

13th IPSW Programme	4
Monday September 19th	4
Tuesday September 20th	5
Monday September 19th lecture schedule	6
IPSW 2022 – Content	9
Lecture 1: Parallel Hall 1 – Monday 9:15 – 9:40 Chemometers: an integrative tool for studying chemicals in biota and surrounding abiotic media	11
Lecture 2: Parallel Hall 1 – Monday 9:40 – 10:05 Calibration of fish bio model for PAHs water monitoring and bioaccumulation studies by implantation of silicone rubber membranes	14
Lecture 3: Parallel Hall 1 – Monday 10:05 – 10:30 Polyethersulfone membrane as a single-phase passive sampler for emerging contaminants in water	15
Lecture 4: Parallel Hall 1 – Monday 11:00 – 11:25 Using silicone rubbers for measuring textile permeability for organic pollutants	17
Lecture 5: Parallel Hall 1 – Monday 11:25 – 11:50 A Novel Composite Integrative Passive Sampler for Measuring Polar and Non-Polar Organic Chemicals in Water	18
Lecture 6: Parallel Hall 1 – Monday 11:50 – 12:15 Time-Integration in Equilibrium Passive Samplers: A Mathematical Modeling Approach	19
Lecture 7: Parallel Hall 1 – Monday 13:15 – 13:40 Developing a passive sampler for the uptake of very hydrophilic chemicals	20
Lecture 8: Parallel Hall 1 – Monday 13:40 – 14:05 Towards the acquisition of reliable mass transfer coefficients of the water boundary layer and the determination of site-specific sampling rates for hydrophilic passive samplers	21
Lecture 9: Parallel Hall 1 – Monday 14:05 – 14:30 Towards an Improved Chemcatcher-based Method for the Integrative Passive Sampling of Hydrophilic Micropollutants in Surface Water	22
Lecture 10: Parallel Hall 1 – Monday 15:00 – 15:25 Laboratory and field evaluation of Persistent and Mobile Organic contaminants (PMOC) partition coefficients with 8 different sorbents	23
Lecture 11: Parallel Hall 1 – Monday 15:25 – 15:50 Characterising equilibrium passive sampling of polar organic contaminants in water using extraction disks	24
Lecture 12: Parallel Hall 1 – Monday 15:50 – 16:15 Development and application of a membrane assisted solvent extraction-molecularly imprinted polymer based passive sampler for monitoring of selected pharmaceuticals in surface water	26
Lecture 13: Parallel Hall 2 – Monday 9:15 – 9:40 Summer to Winter in the River Wandle – a six-month temporal study using a multi-modal 3D printed miniaturised passive sampler..	27
Lecture 14: Parallel Hall 2 – Monday 9:40 – 10:05 Large-scale surveillance of hydrophobic contaminants in the Lake Geneva basin and investigation of pollution sources	28
Lecture 15: Parallel Hall 2 – Monday 10:05 – 10:30 Sampling contaminants in the Ligurian Sea using a POCIS-like sampler with a novel polyester membrane	29
Lecture 16: Parallel Hall 2 – Monday 11:00 – 11:25 Hands-on experience in application of passive sampling monitoring: the point of view of Environment Agency of Trento (Italy)	31
Lecture 17: Parallel Hall 2 – Monday 11:25 – 11:50 Passive sampling enabled detection of more pesticides than grab and event-driven sampling	33
Lecture 18: Parallel Hall 2 – Monday 11:50 – 12:15 Technical design and optimisation of semi up scaled polymer inclusion-based-passive sampler for value recovery of precious and	

semi-precious metals from mine wastewater	34
Lecture 19: Parallel Hall 2 – Monday 13:15 – 13:40 Occurrence and distribution of pesticides and pharmaceuticals in two chalk streams in the UK using the Chemcatcher passive sampler	35
Lecture 20: Parallel Hall 2 – Monday 13:40 – 14:05 Calibration of pesticides adsorbed on passive sampler (POCIS) deployed in a small Alpine stream	37
Lecture 21: Parallel Hall 2 – Monday 14:05 – 14:30 Combining passive sampling and non-targeted screening (NTS) for assessing PFAS contamination in groundwater	39
Lecture 22: Parallel Hall 2 – Monday 15:00 – 15:25 Quo Vadis POCIS? Examples of passive samplers exploitation for multiple purposes.	40
Lecture 23: Parallel Hall 2 – Monday 15:25 – 15:50 Passive sampling method for quantifying amphipod exposure to cationic surfactant in sediment toxicity test.....	42
Lecture 24: Parallel Hall 2 – Monday 15:50 – 16:15 Comparative Review of Passive Sampling to Conventional Metrics for Evaluating Sediment Remediation Efficacy	43
Posters list	44
Poster 1: Determination of emerging pollutants using passive microporous polyethylene samplers in L'Albufera Natural Park	45
Poster 2: SSP-M823 as an alternative method in Wallonia for fluoranthene, benzo[a]pyrene, hexachlorobenzene and PBDEs quality control strategy of surface water network	46
Poster 3: Performance comparison of three passive samplers for monitoring of polar organic contaminants in treated municipal wastewater	48
Poster 4: Passive Equilibrium Sampling of Biota with Low Lipid Content: Comparing Silicone Sheets and Silicone-Coated Vials	50
Poster 5: Improvement of the in situ monitoring of organic micropollutants in rivers: Efficiency of a Large o-DGT compared to the o-DGT and the POCIS	52
Poster 6: Synthesis and characterization of a non-oxyde Si-B-C porous membrane for DGT diffusive layer application	54
Poster 7: Investigation of emerging aquatic contaminants emissions in municipal wastewaters using passive sampling	56
Poster 8: Determination of pharmaceutical uptake rates in passive sampling.....	57
Poster 9: Estimation of glyphosate concentrations and mass loads from 15 wastewater treatment plants in Australia using passive samplers and time integrated composite samples	58
Poster 10: Monitoring polar organic micropollutants in Swiss rivers using passive sampling and LC-HRMS	59
Poster 11: Characterizing impacts of herbicides in lakes using passive samplers.....	60
Poster 12: P-LEACH: Leaching of plastic-associated chemicals in diverse media.....	61
Poster 13: Comparing Equilibrium Concentrations of PCBs based on Passive Sampling and Bioaccumulation in Water Column Deployments.....	63
Poster 14: Measuring 1,3-butadiene levels in ambient air using radial diffusive samplers filled with Carbopack X sorbent	64
Poster 15: Development and laboratory characterization of passive sampling method for amines in ambient air.....	65
Poster 16: Organic pollutants in the Arctic: characterization of contaminant patterns in lipid tissues of toothed whales using passive equilibrium sampling	66
Poster 17: Cross-site in-situ calibration and validation of a microporous polyethylene (MPT) passive sampler for monitoring per- and polyfluoroalkyl substances (PFASs) in wastewater	68
