

CONTENTS

<i>Preface to Fourth Edition</i>	xv
<i>Acknowledgments</i>	xvii

PART ONE: PRINCIPLES OF SOCIAL RESEARCH

1	The Research Process	3
	Social Science as Science	7
	Stages of Social Research	12
	<i>Circularity • Replication</i>	
	Examples: Density Research	14
	<i>Stage 1: Choosing the Problem and Stating the Hypothesis • Stage</i>	
	<i>2: Research Design • Stage 3: Gathering the Data • Stage 4:</i>	
	<i>Coding and Analyzing the Data • Stage 5: Interpreting the Results</i>	
	<i>and Testing the Hypothesis</i>	
	Summary	18
2	Choosing the Research Problem	21
	Factors Affecting Problem Selection	22
	Examples of Current Research	22
	Applied Versus Pure Research	24
	<i>Applied Research • Pure Research • Pure and Applied Research</i>	
	Research Paradigms	26

Values 28

*Value-free Sociology • The Myth of Value-free Sociology •
Postmodernism and Value-full Sociology • Effects of Values in
Social Research • Values and Perception*

Reactivity 33

Methodology Versus Method 34

The Unit of Analysis 35

Cross-sectional Versus Longitudinal Studies 36

Summary 37

3 Constructing Social Explanations

39

Descriptive Studies 40

Explanatory Studies 40

Explanation • Prediction

Theory 41

*Concepts and Variables • Propositions Defined • Relationships
Between Variables*

Types of Propositions 42

*Hypotheses • Empirical Generalizations • Components of
Axiomatic Theory: Postulates, Axioms, Theorems*

Bivariate Relationships 45

*Positive Versus Negative Relationships • Strength of the
Relationship • Symmetrical Versus Asymmetrical Relationships •
Independent and Dependent Variables • Distinguishing
Independent from Dependent Variables • Causal Relationships •
Linear Versus Nonlinear (Curvilinear) Relationships • Spurious
and Intervening Relationships • Suppressor and Distorter
Variables*

Alternate Strategies for Hypothesis Formulation and Verification 52

*The Classical Approach • Grounded Theory • Classical Versus
Grounded-Theory Approach • Operationalism • A Critique of
Operationalism • Classical, Grounded-Theory, and Operational
Approaches Compared*

Summary 58

4 Measurement

61

The Quantitative/Qualitative Distinction 62

Level of Measurement 63

*Nominal • Ordinal • Interval • Ratio • Discrete Versus
Continuous*

Measuring the Validity and Reliability of Measurement 67

Assessing Validity 68

*Face Validity • Criterion Validity • Construct Validity • Internal
and External Validity*

Assessing Reliability 72

Alternate or Parallel Methods • Test/Retest Reliability

Error 74

Summary 76

PART TWO: SURVEY RESEARCH METHODS

5 Survey Sampling 81

Technical Terms 83

Sample Versus Population 83

Sampling Efficiency 84

*Notorious Sampling Failures • Sampling Successes • Advantages
of Sampling*

Constructing the Sampling Frame 86

Probability Sampling 89

*Random Sampling • Systematic Sampling • Stratified Random
Sampling • Cluster Sampling*

Nonprobability Sampling 93

*Convenience Sampling • Quota Sampling • Dimensional
Sampling • Purposive Sampling • Snowball Sampling*

Sample Size 96

*Statistical Considerations of Sample Size • Sample Size Versus
Sampling Proportion • Sample Size for Stratified Sampling •
Weighted Samples • Examples of Weighted Samples • Sample
Size for Cluster Sampling*

Special Sampling Problems 103

Summary 103

6 Questionnaire Construction 105

Constructing Questionnaires 107

Questionnaire Relevance 108

*Relevance of the Study • Relevance of Questions to the Study •
Relevance of Questions to Respondents*

Pitfalls in Questionnaire Construction: Wording the Questions 110

*Double-barreled Questions • Ambiguous Questions • Level of
Wording • Abstract Versus Factual Questions • Leading
Questions • Sensitive or Threatening Questions*

Open and Closed Response Categories 118

<i>Closed-ended Questions • Open-ended Questions • Open and Closed Questions Compared</i>	
Response-category Format	123
<i>Number of Categories • Ordinal Variables • Interval Scales</i>	
Question Order	132
Contingency Questions	136
Cover Letter or Introductory Statement	138
Instructions for Interviewers or Respondents	140
Pretesting	143
Summary	146

