## Chapter 1

### Systems of Measurement 1

1-1 Units 2

1-2 Conversion of Units 4

1-3 Dimensions of Physical Quantities 5

1-4 Scientific Notation 6

1-5 Significant Figures and Orders of Magnitude 7

Summary 10

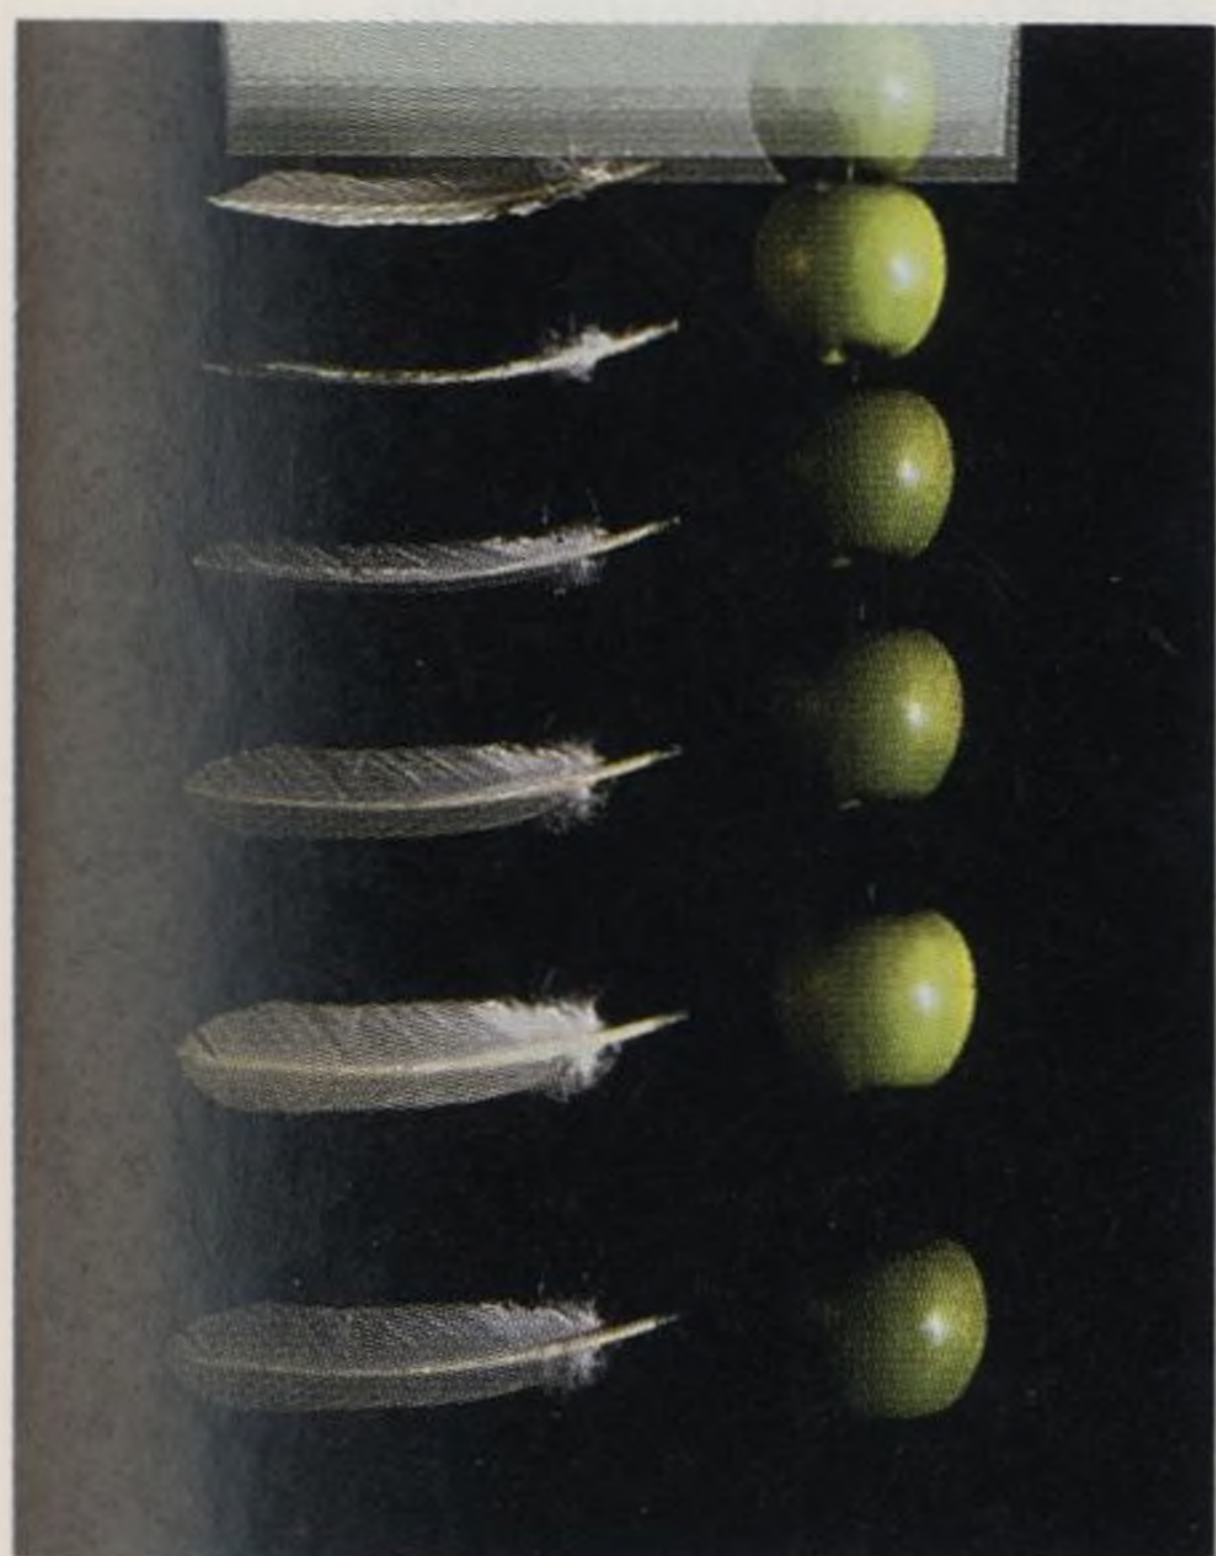

*Essay* Hans Christian von Baeyer, *The Fermi Solution* 11

Suggestions for Further Reading, Review, Problems 15

## Part 1

## Mechanics 19

---

## Chapter 2

### Motion in One Dimension 20

2-1 Speed, Displacement, and Velocity 21

2-2 Instantaneous Velocity 24

2-3 Acceleration 28

2-4 Motion with Constant Acceleration 30

2-5 Integration 37

Summary 39

Suggestions for Further Reading, Review, Problems 40

## Chapter 3

### Motion in Two and Three Dimensions 47

3-1 The Displacement Vector and Vector Addition 48

3-2 Addition of Vectors by Components 50

3-3 Unit Vectors and Multiplication of Vectors by Scalars 53

3-4 The Velocity Vector 54

3-5 The Acceleration Vector 56

3-6 Relative Velocity 57

3-7 Projectile Motion 58

3-8 Circular Motion 65

Summary 69

Suggestions for Further Reading, Review, Problems 70

**Chapter 4****Newton's Laws I 77**

- 4-1 Newton's First Law: The Law of Inertia 78
- 4-2 Force, Mass, and Newton's Second Law 80
- 4-3 The Force Due to Gravity: Weight 83
- 4-4 Newton's Third Law 86
- 4-5 Forces in Nature 88
- 4-6 Applications to Problem Solving 92
- Summary 99
- Suggestions for Further Reading, Review, Problems 100

**Chapter 5****Newton's Laws II 107**

- 5-1 Friction 107
- 5-2 Drag Forces 116
- 5-3 Problems with Two or More Objects 117
- 5-4 Pseudoforces 121
- 5-5 Numerical Methods 124
- Summary 127
- Suggestions for Further Reading, Review, Problems 128

**Chapter 6****Work and Energy 135**

- 6-1 Work and Kinetic Energy: Motion in One Dimension with Constant Forces 136
- 6-2 Work Done by a Variable Force 140
- 6-3 Work and Energy in Three Dimensions and the Dot Product 143
- 6-4 Work and Energy for Particle Systems: Potential Energy 148
- 6-5 Potential Energy and Equilibrium in One Dimension 152
