

Contents at a Glance

Introduction	1
Part 1: Introducing AI	7
CHAPTER 1: Introducing AI	9
CHAPTER 2: Defining the Role of Data	25
CHAPTER 3: Considering the Use of Algorithms	49
CHAPTER 4: Pioneering Specialized Hardware	67
Part 2: Considering the Uses of AI in Society	83
CHAPTER 5: Seeing AI Uses in Computer Applications	85
CHAPTER 6: Automating Common Processes	97
CHAPTER 7: Using AI to Address Medical Needs	107
CHAPTER 8: Relying on AI to Improve Human Interaction	127
Part 3: Working with Software-Based AI Applications	139
CHAPTER 9: Performing Data Analysis for AI	141
CHAPTER 10: Employing Machine Learning in AI	155
CHAPTER 11: Improving AI with Deep Learning	175
Part 4: Working with AI in Hardware Applications	207
CHAPTER 12: Developing Robots	209
CHAPTER 13: Flying with Drones	223
CHAPTER 14: Utilizing the AI-Driven Car	237
Part 5: Considering the Future of AI	257
CHAPTER 15: Understanding the Nonstarter Application	259
CHAPTER 16: Seeing AI in Space	273
CHAPTER 17: Engaging in Human Endeavors	287
Part 6: The Part of Tens	301
CHAPTER 18: Ten Occupational Categories that AI Can't Replace	303
CHAPTER 19: Ten Substantial Contributions of AI to Society	311
CHAPTER 20: Ten Ways in Which AI Has Failed	319
Index	327

Table of Contents

INTRODUCTION	1
About This Book	2
Icons Used in This Book	3
Beyond the Book	4
Where to Go from Here	5
PART 1: INTRODUCING AI	7
CHAPTER 1: Introducing AI	9
Defining the Term AI	10
Discerning intelligence	10
Discovering four ways to define AI	11
Understanding the History of AI	17
Starting with symbolic logic at Dartmouth	17
Continuing with expert systems	18
Overcoming the AI winters	19
Considering AI Uses	20
Avoiding AI Hype and Overestimation	21
Defining the five tribes and the master algorithm	21
Considering sources of hype	22
Understanding user overestimation	23
Connecting AI to the Underlying Computer	23
CHAPTER 2: Defining the Role of Data	25
Finding Data Ubiquitous in This Age	26
Understanding Moore's implications	27
Using data everywhere	28
Putting algorithms into action	30
Using Data Successfully	32
Considering the data sources	32
Obtaining reliable data	33
Making human input more reliable	33
Using automated data collection	35
Collecting personal data ethically	35
Manicuring the Data	37
Dealing with missing data	37
Considering data misalignments	38
Separating useful data from other data	39
Considering the Five Mistruths in Data	39
Commission	40
Omission	40
Perspective	41

	Bias	42
	Frame of reference	43
	Defining the Limits of Data Acquisition	43
	Considering Data Security Issues	45
	Understanding purposefully biased data	45
	Dealing with data-source corruption	47
	Cancelling botnets with sinkholing	48
CHAPTER 3:	Considering the Use of Algorithms	49
	Understanding the Role of Algorithms	50
	Understanding what algorithm means	50
	Planning and branching: Trees and nodes	52
	Extending the tree using graph nodes	53
	Traversing the graph	54
	Playing adversarial games	56
	Using local search and heuristics	57
	Discovering the Learning Machine	60
	Leveraging expert systems	61
	Introducing machine learning	64
	Touching new heights	64
CHAPTER 4:	Pioneering Specialized Hardware	67
	Relying on Standard Hardware	68
	Understanding the standard hardware	68
	Describing standard hardware deficiencies	69
	Relying on new computational techniques	71
	Using GPUs	73
	Considering the von Neumann bottleneck	73
	Defining the GPU	74
	Considering why GPUs work well	75
	Working with Deep Learning Processors (DLPs)	76
	Defining the DLP	76
	Using the mobile Neural Processing Unit (NPU)	77
	Accessing the cloud-based Tensor Processing Unit (TPU)	78
	Creating a Specialized Processing Environment	78
	Increasing Hardware Capabilities	79
	Adding Specialized Sensors	80
	Devising Methods to Interact with the Environment	81
	PART 2: CONSIDERING THE USES OF AI IN SOCIETY	83
CHAPTER 5:	Seeing AI Uses in Computer Applications	85
	Introducing Common Application Types	86
	Using AI in typical applications	86
	Realizing AI's wide range of fields	88
	Considering the Chinese Room argument	88