7 Mailed Questionnaires 147

Advantages of Mailed Questionnaires	148
Disadvantages of Mailed Questionnaires	149
The Total Design Method	151
Factors Affecting Mail Surveys	153
<i>Sponsorship • Questionnaire Format and Color • Questionnaire Length • Cover Letter • Ease of Completing and Returning Questionnaire • Inducements to Reply • The Nature of Respondents • Type of Mailing • Day, Week, or Month of Mailing • Follow-up Letters and Telephone Calls • Number and Timing of Follow-ups or Reminders</i>	
Adequate Response Rate	169
Validity and Reliability	170
<i>Validity • Reliability</i>	
Summary	172

8 Interview Studies 173

Advantages of Interview Studies	174
Disadvantages of Interview Studies	175
The Interview as a Social Interaction	176
The Interview as a Secondary Relationship	178
Effects of Interviewer Characteristics	180
<i>Race and Ethnicity • Sex • Social Status • Age • Clothing and Grooming</i>	
The Interview	185
<i>Approaching the Respondent • Dealing with Refusals • Conducting the Interview</i>	
Less Structured Interviews	188
<i>Open-ended Questions • Probes</i>	

The Focused Interview and Focus Groups	191
<i>The Clinical Interview • The Unstructured Interview • Reliability and Validity of Unstructured Interview</i>	
Projective Methods	195
The Telephone Interview	196
<i>Random Digit Dialing • Computer-assisted Telephone Interviewing (CATI) • Telephone Versus Face-to-Face • Other Issues in Telephone Surveys</i>	
The Computer or Electronic Survey	204
<i>Advantages • Disadvantages</i>	
Fax Surveys	207
<i>Advantages • Disadvantages</i>	
Interviewer Training	208
Entering the Field	209
The Panel Study	211
Validity and Reliability	212
Summary	213

PART THREE: NONSURVEY DATA COLLECTION TECHNIQUES

9	Experiments	217
	Advantages of Experiments	219
	Disadvantages of Experiments	220
	Closure	221
	The Logic of Experimentation	222
	One- and Two-Group Experimental Designs	223
	<i>Before and After Experiment with No Control Group • Two-Group Design</i>	
	Assignment of Subjects to Control Groups	226
	<i>Randomization • Simple Matching (Precision Control) • Frequency Distribution Control</i>	
	Multiple-group Designs	228
	<i>Two Experimental Groups with One Control Group • Factorial Designs • Latin Square Design • Interaction Effect • Solomon Two/Control/Group Design • Solomon Three/Control/Group Design</i>	
	Further Examples of Laboratory Experiments	234
	<i>Field Experiments • Quasi-experimentation</i>	
	Validity and Reliability	238
	Summary	239

10 Observation	241
Advantages of Observation	243
Disadvantages of Observation	245
Types of Observation	246
Field Studies	248
<i>Gaining Entry • Gaining Rapport • Observing and Recording •</i>	
<i>Dealing with Crises • Data Analysis</i>	
Completely Structured Observation	257
<i>Semistructured Study • Unstructured Laboratory Study</i>	
Indirect Observation	265
<i>Erosion Measures • Accretion Measures</i>	
Validity and Reliability	268
<i>Validity of Direct Observation • Measured Validity • Validity of</i>	
<i>Indirect Observational Methods • Reliability</i>	
Summary	273
11 Ethnomethodology	275
Ethnomethodology Versus Survey Research	279
<i>Process Versus Product • Indexical Expressions</i>	
Conversational Structures	283
Validity and Reliability	285
<i>Validity • Reliability</i>	
Comparison of Positions	288
Advantages of Ethnomethodology	290
Disadvantages of Ethnomethodology	290
Summary	291
12 Document Study	293
Advantages of Document Study	294
Disadvantages of Document Study	296
Data Sources	298
Secondary Analysis	299
Types of Documentary Analysis	300
Personal Documents	301
Content Analysis	304
<i>Purpose • Sampling • Categories • Recording Unit • Context</i>	
<i>Unit • Systems of Enumeration</i>	
Historical Research	315
Validity and Reliability	317
<i>Validity • Reliability</i>	
Summary	319