- 6-6 The Conservation of Mechanical Energy 155
- 6-7 The Generalized Work–Energy Theorem 161
- 6-8 The Conservation of Energy 166
- 6-9 Power 169
- Summary 171
- Suggestions for Further Reading, Review, Problems 173

**Chapter 7****Systems of Particles and the Conservation of Momentum 182**

- 7-1 The Center of Mass 183
- 7-2 Motion of the Center of Mass of a System 187
- 7-3 The Conservation of Momentum 190
- 7-4 The Center-of-Mass Reference Frame 194
- 7-5 Kinetic Energy of a System of Particles 195
- 7-6 Collisions in One Dimension 198

7-7	Collisions in Three Dimensions	206
7-8	Impulse and Time Average of a Force	210
7-9	Jet Propulsion	213
	Summary	216
	<i>Essay</i> Ralph A. Llewellyn, <i>Discovery of the Neutrino</i>	218
	Suggestions for Further Reading, Review, Problems	221

## Chapter 8

### Rotation 227

8-1	Angular Velocity and Angular Acceleration	228
8-2	Torque and Moment of Inertia	231
8-3	Rotational Kinetic Energy	236
8-4	Calculating the Moment of Inertia	238
8-5	Angular Momentum	242
8-6	Rolling Objects	249
8-7	The Vector Nature of Rotation and the Cross Product	255
8-8	Motion of a Gyroscope	260
8-9	Static and Dynamic Imbalance	262
	Summary	263
	Suggestions for Further Reading, Review, Problems	265

## Chapter 9

### Static Equilibrium of a Rigid Body 275

9-1	Conditions for Equilibrium	275
9-2	The Center of Gravity	278
9-3	Some Examples of Static Equilibrium	280
9-4	Couples	284
9-5	Stability of Equilibrium	285
	Summary	287
	Suggestions for Further Reading, Review, Problems	288

## Chapter 10

### Gravity 295

10-1	Kepler's Laws	295
10-2	Newton's Law of Gravity	299
10-3	Measurement of the Universal Gravitational Constant	305
10-4	Gravitational and Inertial Mass	307
10-5	Escaping the Earth	308
10-6	Potential Energy, Total Energy, and Orbits	313
10-7	The Gravitational Field of a Spherical Shell and a Solid Sphere	316
	Summary	320
	<i>Essay</i> A. P. French, <i>Isaac Newton (1642–1727)</i>	322
	Suggestions for Further Reading, Review, Problems	326

