

Table of Contents

Preface

vii

1 Introduction

1

- 1.1 Philosophy 1
- 1.2 From philosophy to physics 5
- 1.3 From physics to information theory 10

2 Classical Entropy

21

- 2.1 Basic properties of information 21
- 2.2 Axioms without probability 25
- 2.3 Dimension of information 30
- 2.4 Information gain and mutual information 33
- 2.5 Coarse graining and sufficiency 41
- 2.6 Examples 43
- 2.7 Incomplete observables and Rényi's entropies 51
- 2.8 Weighted entropy 56
- 2.9 Recapitulation and extensions 58

3 Quantum Entropy and Quantum Channel

61

- 3.1 Entropy of density operators 61
- 3.2 Entropy in C^* -systems 65
- 3.3 Relative entropy 70
- 3.4 Channel and lifting 73
- 3.5 Mutual entropy 76
- 3.6 Applications 81
- 3.7 Dynamical change of entropy 92
- 3.8 Entropy production 100

4 Information Dynamics

105

- 4.1 Information Dynamics 105
- 4.2 Example of Complexities 109
- 4.3 Entropic complexity in QGS 113
- 4.4 KS-type complexities 114
- 4.5 Some model computations 118

5	Information Thermodynamics I	121
5.1	Complete and incomplete measurement	121
5.2	Convex properties of entropy	124
5.3	The principle of maximum entropy	126
5.4	Foundations of information thermodynamics	129
5.5	Information thermodynamics of equilibrium	130
5.6	Physical discussion and Q-entropy	133
5.7	Self-organization and biology	137
5.8	Evaluation of the partition function	141
5.9	Higher-order states and the thermodynamical limit	149
5.10	Simple examples and generalized thermodynamic limits	152
5.11	An empirical linguistic example	162
6	Information Thermodynamics II	165
6.1	Isoentropic motions	165
6.2	Estimation of observables	169
6.3	The estimation of Hamiltonian and isoentropic motion	170
6.4	Mean field method and A-isoentropic motions	173
6.5	Application to the system of N fermions	175
6.6	Fermi field	186
7	Open Systems	195
7.1	Positive dynamical semigroups	195
7.2	Completely positive dynamical semigroups	198
7.3	Diffusion processes on groups	204
7.4	Comments and examples	209
7.5	Detailed balance	216
7.6	Reduced dynamics	219
7.7	Remarks	227
8	Fractals with Information	229
8.1	What is a fractal?	229
8.2	Fractal dimensions and their properties	232
8.3	Fractal dimensions of states	244
8.3.1	General formulation of the fractal dimension of states	244
8.3.2	Fractal dimensions of states in discrete CDS	246
8.3.3	Fractal dimensions of states in continuous CDS	249
Appendix 1		263
Appendix 2		277
Bibliography		287
Index		301
