusion & Future Scope	167
	References.....	168
Chapter 8	Innovation in Multimedia Using IoT Systems	171
	<i>Abdullah Ayub Khan, Asif Ali Laghari, Aftab Ahmed Shaikh, Zaffar Ahmed Shaikh and Awais Khan Jumanni</i>	
8.1	Introduction.....	171
8.2	IoT-Enabled Multimedia Frameworks	174
8.3	IoT-based Multimedia Applications.....	176
8.4	Proposed Framework for IoT Multimedia Service Delivery	178
8.5	Challenges and Limitations	180
8.6	Open Research Issues	181
8.7	Conclusion	183
	Author Contributions.....	183
	References.....	183

Chapter 9 Virtual Reality and Augmented Reality for Education..... 189

*Awais Khan Jumani, Waqas Ahmed Siddique, Asif Ali Laghari,
Ahad Abro and Abdullah Ayub Khan*

9.1	Introduction of Virtual Reality.....	189
9.2	Three Hundred and Sixty-Degree Images and Videos.....	191
9.3	User Experience of Video With VR Devices.....	193
9.4	Classification of Virtual Reality Systems	194
9.5	3D Visualization	195
9.6	Uses of Virtual Reality.....	196
9.7	VR in Education	196
9.8	Teacher Preparation and New Teacher Training.....	196
9.9	Virtual Tools for Learning in the Real World	198
9.10	Creating Additional Content	199
9.11	Augmented Reality in Education	200
9.12	How AR Works in Education.....	201
9.13	How do We use Augmented Reality in the Education Field?.....	202
9.14	AR Development in Education: Lead the Way of Innovation or Are Left Behind	202
9.15	Augmented Reality Apps for Education.....	204
9.16	Augmented Reality Technology in Education.....	207
9.17	Open Research Issues and Future of VR and AR.....	207
9.18	Conclusion	208
	References.....	208

Chapter 10 Fog- or Edge-Based Multimedia Data Computing and Storage Policies211

Preety, Kuldeep Singh Kaswan and Jagjit Singh Dhatteval

10.1	Introduction.....	211
10.2	Innovation Services	212
10.3	Features of Fog and Edge Computing.....	215
10.4	Concepts of Fog Computing	216
10.5	Models/Architectures	217
10.6	Comparison between Cloud Computing and Fog Computing	220
10.7	Promise of Cloud and Fog Computing.....	222
10.8	Contradiction in Cloud Computing and Fog Computing	224
10.9	Legal Dimensions of Cloud Computing and Fog Computing	226
10.10	Conclusion	227
	References.....	227

Chapter 11 Role of Virtual Reality and Multimedia Computing in Industrial Automation System231

Umesh Kumar Lilhore, Sarita Simaiya, Leeladhar Chourasia, Naresh Kumar Trivedi and Abhineet Anand

11.1 Introduction.....231

11.2 Literature Survey232

11.3 Virtual Reality and Multimedia Computing234

11.4 Key technologies of VR.....237

11.5 Challenges in manual Industrial System.....238

11.6 Industrial Automation System.....239

11.7 VR Applications in Industrial Automation System.....240

11.8 Conclusion241

References.....242

Chapter 12 Virtual Reality-Based Education245

Abhineet Anand, Naresh Kumar Tiwari, Umesh Lihore and Rajeev Tiwari

12.1 Introduction.....245

12.2 Benefits of Virtual Reality in Education246

12.3 New Technology Is Available to Users.....250

12.4 Five Main Characteristics of a VR Experience.....252

12.5 Development of a New Role for VR Educators252

12.6 Open New Horizons with VR Education – Future253

References.....253

Chapter 13 Concentrated Gaze Base Interaction for Decision Making using Human-Machine Interface257

B.G.D.A. Madhusanka, Sureswaran Ramadass, Premkumar Rajagopal and H.M.K.K.M.B. Herath

13.1 Introduction.....257

13.2 Proposed Method for Gaze Estimation.....259

13.3 Eye-Gaze Estimation Algorithm265

13.4 Experimental System and Results.....267

13.5 Conclusion273

References.....274

Index.....281