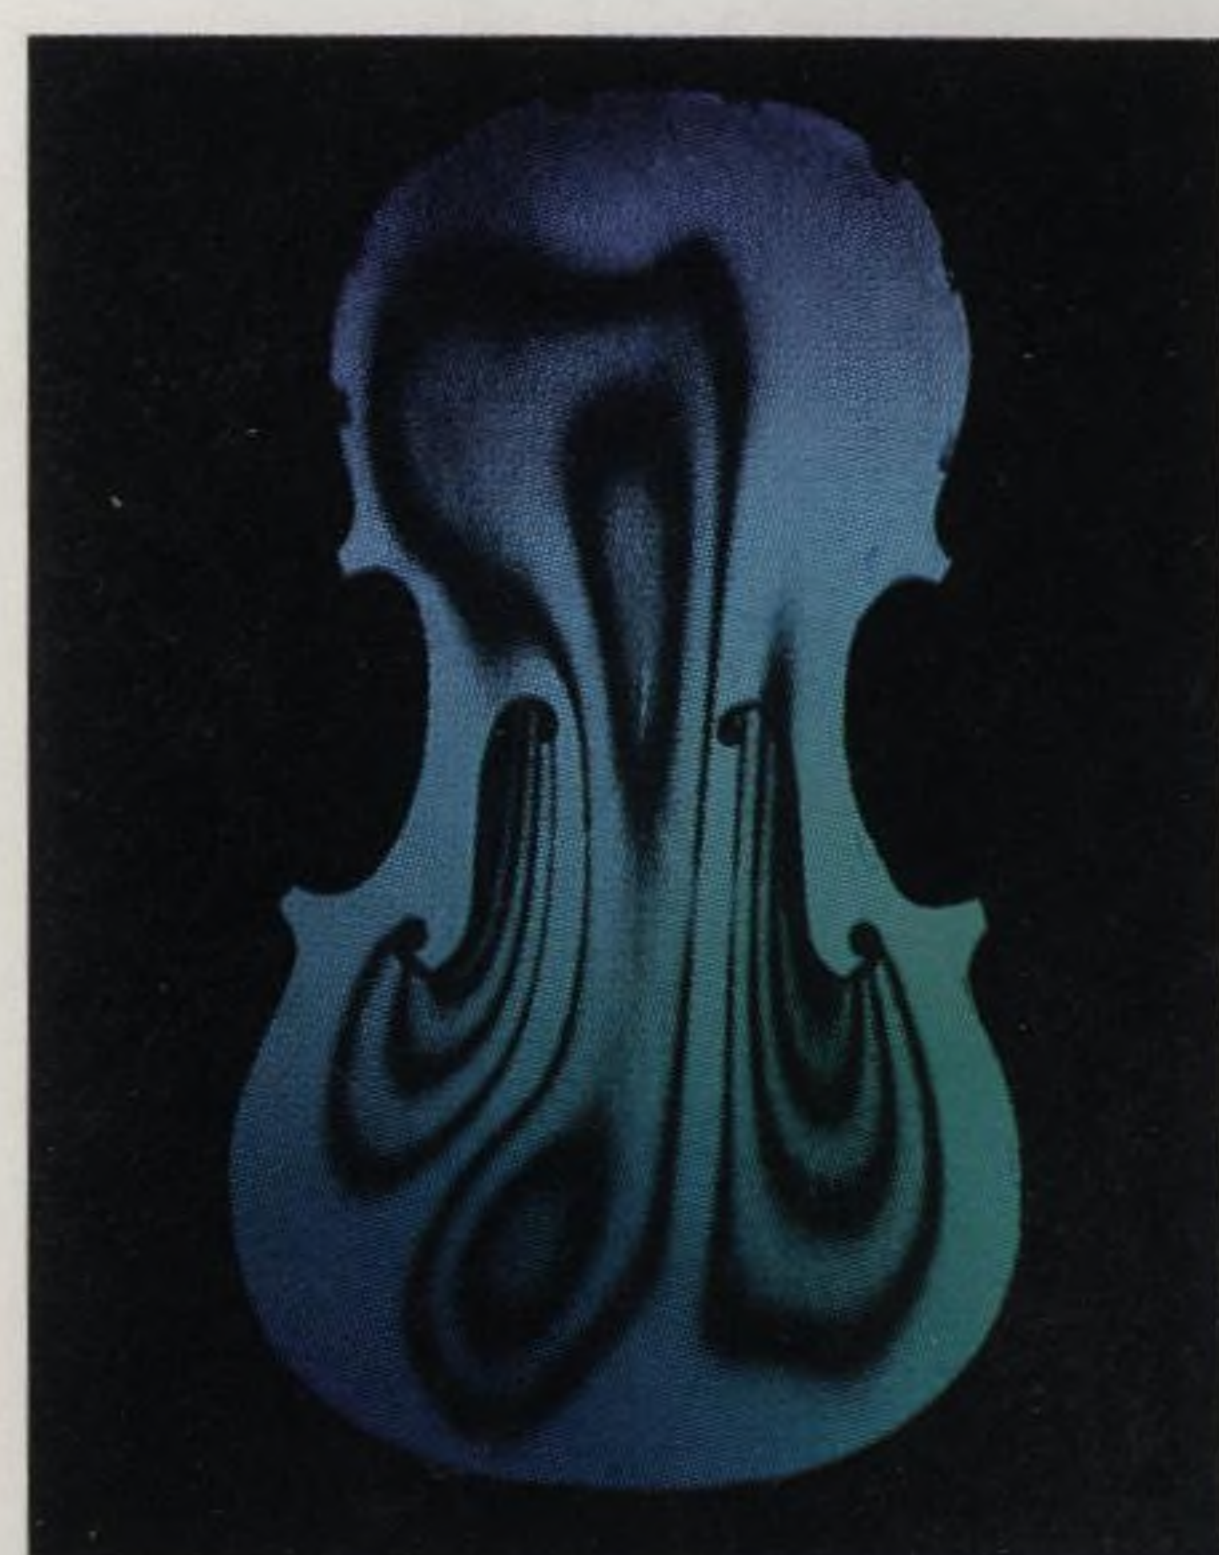

**Chapter 11****Mechanics of Solids and Fluids 331**

- 11-1 Density 331
- 11-2 Stress and Strain 333
- 11-3 Pressure in a Fluid 336
- 11-4 Buoyancy and Archimedes' Principle 340
- 11-5 Surface Tension and Capillarity 344
- 11-6 Fluids in Motion and Bernoulli's Equation 346
- 11-7 Viscous Flow 351

Summary 354

*Essay* Robert G. Hunt, *Aerodynamics of Bicycling* 356

Suggestions for Further Reading, Review, Problems 360

**Part 2****Oscillations and Waves 367****Chapter 12****Oscillations 368**

- 12-1 Simple Harmonic Motion: A Mass on a Spring 369
- 12-2 Simple Harmonic Motion and Circular Motion 376
- 12-3 Energy in Simple Harmonic Motion 377
- 12-4 An Object on a Vertical Spring 380
- 12-5 Pendulums 382
- 12-6 General Motion near Equilibrium 386
- 12-7 Damped Oscillations 388
- 12-8 Driven Oscillations and Resonance 392

Summary 395

*Essay* James S. Walker, *Chaos: An Orderly Disorder* 397

Suggestions for Further Reading, Review, Problems 403

**Chapter 13****Waves on a String 409**

- 13-1 Wave Pulses 410
- 13-2 Speed of Waves 414
- 13-3 Harmonic Waves 416
- 13-4 Energy Transmitted by Waves 417
- 13-5 Superposition and Interference of Harmonic Waves 419
- 13-6 Standing Waves 420
- 13-7 The Superposition of Standing Waves 427
- 13-8 The Wave Equation (Optional) 429