13 Simulations and Games 321

Advantages of Simulation 322

Disadvantages of Simulation 324

Types of Games 325

Two-person Games • N-person Games

Computer Simulation 330

Validity 331

Summary 333

PART FOUR: DATA REDUCTION, ANALYSIS, INTERPRETATION, AND APPLICATION

14 Coding and Data Reduction 337

Data Reduction 339

*Precoding • Postcoding • Code-Book Construction • Coding
Nonresponses*

Data Entry 345

Editing • Direct Entry: Scanning • Direct Entry: Interviewer

Computer Entry • Data Cleaning • Contingency Cleaning

Summary 348

15 Scaling 349

Nominal Scaling 350

Ordinal Scaling 350

Summated Rating • Likert Scaling • Guttman Scaling

Interval-ratio Scaling 358

Factor Scaling 360

*Advantages of Factor Scaling • Disadvantages of Factor
Scaling*

The Semantic Differential 366

*Questions Format • Administration of the SD • Interpreting
the Results*

Multidimensional Measurement 368

*Typology Construction • Substruction and Reduction • Cluster
Analysis • Smallest Space Analysis*

Properties of Groups 372

Analytical • Global • Structural (Sociometric Measures)

Summary 375

16 Analysis, Presentation, and Interpretation of Data 377

Table Presentations 379

Univariate Presentation • Percentages • Bivariate Presentation
• Table Format • Trivariate Tables • Three-variable 2 × 2 Table
• Constructing Categories for Tables and Collapsing Tables

Hypothesis Testing 389

Chi-square (χ^2) • Fisher's Exact Test

Measures of Association 395

Phi-coefficient • Gamma • Additional Measures of Association
for Contingency Tables • Rho

Interval Data 399

Pearson's r • Least-squares Regression Line • Multiple
Correlation, Partial Correlation, and Multiple Partial Regression
• Analysis of Variance • Path Analysis • Nonresponse

Meta-analysis 410

Statistical Computer Packages for the Social Sciences 413

Summary 413

17 Inclusionary Research Methods 415

Insiders and Outsiders 418

Social Research and Excluded Groups 420

Disadvantages of Research for "Outsiders" • Advantages of
Research for "Outsiders"

Including Women in Research 423

Why Women Are Excluded • Critiques of Quantitative Studies •
Critiques of Qualitative Studies • Techniques for Including
Women in Research • The Politics of Gender

Racial Groups: Including the "Hyphenated-Americans" 435

Generalizing from Nonsexist to Nonracist Studies •
Discontinuities Between Race and Gender • Research with
Hispanic Populations

Including "Deviant" Groups: Mutable or Immutable? 440

Alcoholics • Homosexuals • Lesbians and Gay Men • Bisexuals

Including People with Disabilities 446

Including Children in Research 447

Interviewing Children • Language Skills • The Child-Adult
Relationship • The Interview Situation

Including Persons with Combinations of Characteristics 450

The Politics of Inclusion 450

Assessment 451

Summary 451

18 Ethics in Social Research 453

- How to Remain Ethical 456
 - Animal Studies • Computer Simulation • Already Existing
Negative Effects • Small Cause or Short Time • Informed
Consent • Harm of Subject Is Justified • Sampling • Publishing
Aggregate Data*
- Invasion of Privacy 462
- Deception 463
 - Ethical Questions • Methodological Implications*
- Sponsored Research 466
- Professional Codes of Ethics 468
- Ethics in Observational Research 471
- Neglected Aspects of Research Ethics 471
- Summary 472

19 Applications 473

- Factors Limiting Applications of Social Research 474
 - Mistrust of Social Science • Inability to Conduct Research •
Inability to Implement Research Findings • Disagreement Over
the Worth of Findings*
- Range of Applications of Social-science Data 476
- Controversial Social-science Applications 478
 - Brown Versus Board of Education • The Moynihan Report • The
Coleman Report • The Jencks Study • The Jensen Study*
- Analysis 483
 - The Media • Determinism • Values • Ethics*
- Evaluation Research and the Development of Social Indicators 486
 - Evaluation Research • Social Indicators*
- Summary 490

20 Constructing and Revising Complex Theories 491

- Explanations 492
- Formal Theory 494
- Synthetic and Explanatory Deductive Theories 497
 - Synthetic Theory • Explanatory Theory*
- Strength and Form of Relationship 500
- Functionalism 501
- Evaluating Social Theory 504
- Revising Social Theory 505
- Summary 505

Glossary	507
Appendixes	525
A: Table of Random Digits	527
B: Code of Ethics of the American Sociological Association Revised ASA Code of Ethics	531
C: Code of Professional Ethics and Practices of the American Association for Public Opinion Research	543
References	547
Name Index	573
Subject Index	578
