

EMERGING SUPERPOWERS: INDIA AND CHINA

Gill Miller

Series Editors: **Bob Digby** and **Sue Warn**

This book meets the requirements of the 2016 A levels in England and Wales. Its focus upon China and India will make it essential to meet the core content requirements for all four A level specifications, even though they differ slightly in detail. The book includes:

- the rapid growth and emergence of both countries as economic superpowers, each having become a key player in the global economy
- some of the implications for people and the environment in both countries, given the rapid rates of economic growth, and the shift in populations from rural to urban environments
- the emergence of each country as political heavyweights, contesting the sole superpower status of the USA.

A level specifications require that students study ways in which these factors affect the geopolitical balance of economic and political power in the world. This book addresses each of those factors through the liberal use of examples by Gill Miller, an expert in her field.

The book will also provide substantive background reading for students who undertake individual investigations on international geopolitical change as part of their A level.

Contents

Chapter 1. Superpowers in the making?

Chapter 2. Population powerhouses?

Chapter 3. The drive for economic growth

Chapter 4. Global reach, global superpower?

Chapter 5. Environmental challenges

Chapter 6. Superpower aspirations

Online resources

Each book in the *Top Spec Geography* series has a range of supplementary materials and resources including:

- extra information
- extended question lists
- model answers and mark schemes
- links to relevant websites
- extended glossaries
- photo galleries.

The *Top Spec Geography* series offers teachers and tutors cutting-edge resources designed to help their students investigate specialist topics found in the A level specifications, and bridge the gap between A level and university. The writing teams, combining the expertise of a specialist in their field with that of an experienced classroom teacher, have been chosen to bring you contemporary and exciting geography that brings together the latest research and thinking on topical themes, with practical activities suitable for use with students either in the classroom or for private study. All the case studies are well supported by geographical theory, and the activities take an enquiry approach to learning. Supporting materials, including model answers, extended glossaries, web links and photo galleries, to accompany each book are available at www.geography.org.uk/topspec.

The *Top Spec Geography* series comprises:

Changing Populations:

The new Europe

Russell Chapman and Ray Hall

Coasts

Debbie Milton and Gerd Masselink

Contemporary Conflicts and Challenges

Bob Digby and Sue Warn

Emerging Superpowers:

India and China

Gill Miller

Energy: The burning questions

Sally Garrington with Sue Warn

Flood Risk and Management

David Croot and David Holmes

Glaciated Landscapes

Richard Waller and Peter Knight

Health Issues in Geography

Dan Cowling and Bob Digby

HIV/AIDS as a Development Issue

Hazel Barrett and Bob Digby

Tectonic Hazards

Cameron Dunn and Martin Degg

The Rapidly Changing Arctic

Terry Callaghan, Cameron Dunn and Margareta Johansson