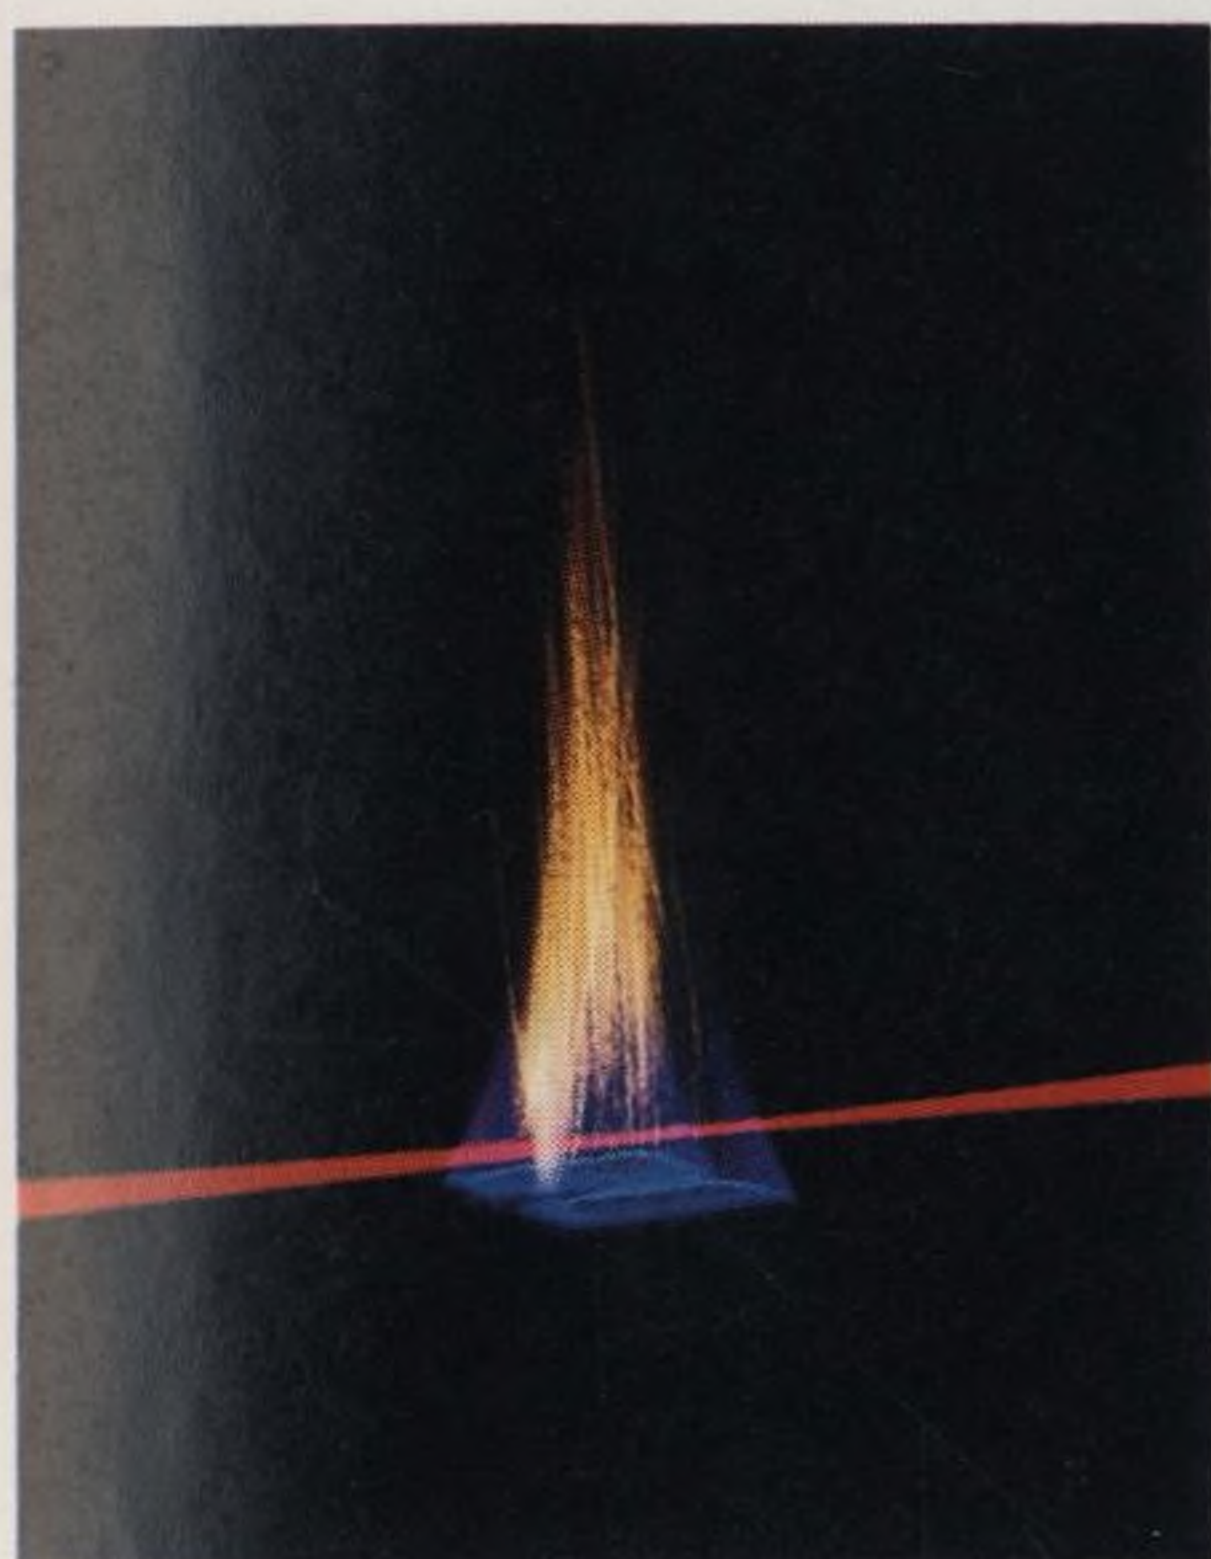

Summary 431

Suggestions for Further Reading, Review, Problems 433

**Chapter 14****Sound 439**

- 14-1 Speed of Sound Waves 440
- 14-2 Harmonic Sound Waves 442
- 14-3 Waves in Three Dimensions: Intensity 445
- 14-4 Interference: Beats 449
- 14-5 Standing Sound Waves 454
- 14-6 Harmonic Analysis and Synthesis 458
- 14-7 Wave Packets and Dispersion 460
- 14-8 Reflection, Refraction, and Diffraction 461
- 14-9 The Doppler Effect 464
- Summary 469
- Essay* Jack L. Flinner, *Seismic Waves* 472
- Suggestions for Further Reading, Review, Problems 477

**Part 3****Thermodynamics 485****Chapter 15****Temperature 486**

- 15-1 The Celsius and Fahrenheit Temperature Scales 487
- 15-2 Gas Thermometers and the Absolute Temperature Scale 490
- 15-3 Thermal Expansion 493
- 15-4 The Ideal-Gas Law 496
- 15-5 The Molecular Interpretation of Temperature: The Kinetic Theory of Gases 500
- 15-6 The van der Waals Equation and Liquid–Vapor Isotherms 506
- 15-7 Phase Diagrams 508
- Summary 511
- Suggestions for Further Reading, Review, Problems 512

