Table of Cases		
Table of Legislation	XXXV	
List of Abbreviations	xlvii	
1. Regulation and Services: Basic Conceptual Background	1	
A. Services	2.	
1. Services in real-economic terms	3	
a. Brief history of (scientific interest in) services	3	
b. Definition—classifications	4	
c. Economic characteristics	9	
d. Factors affecting service provision	12	
e. Trade in services—globalization	14	
f. From freedom to comparative advantage in services:		
the role of regulation	15	
2. In legal terms	17	
a. Services supply modes under the GATS and the TFEU	18	
b. Services as activities or as outcomes?	21	
c. Normally provided for remuneration?	22	
d. A residual legal category?	23	
B. Regulation	29	
1. Regulation: basic concepts	29	
a. Defining regulation	29	
b. Explaining regulation	31	
c. Regulation's objectives	33	
2. Regulation: the EU peculiarities	35	
a. Multi-level regulation—regulatory competition	35	
b. Regulation through internal market—competition law	36	
2. Economic v. Non-economic Services	38	
A. The political distinction between economic and		
non-economic services	42	
1. What is there in a name?	42	
a. From sterile dilemmas	42	
b to workable three-prong distinctions	44	
2. Content of SGIs/SGEIs	47	
a. Sources of SGI rules	4/	
b. Approaches to the definitions of SGIs	56	
3. EU impact on SGIs	58	
a. The competence issue—who has the responsibility to	58	
determine the scope of SGIs? b. The content issue—what conditions should SGIs	)0	
fulfil in order to receive special treatment?	62	
julged the order to receive special treatment.	02	

	B.	The legal distinction	65
		1. Nature of the body subject to the rules	67
		a. Free movement	67
		b. Public procurement	68
		c. Competition rules: private conduct and state aids	69
		d. General assessment of the nature of the entity criterion	70
		2. Nature of the activity	70
		a. Free movement	70
		b. Public procurement	72
		c. Competition rules: private conduct and state aid	74
		d. General assessment of the activity criterion	77
		3. The object of a measure	78
		a. Free movement	80
		b. Public procurement	80
		c. Competition—private conduct	81
		d. General assessment of the object of the measure	83
		4. Mitigating factors—threshold of interference	83
		a. Free movement	83
		b. Public procurement	83
		c. Competition rules—private conduct	84
		d. Competition rules—state aid	86
		e. General assessment of the mitigating factors	86
		5. Exceptions—general	87
		a. Free movement	87
		b. Public procurement	88
		c. Competition rules—private conduct	88
		d. State aid rules	89
		6. Services of general economic interest as an exception:	
		Article 106(2) TFEU	89
		a. Free movement	90
		b. Public procurement	90
		c. Competition rules—private conduct	91
		d. Competition law—state aid	92
		e. General assessment of Article 106(2)	93
	C.	Conclusion	94
2	D		
3.	Re	strictions	97
	A.	Restrictions: the criteria	97
		1. Theoretical foundations	97
		a. The stakes	98
		b. Evolution—benchmark judgments	101
		c. Proposed criteria	106
		2. Quantitative data	128
	B.	Restrictions: the characteristics	133
		1. Origin of restrictions	133
		2. Impact: access v. exercise	135
		a. Generally on the distinction	135
		b. Access restrictions	136

	Contents	xxi
	c. Exercise restrictions	139
	3. Comment	142
	C. Conclusion	145
4.	Justifications	146
	A. Identifying the grounds for justifications: the interests	
	protected	146
	1. Treaty-based justifications	146
	2. Judge-made justifications	150
	a. Overriding reasons of public interest: subject to a strict	
	proportionality review	151
	b. Evading a strict proportionality review: solidarity and morality	159
	c. The riddle of fundamental rights	161
	3. Legislative justifications	166
	B. Justifying and evaluating justifications: the measures	
	adopted	171
	1. Justifying justifications	171
	2. Evaluating justifications: from proportionality	
	to coherence	173
	a. Proportionality as a two- or three-prong test	173
	b. Consistency and coherence as an alternative to 'true'	
	proportionality	176
5.	Judge-made Regulation in the Field of Services	179
	A. Categories of services concerned	180
	B. Judge-made regulation as a substitute to legislation	184
	1. Gambling/ gaming	184
	2. Private security services	189
	3. Tourist guides	190
	C. Judge-made regulation as a top-up to legislation	190
	1. Healthcare services	190
	2. Professional qualifications	195
	3. Posted workers	199
	a. Softening up administrative requirements for entry and work	200
	b. Wage and social rights portability	201
	4. Public procurement	206
	a. Extending the scope of public procurement rules: the	
	transparency case law	206
	b. Substituting the public procurement rules for other	200
	Treaty rules	208
	c. Applying the public procurement rules to all kinds of services	210
	D. Taxation issues	211
	1. Direct taxation	212
	2. Indirect taxation—VAT	214
	E. Assessment—future regulatory needs	215
	1. The role of secondary legislation	215
