

“The Cambridge Handbook of Sociocultural Psychology is an exemplary effort to offer a scholarly, comprehensive and innovative reference for understanding the interface and co-construction of mind and society. It celebrates the multiplicity and mutuality of sociocultural processes in the global context. This encyclopaedic work is going to become a primary source for students and scholars seeking insights into the domain of sociopsychological analyses. The cutting-edge conceptual and empirical work featured in this Handbook is an indispensable resource for doing psychology in the twenty-first century.”

Girishwar Misra, Delhi University, India

“At a time when the neuroscientific view of the mind seems ubiquitous, this book reconnects psychology to its fundamental questions, from the concept of person to the semiotic constitution of mind. Written by a genuinely international team, this Handbook covers core topics of sociocultural psychology in a comprehensive and updated way.”

Carlos Cornejo, Pontificia Universidad Católica de Chile

“This second edition is a suggestive fresco on how sociocultural psychology, being an idiographic and nomothetic science, is capable of relating new findings from neighbouring disciplines, and how it can provide an effective and original answer to the problem of big data.”

Andrea Smorti, University of Florence, Italy

ALBERTO ROSA is a professor of psychology at the Universidad Autónoma de Madrid, Spain, where he lectures on the history of psychology and cultural psychology.

JAAN VALSINER is the Niels Bohr Professor of Cultural Psychology at Aalborg University, Denmark. He was the founding editor of the journal *Culture & Psychology*.
