

CONTENTS

1 INTRODUCTION	7
2 CURRENT SITUATION OF THE STUDIED PROBLEM	9
2.1 Mineral fillers	9
2.2 Clay minerals	9
2.2.1 <i>Montorillonite</i>	10
2.2.2 <i>Clay surface modification</i>	11
2.3 Polymer nanocomposites	11
2.3.1 <i>Nanocomposite preparation</i>	12
2.3.2 <i>Mechanical properties</i>	12
2.3.3 <i>Barrier properties</i>	12
2.4 Gas diffusion	13
2.4.1 <i>Factors contributing to gas diffusion</i>	14
2.5 Elastomer - refrigerant compatibility	14
3 THE AIMS OF RESEARCH WORK	15
4 METHODS OF INVESTIGATION	16
4.1 Test methods	16
4.2 Materials	17
4.3 Preparation of rubber compounds	17
4.4 Vulcanization of rubber compounds	18
5 MAIN RESULTS OF INVESTIGATION	18
5.1 Nanoclays performance investigation	19
5.1.1 <i>Tensile stress-strain and hardness testing</i>	19
5.1.2 <i>Barrier properties</i>	19
5.1.3 <i>XRD analysis</i>	20
5.1.4 <i>FT-IR analysis</i>	20
5.1.5 <i>TEM analysis</i>	21
5.1.6 <i>Summary</i>	21
5.2 Nanoclay / silica mixture optimization	22
5.2.1 <i>Tensile stress-strain and hardness testing</i>	22
5.2.2 <i>Barrier properties</i>	23
5.2.3 <i>XRD analysis</i>	23
5.2.4 <i>TEM analysis</i>	25
5.2.5 <i>Summary</i>	27
5.3 Investigation of silica and influence of viscosity on nanoclay intercalation	27
5.3.1 <i>Rubber compound composition</i>	27
5.3.2 <i>XRD analysis</i>	28
5.3.3 <i>Summary</i>	29
6 CONCLUSION	29

7 THESIS CONTRIBUTION TO SCIENCE AND INDUSTRY APPLICATION.....	30
REFERENCES.....	31
LIST OF FIGURES.....	35
LIST OF TABLES.....	35
PUBLICATION.....	36
CURRICULUM VITAE.....	37