	2. What next? Need for further action?	218
	a. Reshaping the General Systems of diploma recognition	219

	b. Circumscribing the definition of SGEI	219
	c. Enhancing mutual recognition	220
	d. Other measures	221
6.	Regulation through Legislation	222
	A. Content of EU legislation on services—a positivist approach	222
	1. Transport policy: towards a common policy?	225
	a. Opening up of markets and securing competition	226
	b. Homogenization of market conditions and creation of a level	
	playing field	227
	c. Protection	228
	d. Public service obligations	229
	2. Financial services: from a decentralized to a central 'passport'	231
	a. Phase one: Decentralized passports—home country control	232
	b. Phase two: Centralized passports—unified conditions for authorizations	235
	c. Phase three: The crisis aftermath—centralizing supervision	236
	3. Professional qualifications: from sectoral harmonization to	
	horizontal mutual recognition	238
	a. Long-lived transitional measures	238
	b. Sector-specific recognition based on harmonization	239
	c. The General Systems: mutual recognition helped by procedural	
	harmonization	240
	4. Network industries: sector-specific liberalization rules	243
	a. General characteristics	243
	b. Regulatory approach	245
	5. IT Directives: internal market clauses	253
	6. The Services Directive: regulatory reform and administrative	0.55
	cooperation	257
	a. Substance	259
	b. Procedure	260
	c. Tentative assessment of the impact of the Services Directive	264
	B. Regulatory technique of legislative instruments—a normative	0.66
	approach	266
	1. Harmonization	267
	a. Is harmonization old-fashioned—destined to disappear?	268
	b. Full or partial harmonization?	269
	c. Harmonization and technology: neutrality v. promotion	260
	of standards	269
	d. Revision/report procedures	270
	e. Implementation  2. Mutual recognition (MD)	273 274
	<ol> <li>Mutual recognition (MR)</li> <li>a. Why services are different from goods concerning MR</li> </ol>	274
	b. How MR is organized in the field of services	280
	c. How win is organized in the steta of services c. How can MR become more efficient in the field of services	281
	C. Conclusion	286
	O. Conclusion	200
7.	Private Regulation	288
	A Brief introduction to private regulation	288

Bibliography 367	Contents	xxiii
1. Direct promotion a. Codes of conduct b. Standards and quality labels c. Corporate social responsibility d. Associations of undertakings 298 2. Indirect promotion 299 C. Controlling private regulation 1. Public involvement increasing the intensity of control over private measures 301 a. Private measures 301 b. Public involvement increasing the intensity of control over private measures under the realm of internal market rules b. Public measures scrutinized under the competition rules 2. Public involvement excluding private measures from any control D. Conclusion 307 8. Non-legislative Means of EU Regulation 309 A. Open Methods of Coordination (OMCs) 1. OMCs in the field of services 311 2. Evaluation of OMCs in the field of services 312 3. Evaluation of of Services 314 B. Agencies 1. Agencies in the field of services 315 a. General agencies 316 b. Executive agencies 22 c. Evaluation of agencies in the field of services 322 c. Networking 1. Networks in the field of services 322 c. Networking 1. Networks in the field of services 323 d. New governance in Services: an Outlook 332 A. New governance and better regulation—taking stock 332 B. Future outlook 4. New governance in Services: an Outlook 332 A. New governance and better regulation—taking stock 333 A. RIA as a solution b. RIA as a problem 340 2. 'Hybrid' legislation—the use of soft law 44 10. Conclusion: Future Directions—Towards 'Intermodal Homogeneity'? A. General characteristics of EU regulation of services 351 B. Cross-border trade of services (mode 1 GATS) C. Movement of natural persons (mode 4 GATS) D. Consumption abroad (mode 2 GATS)  357  Appendix: Case Law Processed in the Spreadsheet 357  Bibliography 367	B. Promoting private regulation	293
a. Codes of conduct b. Standards and quality labels c. Corporate social responsibility d. Associations of undertakings 2. Indirect promotion 2. Indirect promotion 2. Public involvement increasing the intensity of control over private measures under the realm of internal market rules a. Private measures under the realm of internal market rules b. Public involvement excluding private measures from any control D. Conclusion  8. Non-legislative Means of EU Regulation 30. A. Open Methods of Coordination (OMCs) 1. OMCs in the field of services 2. Evaluation of OMCs in the field of services 31. Agencies 1. Agencies in the field of services 31. Agencies in the field of services 32. Evaluation of agencies in the field of services 32. Evaluation of agencies in the field of services 32. Evaluation of agencies in the field of services 32. Evaluation of agencies in the field of services 32. Evaluation of agencies in the field of services 32. Evaluation of better regulation—taking stock 32. Evaluation of networks in the field of services 32. Evaluation of networks in the field of services 32. Evaluation of better regulation—taking stock 33. A. New governance and better regulation—taking stock 33. B. Future outlook 33. A. RIA as a problem 34. Conclusion: Future Directions—Towards 'Intermodal Homogeneity'? 34. General characteristics of EU regulation of services 35. C. Movement of natural persons (mode 4 GATS) 35. C. Movement of natural persons (mode 4 GATS) 35. C. Movement of natural persons (mode 4 GATS) 35. Appendix: Case Law Processed in the Spreadsheet 35. Bibliography 36.		293
