

*Biosocial Worlds* presents state-of-the-art contributions to anthropological reflections on the porous boundaries between human and non-human life – biosocial worlds. Based on changing understandings of biology and the social, it explores what it means to be human in these worlds. Growing separation of scientific disciplines for more than a century has maintained a separation of the 'natural' and the 'social' that has created a space for projections between the two. Such projections carry a directional causality and so constitute powerful means to establish discursive authority.

While arguing against the separation of the biological and the social in the study of human and non-human life, it remains important to unfold the consequences of their discursive separation. Based on examples from Botswana, Denmark, Mexico, the Netherlands, Uganda, the UK and USA, the volume explores what has been created in the space between 'the social' and 'the natural', with a view to rethink 'the biosocial'. Health topics in the book include diabetes, trauma, cancer, HIV, tuberculosis, prevention of neonatal disease and wider issues of epigenetics. Anthropological reflection and ethnographic case studies explore how 'health' and 'environment' are entangled in ways that move their relation beyond interdependence to one of inseparability. The subtitle of this volume captures these insights through the concept of 'health environment', seeking to move the engagement of anthropology and biology beyond deterministic projections.

**Jens Seeberg** is Professor of Anthropology at Aarhus University, and Director of the Centre for Biosocial Inquiries. He currently leads the project *People, Pigs and Microbes: Biotic Socialities in a Rural Community in Denmark*.

**Andreas Roepstorff** is Professor of Anthropology, and Institute of Clinical Medicine, at Aarhus University, and Director of the Interacting Minds Centre.

**Lotte Meinert** is Professor of Anthropology at Aarhus University. She currently leads the projects *Anthropology and Human Security in Africa (ANTHUSIA)* and *Imagining Gender Futures in Uganda (IMAGENU)*.

<i>List of figures</i>	vii
<i>Notes on contributors</i>	viii
Introduction	1
<i>Jens Seeberg, Andreas Roepstorff and Lotte Meinert</i>	
1. Permeable Bodies and Environmental Delineation	15
<i>Margaret Lock</i>	
2. Situating Biologies: Studying Human Differentiation as Material-Semiotic Practice	44
<i>Jörg Niewöhner</i>	
3. Pig–Human Relations in Neonatology: Knowing and Unknowing in a Multi-Species Collaborative	69
<i>Mette N. Svendsen</i>	
4. Anthropology’s End to Biodeterminism: A New Sociobiology	91
<i>A. David Napier</i>	
5. Tribes without Rulers: Bacteria Life in the Human Holobiont	109
<i>Allan Young</i>	
6. Biosocial Dynamics of Multidrug-Resistant Tuberculosis: A Bacterial Perspective	124
<i>Jens Seeberg</i>	
7. When Sicknes Come in Multiples: Co-morbidity in Botswana	146
<i>Julie Livingston</i>	
8. Legacies of Violence: The Communicability of Spirits and Trauma in Northern Uganda	168
<i>Lotte Meinert and Susan Reynolds Whyte</i>	

9. Extinction and Time amid Climate Change or What is a Horizon?	191