**Chapter 16****Heat and the First Law of Thermodynamics 517**

- 16-1 Heat Capacity and Specific Heat 518
- 16-2 Change of Phase and Latent Heat 522
- 16-3 The Transfer of Thermal Energy 525
- 16-4 The First Law of Thermodynamics 534
- 16-5 The Internal Energy of an Ideal Gas 537
- 16-6 Work and the  $PV$  Diagram for a Gas 539
- 16-7 Heat Capacities and the Equipartition Theorem 542
- 16-8 Quasi-Static Adiabatic Expansion of a Gas 547
- Summary 550

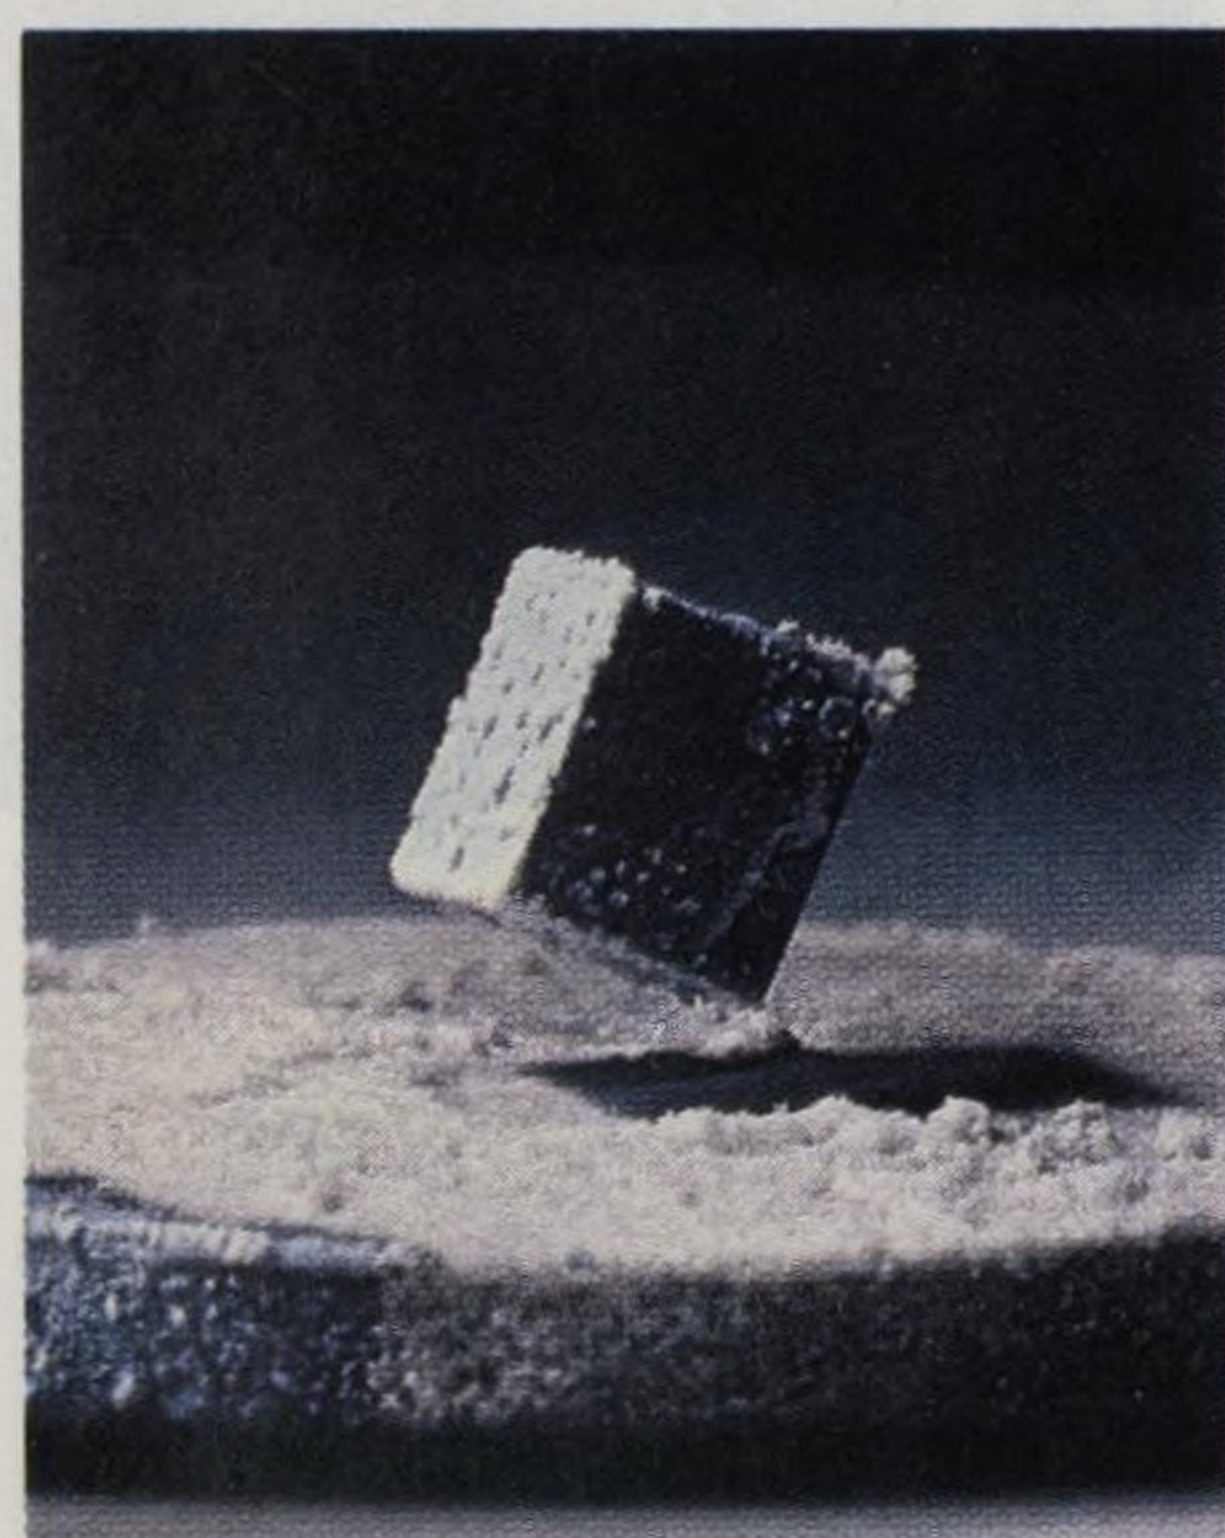

<i>Essay</i> Jerrold H. Krenz, <i>The Earth's Energy Balance and Global Warming</i>	553
Suggestions for Further Reading, Review, Problems	557

