Contents

Preface vii
Editor Biographies ix

Chapter 1 Role of AUTOSAR in Automotive Software Trends 1
P. Sivakumar, A. Pavithra, S. K. Somasundarum, P. K. Somanathan, and A. Manimuthu

Chapter 2 Use of Communication Protocols in Automotive Software Development Process 17
R. S. Sandhya Devi, P. Sivakumar, B. Vinoth Kumar, and A. D. Buvanesswaran

Chapter 3 Bootloader Design for Advanced Driver Assistance System 31
R. S. Sandhya Devi, B. Vinoth Kumar, P. Sivakumar, A. Neeraja Lakshmi, and R. Tripathy

Chapter 4 Advanced System Requirements for Automotive Automation 45
H. Suneeta, M. Manohar, and S. Harlapur

Chapter 5 Software Architecture for Autonomous Trouble Code Diagnostics in Smart Vehicles 73
R. Rajaguru, M. Mathankumar, T. Viswanathan, and M. Manimaran

Chapter 6 Automotive Grade Linux: An Open-Source Architecture for Connected Cars 91
P. Sivakumar, A. Neeraja Lakshmi, A. Angamuthu, R. S. Sandhya Devi, B. Vinoth Kumar, and S. Studener

Chapter 7 Edge Node Creation Using Edge Computing Tools for Automotive Applications 111
P. Sivakumar, S. Bharanidharan, A. Angamuthu, R. S. Sandhya Devi, B. Vinoth Kumar, and S. K. Somasundaram

Chapter 8 Nanosensors for Automotive Applications 125

M. Saravanan, E. Parthasarathy, J. Ajayan, and P. Mohankumar