b. Standards and quality labels c. Corporate social responsibility d. Associations of undertakings 2. Indirect promotion 2. Controlling private regulation 1. Public involvement increasing the intensity of control over private measures a. Private measures under the realm of internal market rules b. Public measures scrutinized under the competition rules 3. Public involvement excluding private measures from any control D. Conclusion 3. Non-legislative Means of EU Regulation 3. Open Methods of Coordination (OMCs) 1. OMCs in the field of services 2. Evaluation of OMCs in the field of services 3. 14 B. Agencies 1. Agencies in the field of services 3. 15 a. General agencies b. Executive agencies b. Executive agencies 1. Networks in the field of services 2. Evaluation of agencies in the field of services 3. 22 2. Evaluation of networks in the field of services 3. 23 C. Networking 3. 26 A. New governance and better regulation—taking stock 3. 32 B. Future outlook 3. 32 A. New governance and Better regulation—taking stock 3. 32 B. Future outlook 3. 33 A. RIA as a solution b. RIA as a problem 3. Agencies in ture Directions—Towards 'Intermodal Homogeneity'? 4. General characteristics of EU regulation of services 3. 54 Appendix: Case Law Processed in the Spreadsheet 3. 357 Bibliography 3. 367		
c. Corporate social responsibility d. Associations of undertakings 2. Indirect promotion 2. 1. Public involvement increasing the intensity of control over private measures a. Private measures a. Private measures under the realm of internal market rules b. Public involvement excluding private measures from any control b. Public involvement excluding private measures from any control D. Conclusion 307 8. Non-legislative Means of EU Regulation A. Open Methods of Coordination (OMCs) 1. OMCs in the field of services 2. Evaluation of OMCs in the field of services 314 2. Evaluation of OMCs in the field of services 315 316 317 318 319 329 320 320 321 321 322 323 323 324 325 325 326 327 327 327 327 328 329 329 329 320 320 320 320 320 320 321 322 323 323 324 325 326 327 327 327 327 328 329 329 329 320 320 320 320 320 321 322 323 323 324 325 326 327 327 327 327 328 329 329 329 320 320 320 320 320 321 322 323 324 325 326 327 327 327 327 328 329 329 329 320 320 320 320 320 321 322 323 324 325 326 327 327 327 327 327 327 328 329 329 329 320 320 320 320 320 320 320 321 322 323 323 324 324 325 326 327 327 327 327 328 329 329 329 320 320 320 320 320 320 320 320 320 320		
298 2. Indirect promotion 299 2. Indirect promotion 299 C. Controlling private regulation 300 1. Public involvement increasing the intensity of control over private measures 301 a. Private measures under the realm of internal market rules 301 b. Public involvement excluding private measures from any control 306 D. Conclusion 307 8. Non-legislative Means of EU Regulation 309 A. Open Methods of Coordination (OMCs) 311 1. OMCs in the field of services 312 2. Evaluation of OMCs in the field of services 314 B. Agencies 316 1. Agencies 316 1. Agencies 319 a. General agencies 319 b. Executive agencies 322 C. Evaluation of agencies in the field of services 323 C. Networking 326 C. Networking 326 1. Networks in the field of services 327 2. Evaluation of networks in the field of services 329 9. Old v. New Governance in Services: an Outlook 332 A. New governance and better regulation—taking stock 332 B. Future outlook 337 1. Evaluation of better regulation and Regulatory Impact Assessment (RIA) 337 a. RIA as a solution 338 b. RIA as a solution 338 b. RIA as a problem 340 2. 'Hybrid' legislation—the use of soft law 344 10. Conclusion: Future Directions—Towards 'Intermodal Homogeneity'? 351 A. General characteristics of EU regulation of services 351 B. Cross-border trade of services (mode 1 GATS) 353 C. Movement of natural persons (mode 4 GATS) 354 Appendix: Case Law Processed in the Spreadsheet 356 Bibliography 367		
