

Content

Content	5
1 Introduction to geographic information systems	9
1.1 Geoinformatics, geomatics and geoinformatic technologies	9
1.2 Geographic information and the real world.....	11
2 GIS as a geoinformation technology	17
2.1 What is GIS and what is not?.....	17
2.2 Historical development and perception of GIS	20
2.2.1 GIS development stages.....	21
2.2.2 Perception of GIS.....	22
2.3 ArcGIS	25
2.4 Areas of GIS applications and its background	30
2.4.1 Areas of GIS application	30
2.4.2 Facilities for GIS.....	34
3 Representation of the real world in GIS	36
3.1 Geografická data.....	38
3.1.1 Types of geographical data	40
3.2 Goelements and their description.....	41
3.2.1 Geometric component.....	42
3.2.2 Thematic (descriptive, attribute) component.....	51
3.2.3 Temporal component.....	53
3.2.4 Relational component.....	54
3.2.5 Functional component	55
4 Data models in GIS	57
4.1 Layer and object approach	58
4.2 Vector data model	60

4.2.1	Examples of vector data model.....	60
4.2.2	Vector data formats.....	64
4.3	Raster data model.....	66
4.4	Digital elevation model (according to US standards)	71
4.4.1	Raster terrain models	73
4.4.2	Polyhedral terrain models	76
4.4.3	Plate terrain model.....	77
5	Database systems	78
5.1	Approaches to data processing.....	80
5.2	Database models.....	82
5.3	ESRI Geodatabase	87
6	Planning GIS project activities	90
6.1	Defining project goals	91
6.2	Data entry and database design	94
6.2.1	Data entry	94
6.2.2	Geodatabase design	99
6.3	Data pre-processing, storage and management	101
6.4	Analytical data processing	107
6.5	Data visualization	108
7	GIS analysis	111
7.1	Database queries.....	111
7.1.1	Database queries in vector data representation.....	113
7.1.2	Database queries in raster data representation	114
7.2	Overlay	115
7.2.1	Vector overlays.....	115
7.2.2	Raster overlay.....	122
7.3	Distance analysis	126

7.4	Network analysis.....	129
7.5	Analysis of the digital elevation model	134
7.6	Other analysis	140
8	Spatial decision making in GIS	142
8.1	Multi criteria evaluation	143
8.2	Analytical hierarchical process	143
9	Issues of GIS implementation into the current information system of organization	144
9.1	Phased approach of solution and implementation of GIS	147
10	Geoinformation databases in the development of regions	149
10.1	Czech office for surveying, mapping and cadastr (www.cuzk.cz)	149
10.2	Army Geographic and Meteorological Office in Dobruška	150
11	Literature	152