## Chapter 17

<b>The Availability of Energy</b>	563
17-1 Heat Engines and the Second Law of Thermodynamics	564
17-2 Refrigerators and the Second Law of Thermodynamics	568
17-3 Equivalence of the Heat-Engine and Refrigerator Statements	569
17-4 The Carnot Engine	569
17-5 The Heat Pump	575
17-6 Entropy and Disorder	576
17-7 Entropy and Probability	582
Summary	584
<i>Essay</i> Albert A. Bartlett, <i>Exponential Growth and Decay</i>	586
Suggestions for Further Reading, Review, Problems	590

## Part 4

## Electricity and Magnetism 597

### Chapter 18

<b>The Electric Field I: Discrete Charge Distributions</b>	598
18-1 Electric Charge	599
18-2 Conductors and Insulators and Charging by Induction	601
18-3 Coulomb's Law	603
18-4 The Electric Field	607
18-5 Electric-Field Lines	612
18-6 Motion of Point Charges in Electric Fields	614
18-7 Electric Dipoles in Electric Fields	616
Summary	618
Suggestions for Further Reading, Review, Problems	619

### Chapter 19

<b>The Electric Field II: Continuous Charge Distributions</b>	624
19-1 Calculation of the Electric Field from Coulomb's Law	625
19-2 Gauss's Law	631
19-3 Calculation of the Electric Field from Gauss's Law	635
19-4 Charge and Field at Conductor Surfaces	644
19-5 Mathematical Derivation of Gauss's Law (Optional)	649
Summary	650
Suggestions for Further Reading, Review, Problems	651

**Chapter 20****Electric Potential 656**

- 20-1 Electric Potential and Potential Difference 657
- 20-2 Potential Due to a System of Point Charges 660
- 20-3 Electrostatic Potential Energy 664
- 20-4 Calculation of Electric Potential for Continuous Charge Distributions 665
- 20-5 Electric Field and Potential 671
- 20-6 Equipotential Surfaces, Charge Sharing, and Dielectric Breakdown 674
- Summary 680
- Essay* Richard Zallen, *Electrostatics and Xerography* 682
- Suggestions for Further Reading, Review, Problems 685

**Chapter 21****Capacitance, Dielectrics and Electrostatic Energy 690**

- 21-1 The Parallel-Plate Capacitor 691
- 21-2 The Cylindrical Capacitor 693
- 21-3 Dielectrics 694
- 21-4 The Storage of Electrical Energy 698
- 21-5 Combinations of Capacitors 702
- Summary 708
- Suggestions for Further Reading, Review, Problems 709

**Chapter 22****Electric Current 716**

- 22-1 Current and Motion of Charges 716
- 22-2 Resistance and Ohm's Law 720
- 22-3 Energy in Electric Circuits 725
- 22-4 Combinations of Resistors 731
- 22-5 A Microscopic Picture of Conduction 735
- Summary 738
- Essay* Elizabeth Pflegl Nickles, *Conduction in Nerve Cells* 740
- Suggestions for Further Reading, Review, Problems 744

**Chapter 23****Direct-Current Circuits 749**

- 23-1 Kirchhoff's Rules 750
- 23-2 RC Circuits 760
- 23-3 Ammeters, Voltmeters, and Ohmmeters 767
- Summary 772
- Suggestions for Further Reading, Review, Problems 773

**Chapter 24****The Magnetic Field 781**

- 24-1 The Force Exerted by a Magnetic Field 782
- 24-2 Motion of a Point Charge in a Magnetic Field 787
- 24-3 Torques on Current Loops and Magnets 798
- 24-4 The Hall Effect 801
- Summary 804
- Suggestions for Further Reading, Review, Problems 806

**Chapter 25****Sources of the Magnetic Field 811**

- 25-1 The Magnetic Field of Moving Point Charges 812
- 25-2 The Magnetic Field of Currents: The Biot–Savart Law 815
- 25-3 Definition of the Ampere 826
- 25-4 Ampère’s Law 828
- Summary 832
- Suggestions for Further Reading, Review, Problems 833

**Chapter 26****Magnetic Induction 840**

- 26-1 Magnetic Flux 841
- 26-2 Induced Emf and Faraday’s Law 843
- 26-3 Lenz’s Law 846
- 26-4 Motional Emf 848
- 26-5 Eddy Currents 852
- 26-6 Generators and Motors 854
- 26-7 Inductance 857
- 26-8 LR Circuits 859
- 26-9 Magnetic Energy 862
- Summary 864
- Essay* Syun-Ichi Akasofu, *The Aurora* 866
- Suggestions for Further Reading, Review, Problems 871

**Chapter 27****Magnetism in Matter 878**

- 27-1 Magnetization and Magnetic Susceptibility 879
- 27-2 Atomic Magnetic Moments 882
- 27-3 Paramagnetism 884
- 27-4 Ferromagnetism 886
- 27-5 Diamagnetism 890
- Summary 892
- Suggestions for Further Reading, Review, Problems 894

