

# Brief Contents

## **PART I Exploring Data** 1

### Exploring Data: Variables and Distributions

CHAPTER 1	Picturing Distributions with Graphs	3
CHAPTER 2	Describing Distributions with Numbers	37
CHAPTER 3	The Normal Distributions	64

### Exploring Data: Relationships

CHAPTER 4	Scatterplots and Correlation	90
CHAPTER 5	Regression	115
CHAPTER 6	Two-Way Tables*	149
CHAPTER 7	Exploring Data: Part I Review	167

## **PART II From Exploration to Inference** 186

### Producing Data

CHAPTER 8	Producing Data: Sampling	189
CHAPTER 9	Producing Data: Experiments	213
COMMENTARY: Data Ethics*		235

### Probability and Sampling Distributions

CHAPTER 10	Introducing Probability	246
CHAPTER 11	Sampling Distributions	271
CHAPTER 12	General Rules of Probability*	302
CHAPTER 13	Binomial Distributions*	326

### Introducing Inference

CHAPTER 14	Confidence Intervals: The Basics	343
CHAPTER 15	Tests of Significance: The Basics	362
CHAPTER 16	Inference in Practice	387

CHAPTER 17	From Exploration to Inference: Part II Review	412
------------	---	-----

## **PART III Inference about Variables** 430

### Quantitative Response Variable

CHAPTER 18	Inference about a Population Mean	433
CHAPTER 19	Two-Sample Problems	460

### Categorical Response Variable

CHAPTER 20	Inference about a Population Proportion	491
CHAPTER 21	Comparing Two Proportions	512
CHAPTER 22	Inference about Variables: Part III Review	530

## **PART IV Inference about Relationships** 544

CHAPTER 23	Two Categorical Variables: The Chi-Square Test	547
CHAPTER 24	Inference for Regression	581
CHAPTER 25	One-Way Analysis of Variance: Comparing Several Means	620

## **PART V Optional Companion Chapters (available on the BPS CD and online)**

CHAPTER 26	Nonparametric Tests	26-1
CHAPTER 27	Statistical Process Control	27-1
CHAPTER 28	Multiple Regression	28-1
CHAPTER 29	Two-Way Analysis of Variance (available online only)	29-1

\*Starred material is optional.

To the Instructor: About This Book	xi
To the Student: Statistical Thinking	xxvii

## PART I

### Exploring Data 1

#### CHAPTER 1 Picturing Distributions with Graphs 3

Individuals and variables	3
Categorical variables: pie charts and bar graphs	6
Quantitative variables: histograms	10
Interpreting histograms	14
Quantitative variables: stemplots	19
Time plots	22

#### CHAPTER 2 Describing Distributions with Numbers 37

Measuring center: the mean	38
Measuring center: the median	39
Comparing the mean and the median	40
Measuring spread: the quartiles	41
The five-number summary and boxplots	43
Spotting suspected outliers*	45
Measuring spread: the standard deviation	47
Choosing measures of center and spread	50
Using technology	51
Organizing a statistical problem	53

#### CHAPTER 3 The Normal Distributions 64

Density curves	64
Describing density curves	67
Normal distributions	70
The 68–95–99.7 rule	71
The standard Normal distribution	74
Finding Normal proportions	76
Using the standard Normal table*	78
Finding a value given a proportion	81

#### CHAPTER 4 Scatterplots and Correlation 90

Explanatory and response variables	90
Displaying relationships: scatterplots	92
Interpreting scatterplots	94
Adding categorical variables to scatterplots	97
Measuring linear association: correlation	99
Facts about correlation	101

#### CHAPTER 5 Regression 115

Regression lines	115
The least-squares regression line	118
Using technology	120
Facts about least-squares regression	123
Residuals	126
Influential observations	129
Cautions about correlation and regression	132
Association does not imply causation	134

#### CHAPTER 6 Two-Way Tables\* 149

Marginal distributions	150
Conditional distributions	153
Simpson's paradox	158

#### CHAPTER 7 Exploring Data: Part I Review 167

Part I summary	169
Review exercises	172
Supplementary exercises	180
EESEE case studies	184

## PART II

### From Exploration to Inference 186

#### CHAPTER 8 Producing Data: Sampling 189

Observation versus experiment	189
Sampling	192
How to sample badly	194

\*Starred material is optional.

Simple random samples	196
Other sampling designs	200
Cautions about sample surveys	201
Inference about the population	204

## CHAPTER 9 Producing Data: Experiments 213

Experiments	213
How to experiment badly	215
Randomized comparative experiments	217
The logic of randomized comparative experiments	220
Cautions about experimentation	222
Matched pairs and other block designs	224

## Commentary: Data Ethics\* 235

Institutional review boards	236
Informed consent	237
Confidentiality	237
Clinical trials	238
Behavioral and social science experiments	240

## CHAPTER 10 Introducing Probability 246

The idea of probability	247
Probability models	250
Probability rules	252
Discrete probability models	255
Continuous probability models	257
Random variables	260
Personal probability*	261

## CHAPTER 11 Sampling Distributions 271

Parameters and statistics	271
Statistical estimation and the law of large numbers	273
Sampling distributions	275
The sampling distribution of $\bar{x}$	278
The central limit theorem	280
Statistical process control*	286
$\bar{x}$ charts*	287
Thinking about process control*	292

## CHAPTER 12 General Rules of Probability\* 302

Independence and the multiplication rule	303
The general addition rule	307
Conditional probability	309
The general multiplication rule	311
Independence	312
Tree diagrams	314

## CHAPTER 13 Binomial Distributions\* 326

The binomial setting and binomial distributions	326
Binomial distributions in statistical sampling	327
Binomial probabilities	328
Using technology	331
Binomial mean and standard deviation	332
The Normal approximation to binomial distributions	334

