| Editorial <i>Ahmad Ibrahim</i> | 1691 |
| Guest Editorial <i>Gordon G. Krauss</i> | 1692–1693 |
| The Key Ideas of MDW XII: A Summary <i>Gordon G. Krauss</i> | 1694–1703 |
| Iterating Overnight: Using Cardboard to Teach Audio During a Pandemic <i>Colin M. Gray, Christopher Welford and Davin Huston</i> | 1704–1711 |
| Student Perspectives of the Nature and Purpose of “Deep Modeling” as Situated Knowing <i>Robin S. Adams and Asem Aboelzahab</i> | 1712–1729 |
| The Impact of Appropriate Prototyping Tool Choices on Achieving Functionality for Novices <i>Joshua D. Brandel, Andersen Chang and Matthew A. Wettergreen</i> | 1730–1746 |
| CAD as a Virtual Prototyping Method: Uses and Timing of Computer-Aided Design Artifacts in Hardware Design <i>Hannah Budinoff and Julia Kramer</i> | 1747–1760 |
| Engineering Students’ Performance of Prototyping: Process, Purpose, and Perception in the Design Classroom <i>Todd Fernandez and Martin Jacobson</i> | 1761–1778 |
| Building Confidence and Embracing Failure Through Sketching Practice <i>Madhurima Das and Maria Yang</i> | 1779–1790 |
| Student Perception of Construction Problems and their Process Design Strategies <i>Ali Shafaat and Farshid Marbouti</i> | 1791–1803 |
| Community-Engaged Learning, Prototypes and Requirement Development <i>William C. Oakes, Andrew Pierce, Jorge Martinez and Paul Leidig</i> | 1804–1814 |
| Designing a Design-Driven Human-Centered Engineering Program <i>Avneet Hira, Sunand Bhattacharya, Glenn Gaudette and Siddhartan Govindasamy</i> | 1815–1823 |
| Understanding the Anchors Associated with Secondary School Students’ Engineering Design Experiences <i>Adam R. Carberry, Medha Dalal and Olushola Emiola-Owolabi</i> | 1824–1835 |
| Improving Engineering Sketching Education Through Perspective Techniques and an AI-Based Tutoring Platform <i>Morgan B. Weaver, Samantha Ray, Ethan Clark Hilton, Denis Dorozhkin, Kerrie Douglas, Tracy Hammond and Julie Linsey</i> | 1836–1850 |
| Predicting Success of Engineering Student Makers: Relationships Between Makerspace Involvement, Academic Performance, and Engineering Design Self-Efficacy <i>Morgan B. Weaver, Ethan Hilton, Melissa W. Alemán, Robert Nagel and Julie Linsey</i> | 1851–1861 |
| Experiences with Prototyping and Making in Virtual Classes <i>Reid Bailey, Bethany M. Brinkman, Greg C. Lewin and Matthew Shields</i> | 1862–1874 |
| A Small Rebellion: How to Catalyze Innovation Through Self Actualization <i>Ade Mabogunje, Larry Leifer and Phillip Wickham</i> | 1875–1890 |
| Semantic Fluency in Design Reasoning <i>Jenny Quintana-Cifuentes and Senay Purzer</i> | 1891–1903 |
| The SmithVent Experience and a Framework for Collaborative Distributed Design and Fabrication <i>Susannah Howe, Eleanor Ory, Devin Carroll, Sarah Chu, Kalifa Clarke, Beatrix Dalton, Claire Dudek, Adrienne Horne, Nicholas Howe, Sangye Kazi, Astrid Landeau, Dan Lin, Phoebe Degroot, Emily Dixon, Farida Sabry and Alex Widstrand</i> | 1904–1922 |