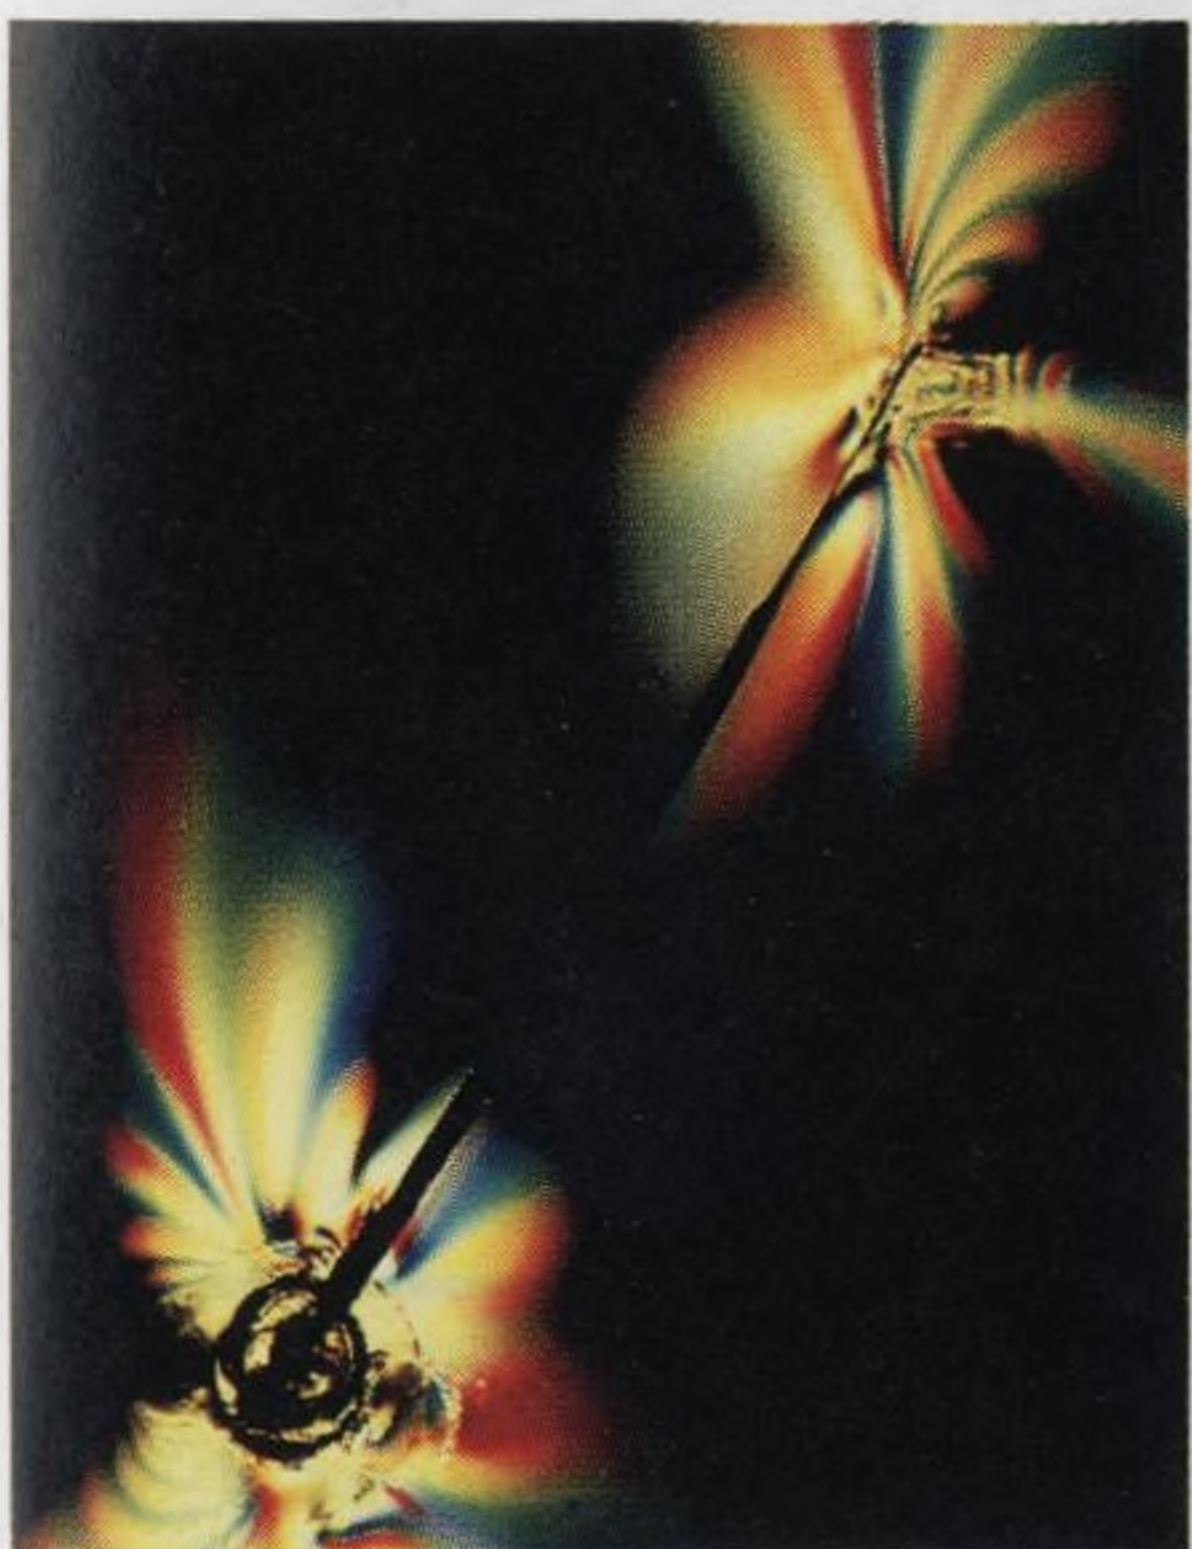

**Chapter 28****Alternating-Current Circuits 898**

- 28-1 Alternating Current in a Resistor 899
- 28-2 Alternating Current in Inductors and Capacitors 902
- 28-3 Phasors 907
- 28-4 LC and LCR Circuits Without a Generator 908
- 28-5 LCR Circuits with a Generator 912
- 28-6 The Transformer 920
- 28-7 Rectification and Amplification 923
- Summary 927
- Essay* John Dentler, *Electric Motors* 929
- Suggestions for Further Reading, Review, Problems 937

**Chapter 29****Maxwell's Equations and Electromagnetic Waves 943**

- 29-1 Maxwell's Displacement Current 944
- 29-2 Maxwell's Equations 947
- 29-3 The Wave Equation for Electromagnetic Waves (Optional) 947
- 29-4 Energy and Momentum in an Electromagnetic Wave 953
- 29-5 The Electromagnetic Spectrum 957
- Summary 962
- Essay* C. W. F. Everitt, *James Clerk Maxwell (1831–1879)* 964
- Suggestions for Further Reading, Review, Problems 967

**Part 5****Optics 973****Chapter 30****Light 974**

- 30-1 The Speed of Light 976
- 30-2 The Propagation of Light: Huygens' Principle 981
- 30-3 Reflection 982
- 30-4 Refraction 985
- 30-5 Fermat's Principle 995
- 30-6 Polarization 997
- Summary 1003
- Essay* Robert Greenler, *Beyond the (Visible) Rainbow* 1004
- Suggestions for Further Reading, Review, Problems 1007