Seeing How AI Makes Applications Friendlier	89
Performing Corrections Automatically.....	91
Considering the kinds of corrections	91
Seeing the benefits of automatic corrections	92
Understanding why automated corrections don't work	92
Making Suggestions	93
Getting suggestions based on past actions.....	93
Getting suggestions based on groups	93
Obtaining the wrong suggestions.....	94
Considering AI-based Errors	95
CHAPTER 6: Automating Common Processes.....	97
Developing Solutions for Boredom	98
Making tasks more interesting	98
Helping humans work more efficiently	99
Understanding how AI reduces boredom	100
Considering how AI can't reduce boredom	101
Working in Industrial Settings	101
Developing various levels of automation.....	102
Using more than just robots	103
Relying on automation alone.....	104
Creating a Safe Environment.....	104
Considering the role of boredom in accidents	104
Using AI to avoid safety issues.....	105
Understanding that AI can't eliminate safety issues	105
CHAPTER 7: Using AI to Address Medical Needs.....	107
Implementing Portable Patient Monitoring.....	108
Wearing helpful monitors	109
Relying on critical wearable monitors	109
Using movable monitors	110
Making Humans More Capable.....	111
Using games for therapy	111
Considering the use of exoskeletons	113
Addressing a Range of Physical Abilities	114
Considering the software-based solutions	115
Relying on hardware augmentation.....	116
Seeing AI in prosthetics	116
Completing Analysis in New Ways	117
Relying on Telepresence.....	118
Defining telepresence.....	118
Considering examples of telepresence	118
Understanding telepresence limitations	119

Devising New Surgical Techniques	120
Making surgical suggestions	120
Assisting a surgeon	121
Replacing the surgeon with monitoring	122
Performing Tasks Using Automation	122
Working with medical records	123
Predicting the future	123
Making procedures safer	124
Creating better medications	124
Combining Robots and Medical Professionals	125

CHAPTER 8: **Relying on AI to Improve Human Interaction** 127

Developing New Ways to Communicate	128
Creating new alphabets	129
Working with emoji and other meaningful graphics	129
Automating language translation	130
Incorporating body language	131
Exchanging Ideas	133
Creating connections	133
Augmenting communication	133
Defining trends	134
Using Multimedia	134
Embellishing Human Sensory Perception	135
Shifting data spectrum	135
Augmenting human senses	136

PART 3: WORKING WITH SOFTWARE-BASED AI APPLICATIONS 139

CHAPTER 9: **Performing Data Analysis for AI** 141

Defining Data Analysis	142
Understanding why analysis is important	144
Reconsidering the value of data	145
Defining Machine Learning	147
Understanding how machine learning works	148
Understanding the benefits of machine learning	149
Being useful; being mundane	150
Specifying the limits of machine learning	150
Considering How to Learn from Data	152
Supervised learning	153
Unsupervised learning	154
Reinforcement learning	154

CHAPTER 10: Employing Machine Learning in AI	155
Taking Many Different Roads to Learning	156
Discovering five main approaches to AI learning	156
Delving into the three most promising AI learning approaches	159
Awaiting the next breakthrough	160
Exploring the Truth in Probabilities	160
Determining what probabilities can do	162
Considering prior knowledge	163
Envisioning the world as a graph	166
Growing Trees that Can Classify	170
Predicting outcomes by splitting data	170
Making decisions based on trees	172
Pruning overgrown trees	174
CHAPTER 11: Improving AI with Deep Learning	175
Shaping Neural Networks Similar to the Human Brain	176
Introducing the neuron	176
Starting with the miraculous perceptron	176
Mimicking the Learning Brain	179
Considering simple neural networks	179
Figuring out the secret is in the weights	180
Understanding the role of backpropagation	182
Introducing Deep Learning	182
Explaining the differences between deep learning and other forms of neural networks	185
Finding even smarter solutions	186
Detecting Edges and Shapes from Images	188
Starting with character recognition	189
Explaining how convolutions work	190
Advancing using image challenges	191
Learning to Imitate Art and Life	193
Memorizing sequences that matter	193
Discovering the magic of AI conversations	194
Going for the state of the pretrained art	196
Making one AI compete against another AI	198
Pondering reinforcement learning	201