## CHAPTER 14 Confidence Intervals: The Basics 343

Estimating with confidence	344
Confidence intervals for the mean $\mu$	349
How confidence intervals behave	353
Choosing the sample size	355

## CHAPTER 15 Tests of Significance: The Basics 362

The reasoning of tests of significance	363
Stating hypotheses	365
Test statistics	367
P-values	368
Statistical significance	371
Tests for a population mean	372
Using tables of critical values*	376
Tests from confidence intervals	379

## CHAPTER 16 Inference in Practice 387

Where did the data come from?	388
Cautions about the $z$ procedures	389
Cautions about confidence intervals	391
Cautions about significance tests	392
The power of a test*	396
Type I and Type II errors*	399

## CHAPTER 17 From Exploration to Inference: Part II Review 412

Part II summary	414
Review exercises	417
Supplementary exercises	424
Optional exercises	426
EESEE case studies	429

## **PART III** **Inference about Variables 430**

### **CHAPTER 18 Inference about a Population Mean 433**

Conditions for inference	433
The $t$ distributions	435
The one-sample $t$ confidence interval	437
The one-sample $t$ test	439
Using technology	441
Matched pairs $t$ procedures	444
Robustness of $t$ procedures	447

### **CHAPTER 19 Two-Sample Problems 460**

Two-sample problems	460
Comparing two population means	462
Two-sample $t$ procedures	464
Examples of the two-sample $t$ procedures	466
Using technology	470
Robustness again	473
Details of the $t$ approximation*	473
Avoid the pooled two-sample $t$ procedures*	476
Avoid inference about standard deviations*	476
The $F$ test for comparing two standard deviations*	477

### **CHAPTER 20 Inference about a Population Proportion 491**

The sample proportion $\hat{p}$	492
The sampling distribution of $\hat{p}$	492
Large-sample confidence intervals for a proportion	496
Accurate confidence intervals for a proportion	499
Choosing the sample size	502
Significance tests for a proportion	504

### **CHAPTER 21 Comparing Two Proportions 512**

Two-sample problems: proportions	512
The sampling distribution of a difference between proportions	513
Large-sample confidence intervals for comparing proportions	514
Using technology	516

Accurate confidence intervals for comparing proportions	517
Significance tests for comparing proportions	520

### **CHAPTER 22 Inference about Variables: Part III Review 530**

Part III summary	532
Review exercises	533
Supplementary exercises	539
EESEE case studies	543

## **PART IV** **Inference about Relationships 544**

### **CHAPTER 23 Two Categorical Variables: The Chi-Square Test 547**

Two-way tables	547
The problem of multiple comparisons	550
Expected counts in two-way tables	552
The chi-square test	554
Using technology	555
Cell counts required for the chi-square test	559
Uses of the chi-square test	560
The chi-square distributions	563
The chi-square test and the $z$ test*	565
The chi-square test for goodness of fit*	566

### **CHAPTER 24 Inference for Regression 581**

Conditions for regression inference	583
Estimating the parameters	584
Using technology	587
Testing the hypothesis of no linear relationship	591
Testing lack of correlation	592
Confidence intervals for the regression slope	594
Inference about prediction	596
Checking the conditions for inference	600

### **CHAPTER 25 One-Way Analysis of Variance: Comparing Several Means 620**

Comparing several means	622
The analysis of variance $F$ test	623
Using technology	625

The idea of analysis of variance	630
Conditions for ANOVA	632
F distributions and degrees of freedom	637
Some details of ANOVA: the two-sample case*	639
Some details of ANOVA*	641

## Statistical Thinking Revisited 657

## Notes and Data Sources 660

## Tables 683

Table A	Standard Normal probabilities	684
Table B	Random digits	686
Table C	t distribution critical values	687
Table D	F distribution critical values	688
Table E	Chi-square distribution critical values	692
Table F	Critical values of the correlation r	693

## Answers to Selected Exercises 694

## Index 721

## PART V

### Optional Companion Chapters (on the BPS CD and online)

## CHAPTER 26 Nonparametric Tests 26-1

Comparing two samples: the Wilcoxon rank sum test	26-3
The Normal approximation for W	26-7
Using technology	26-9
What hypotheses does Wilcoxon test?	26-11
Dealing with ties in rank tests	26-12
Matched pairs: the Wilcoxon signed rank test	26-17
The Normal approximation for $W^+$	26-20
Dealing with ties in the signed rank test	26-22
Comparing several samples: the Kruskal-Wallis test	26-25

Hypotheses and conditions for the Kruskal-Wallis test	26-26
The Kruskal-Wallis test statistic	26-27

## CHAPTER 27 Statistical Process Control 27-1

Processes	27-2
Describing processes	27-2
The idea of statistical process control	27-6
$\bar{x}$ charts for process monitoring	27-8
s charts for process monitoring	27-14
Using control charts	27-21
Setting up control charts	27-24
Comments on statistical control	27-30
Don't confuse control with capability!	27-33
Control charts for sample proportions	27-35
Control limits for p charts	27-36

## CHAPTER 28 Multiple Regression 28-1

Parallel regression lines	28-2
Estimating parameters	28-6
Using technology	28-11
Inference for multiple regression	28-15
Interaction	28-26
The multiple linear regression model	28-32
The woes of regression coefficients	28-38
A case study for multiple regression	28-42
Inference for regression parameters	28-54
Checking the conditions for inference	28-59

## CHAPTER 29 Two-Way Analysis of Variance (available online only)

Extending the one-way ANOVA model
Two-way ANOVA models
Using technology
Inference for two-way ANOVA
Inference for a randomized block design
Multiple comparisons
Contrasts
Conditions for two-way ANOVA