**Chapter 31****Geometrical Optics 1012**

- 31-1 Plane Mirrors 1012
- 31-2 Spherical Mirrors 1015
- 31-3 Images Formed by Refraction 1022

31-4	Thin Lenses	1025
31-5	Aberrations	1034
	Summary	1035
	Suggestions for Further Reading, Review, Problems	1036

## Chapter 32

	Optical Instruments	1041
32-1	The Eye	1041
32-2	The Simple Magnifier	1046
32-3	The Camera	1047
32-4	The Compound Microscope	1050
32-5	The Telescope	1052
	Summary	1056
	Suggestions for Further Reading, Review, Problems	1058

## Chapter 33

	Interference and Diffraction	1061
33-1	Phase Difference and Coherence	1061
33-2	Interference in Thin Films	1063
33-3	The Michelson Interferometer	1066
33-4	The Two-Slit Interference Pattern	1068
33-5	The Addition of Harmonic Waves Using Phasors	1071
33-6	Interference Pattern of Three or More Equally Spaced Sources	1073
33-7	Diffraction Pattern of a Single Slit	1076
33-8	Interference–Diffraction Pattern of Two Slits	1080
33-9	Fraunhofer and Fresnel Diffraction	1082
33-10	Diffraction and Resolution	1083
33-11	Diffraction Gratings	1085
	Summary	1090
	Suggestions for Further Reading, Review, Problems	1091

## Part 6

## Modern Physics 1099

## Chapter 34

	Relativity	1100
34-1	Newtonian Relativity	1101
34-2	The Michelson–Morley Experiment	1103
34-3	Einstein's Postulates	1106
34-4	The Lorentz Transformation	1107
34-5	Clock Synchronization and Simultaneity	1113
34-6	The Doppler Effect	1118
34-7	The Twin Paradox	1119

34-8	The Velocity Transformation	1122
34-9	Relativistic Momentum	1124
34-10	Relativistic Energy	1126
34-11	General Relativity	1132
	Summary	1135
	Suggestions for Further Reading, Review, Problems	1138

## Chapter 35

### The Origins of Quantum Theory 1145

35-1	The Origin of the Quantum Constant: Blackbody Radiation	1147
35-2	The Photoelectric Effect	1148
35-3	X Rays	1152
35-4	Compton Scattering	1154
35-5	Quantization of Atomic Energies: The Bohr Model	1156
35-6	Electron Waves and Quantum Theory	1161
	Summary	1166
	Suggestions for Further Reading, Review, Problems	1167

## Chapter 36

### Quantum Mechanics 1172

36-1	The Electron Wave Function	1173
36-2	Electron Wave Packets	1176
36-3	The Uncertainty Principle	1180
36-4	Wave-Particle Duality	1183
36-5	The Schrödinger Equation	1184
36-6	A Particle in a Box	1186
36-7	A Particle in a Finite Square Well	1192
36-8	Expectation Values	1196
36-9	Reflection and Transmission of Electron Waves: Barrier Penetration	1198
36-10	The Schrödinger Equation in Three Dimensions	1203
36-11	The Schrödinger Equation for Two Identical Particles	1204
	Summary	1206
	<i>Essay</i> Ellen D. Williams, <i>Scanning Tunneling Microscopy</i>	1209
	Suggestions for Further Reading, Review, Problems	1213

## Chapter 37

### Atoms 1218

37-1	Quantum Theory of the Hydrogen Atom	1219
37-2	The Hydrogen-Atom Wave Functions	1223
37-3	Magnetic Moments and Electron Spin	1227
37-4	The Stern-Gerlach Experiment	1229

37-5	Addition of Angular Momenta and the Spin-Orbit Effect	1231
37-6	The Periodic Table	1234
37-7	Optical and X-Ray Spectra	1239
37-8	Absorption, Scattering, and Stimulated Emission	1244
37-9	The Laser	1245
	Summary	1250
	<i>Essay</i> D. J. Wineland, <i>Trapped Atoms and Laser Cooling</i>	1252
	Suggestions for Further Reading, Review, Problems	1259

## Chapter 38

### Molecules 1263

38-1	Molecular Bonding	1264
38-2	Polyatomic Molecules	1271
38-3	Energy Levels and Spectra of Diatomic Molecules	1273
	Summary	1282
	Suggestions for Further Reading, Review, Problems	1283

## Chapter 39

### Solids 1286

39-1	The Structure of Solids	1286
39-2	The Classical Free-Electron Theory of Metals	1292
39-3	The Fermi Electron Gas	1293
39-4	Quantum Theory of Electrical Conduction	1298
39-5	Band Theory of Solids	1301
39-6	Impurity Semiconductors	1305
39-7	Semiconductor Junctions and Devices	1306
39-8	Superconductivity	1313
	Summary	1319
	<i>Essay</i> Samuel J. Williamson, <i>SQUIDS</i>	1322
	Suggestions for Further Reading, Review, Problems	1326

## Chapter 40

### Nuclei 1330

40-1	Properties of Nuclei	1331
40-2	Nuclear Magnetic Resonance	1336
40-3	Radioactivity	1338
40-4	Nuclear Reactions	1344
40-5	Fission, Fusion, and Nuclear Reactors	1347
40-6	The Interaction of Particles with Matter	1355
	Summary	1361
	Suggestions for Further Reading, Review, Problems	1362

**Chapter 41****Elementary Particles 1368**

41-1 Hadrons and Leptons 1369

41-2 Spin and Antiparticles 1372

41-3 The Conservation Laws 1375

41-4 The Quark Model 1378

41-5 Field Particles 1381

41-6 The Electroweak Theory 1382

41-7 The Standard Model 1382

41-8 Grand Unification Theories 1384

Summary 1384

Suggestions for Further Reading, Review, Problems 1385

**Chapter 42****Astrophysics and Cosmology 1389**

42-1 Our Star, the Sun 1390

42-2 The Stars 1396

42-3 The Evolution of Stars 1400

42-4 Cataclysmic Events 1403

42-5 Final States of Stars 1405

42-6 Galaxies 1408

42-7 Gravitation and Cosmology 1414

42-8 Cosmogenesis 1416

Summary 1421

Suggestions for Further Reading, Review, Problems 1422

**Appendix**

A Review of Mathematics AP-1

B SI Units AP-21

C Numerical Data AP-22

D Conversion Factors AP-25

E Periodic Table of the Elements AP-27

**Illustration Credits IC-1****Answers to True-False and Odd-Numbered Problems A-1****Index I-0**