2. Indirect promotion C. Controlling private regulation 1. Public involvement increasing the intensity of control over private measures a. Private measures under the realm of internal market rules b. Public measures scrutinized under the competition rules 2. Public involvement excluding private measures from any control D. Conclusion 307 8. Non-legislative Means of EU Regulation 309 A. Open Methods of Coordination (OMCs) 1. OMCs in the field of services 2. Evaluation of OMCs in the field of services 314 B. Agencies 1. Agencies 315 1. Agencies in the field of services 316 2. Evaluation of agencies 317 322 323 324 325 326 327 327 328 329 9. Old v. New Governance in Services: an Outlook 332 A. New governance and better regulation—taking stock 332 B. Future outlook 332 A. New governance and better regulation—taking stock 333 B. Future outlook 334 A. RIA as a solution b. RIA as a problem 2. 'Hybrid' legislation—the use of soft law 400 Conclusion: Future Directions—Towards 'Intermodal Homogeneity'? A. General characteristics of EU regulation of services 354 Appendix: Case Law Processed in the Spreadsheet 356 Bibliography 367		
C. Controlling private regulation 1. Public involvement increasing the intensity of control over private measures a. Private measures under the realm of internal market rules 301 b. Public measures scrutinized under the competition rules 2. Public involvement excluding private measures from any control D. Conclusion 307 8. Non-legislative Means of EU Regulation 309 A. Open Methods of Coordination (OMCs) 1. OMCs in the field of services 2. Evaluation of OMCs in the field of services 312 2. Evaluation of OMCs in the field of services 314 B. Agencies 1. Agencies in the field of services 315 a. General agencies b. Executive agencies b. Executive agencies 2. Evaluation of agencies in the field of services 322 c. Networking 1. Networks in the field of services 323 c. Networks in the field of services 324 2. Evaluation of networks in the field of services 325 9. Old v. New Governance in Services: an Outlook 332 A. New governance and better regulation—taking stock 332 B. Future outlook 1. Evaluation of better regulation and Regulatory Impact Assessment (RIA) a. RIA as a solution b. RIA as a problem 2. 'Hybrid' legislation—the use of soft law 400 Conclusion: Future Directions—Towards 'Intermodal Homogeneity'? A. General characteristics of EU regulation of services 351 B. Cross-border trade of services (mode 1 GATS) 354 Appendix: Case Law Processed in the Spreadsheet 357 Bibliography 367		
1. Public involvement increasing the intensity of control over private measures 301  a. Private measures under the realm of internal market rules 303  2. Public involvement excluding private measures from any control 306  D. Conclusion 307  8. Non-legislative Means of EU Regulation 309  A. Open Methods of Coordination (OMCs) 311  1. OMCs in the field of services 312  2. Evaluation of OMCs in the field of services 314  B. Agencies 316  1. Agencies 316  1. Agencies 319  a. General agencies 322  2. Evaluation of agencies in the field of services 323  C. Networking 326  1. Networks in the field of services 327  2. Evaluation of networks in the field of services 329  9. Old v. New Governance in Services: an Outlook 332  A. New governance and better regulation—taking stock 332  B. Future outlook 337  a. RIA as a solution 337  a. RIA as a solution 338  b. RIA as a problem 340  2. 'Hybrid' legislation—the use of soft law 344  10. Conclusion: Future Directions—Towards 'Intermodal Homogeneity'? 351  A. General characteristics of EU regulation of services 351  B. Cross-border trade of services (mode 1 GATS) 354  Appendix: Case Law Processed in the Spreadsheet 357  Bibliography 367		
private measures a. Private measures under the realm of internal market rules b. Public measures scrutinized under the competition rules 2. Public involvement excluding private measures from any control 306 D. Conclusion 307 8. Non-legislative Means of EU Regulation 309 A. Open Methods of Coordination (OMCs) 1. OMCs in the field of services 2. Evaluation of OMCs in the field of services 314 B. Agencies 315 1. Agencies in the field of services 316 2. Evaluation of OMCs in the field of services 319 a. General agencies b. Executive agencies b. Executive agencies 1. Networks in the field of services 2. Evaluation of agencies in the field of services 322 C. Networking 326 1. Networks in the field of services 327 2. Evaluation of networks in the field of services 329 9. Old v. New Governance in Services: an Outlook 332 A. New governance and better regulation—taking stock 332 B. Future outlook 337 a. RIA as a solution b. RIA as a problem 2. 'Hybrid' legislation—the use of soft law 340 2. 'Hybrid' legislation—the use of soft law 341 10. Conclusion: Future Directions—Towards 'Intermodal Homogeneity'? A. General characteristics of EU regulation of services B. Cross-border trade of services (mode 1 GATS) C. Movement of natural persons (mode 4 GATS) 354  Appendix: Case Law Processed in the Spreadsheet 357  Bibliography 367		
a. Private measures under the realm of internal market rules b. Public measures scrutinized under the competition rules 2. Public involvement excluding private measures from any control D.
