

Obsah

List of symbols and abbreviation	3
Introduction	4
1. Characteristics of the XPS method - X-ray photoelectron spectroscopy	5
1.1. Surface definition	5
1.2. History of the XPS method	6
1.3. XPS method definition	6
1.4. Basic equipment of the XPS device.....	7
1.5. Principle of the method	8
1.6. Quantitative analysis using the XPS method	11
2. Selected environmentally friendly materials: preparation and characterization using XPS method	14
2.1. Preparation and characterization of LiFeAs superconductor	16
2.2. Preparation and characterization of YBaCuO superconductor	20
2.3. Preparation and monitoring of geopolymer formation from fly ash and metakaolin....	22
2.3.1. Metakaolin	24
2.3.2. Geopolymers	25
2.3.2.1. Characteristics of geopolymer structure.....	26
2.3.2.2. Chemical mechanism of geopolymer formation.....	29
2.4. Characterization of plastic surfaces	42
2.4.1. Characterization of polyethylene terephthalate PET.....	43
2.4.2. Characterization of surface changes of PVC polyvinyl chloride during hydrolysis with water and sodium hydroxide	49
2.4.2.1. Alkaline hydrolysis of PVC plastics with 4% sodium hydroxide	51
2.4.2.2. Alkaline hydrolysis of PVC plastics with 8% sodium hydroxide	53
2.4.3. Monitoring of antimony content in PET bottles	54
2.5. Characterization of pigments	60
2.5.1. Chemical structure of ultramarine.....	61
2.5.2. Synthesis of ultramarine blue.....	63
2.5.2.1. The role of the Si / Al cation ratio in the formation of UMM.....	64
2.5.2.2. The course of chemical reactions during the synthesis of UMM	64
2.5.3. Pigment synthesis and pigment characterization using the XPS method	65

3.	Chemical analysis at the atomic level - characterization of oxidation states of given elements of environmental materials	72
3.1.	Characterization of zinc nanoparticles	72
3.2.	Confirmation of ilmenite FeTiO_3 reduction by XPS method	74
3.3.	Characterization of SnO_2 and fluorine nanoparticles in mechanochemical grinding ...	75
3.4.	Characterization of thin gold layers using the XPS method.....	77
Conclusion	80