PART 4: WORKING WITH AI IN HARDWARE APPLICATIONS 207

CHAPTER 12: Developing Robots	209
Defining Robot Roles	210
Overcoming the sci-fi view of robots	211
Being humanoid can be hard	214
Working with robots	217

Assembling a Basic Robot	220
Considering the components	220
Sensing the world	221
Controlling a robot	222
CHAPTER 13: Flying with Drones	223
Acknowledging the State of the Art	224
Flying unmanned to missions	224
Meeting the quadcopter	226
Defining Uses for Drones	227
Seeing drones in nonmilitary roles	229
Powering up drones using AI	233
Understanding regulatory issues	234
CHAPTER 14: Utilizing the AI-Driven Car	237
Getting a Short History	238
Understanding the Future of Mobility	239
Climbing the six levels of autonomy	239
Rethinking the role of cars in our lives	241
Taking a step back from unmet expectations	244
Getting into a Self-Driving Car	246
Putting all the tech together	247
Letting AI into the scene	249
Understanding that it's not just AI	249
Overcoming Uncertainty of Perceptions	251
Introducing the car's senses	252
Putting together what you perceive	254
PART 5: CONSIDERING THE FUTURE OF AI	257
CHAPTER 15: Understanding the Nonstarter Application	259
Using AI Where It Won't Work	260
Defining the limits of AI	260
Applying AI incorrectly	263
Entering a world of unrealistic expectations	264
Considering the Effects of AI Winters	265
Understanding the AI winter	265
Defining the causes of the AI winter	265
Rebuilding expectations with new goals	267
Creating Solutions in Search of a Problem	269
Defining a gizmo	269
Avoiding the infomercial	270
Understanding when humans do it better	271
Looking for the simple solution	272

CHAPTER 16: Seeing AI in Space	273
Observing the Universe	274
Seeing clearly for the first time	274
Finding new places to go	275
Considering the evolution of the universe	276
Creating new scientific principles	276
Performing Space Mining	277
Harvesting water	277
Obtaining rare earths and other metals	278
Finding new elements	279
Enhancing communication	280
Exploring New Places	280
Starting with the probe	281
Relying on robotic missions	282
Adding the human element	283
Building Structures in Space	284
Taking your first space vacation	285
Performing scientific investigation	285
Industrializing space	286
Using space for storage	286
CHAPTER 17: Engaging in Human Endeavors	287
Keeping Human Beings Popular	288
Living and Working in Space	289
Creating Cities in Hostile Environments	290
Building cities in the ocean	290
Creating space-based habitats	291
Constructing moon-based resources	293
Making Humans More Efficient	294
Fixing Problems on a Planetary Scale	296
Contemplating how the world works	296
Locating potential sources of problems	297
Defining potential solutions	298
Seeing the effects of the solutions	299
Trying again	299
PART 6: THE PART OF TENS	301
CHAPTER 18: Ten Occupational Categories that AI Can't Replace	303
Performing Human Interaction	304
Teaching children	304
Nursing	304
Addressing personal needs	305
Solving developmental issues	305

Creating New Things.....	306
Inventing.....	306
Being artistic.....	307
Imagining the unreal.....	307
Making Intuitive Decisions.....	308
Investigating crime.....	308
Monitoring situations in real time.....	308
Separating fact from fiction.....	309
CHAPTER 19: Ten Substantial Contributions of AI to Society.....	311
Considering Human-Specific Interactions.....	312
Devising the active human foot.....	312
Performing constant monitoring.....	313
Administering medications.....	313
Developing Industrial Solutions.....	314
Using AI with 3-D printing.....	314
Advancing robot technologies.....	314
Creating New Technology Environments.....	315
Developing rare new resources.....	315
Seeing what can't be seen.....	316
Working with AI in Space.....	316
Delivering goods to space stations.....	316
Mining extraplanetary resources.....	317
Exploring other planets.....	318
CHAPTER 20: Ten Ways in Which AI Has Failed.....	319
Understanding.....	320
Interpreting, not analyzing.....	321
Going beyond pure numbers.....	321
Considering consequences.....	322
Discovering.....	322
Devising new data from old.....	323
Seeing beyond the patterns.....	323
Implementing new senses.....	324
Empathizing.....	324
Walking in someone's shoes.....	325
Developing true relationships.....	325
Changing perspective.....	326
Making leaps of faith.....	326
INDEX.....	327
