

BIOLOGICAL ANTHROPOLOGY

FOURTH EDITION

THE NATURAL HISTORY OF HUMANKIND

CRAIG STANFORD

JOHN S. ALLEN

SUSAN C. ANTÓN

Biological Anthropology: The Natural History of Humankind combines comprehensive coverage of the foundations of the field with modern innovations and discoveries, helping students understand, and get excited about, the discipline. Because the authors conduct research in three of the main areas of biological anthropology—the human fossil record (Susan Antón), primate behavior and ecology (Craig Stanford), and human biology and the brain (John Allen)—they offer a specialist approach that engages students and gives them everything they need to master the subject. The Fourth Edition continues to present traditional physical anthropology within a modern Darwinian framework, and includes coverage of contemporary discoveries to highlight the ever-increasing body of knowledge in biological anthropology.

| | |
|--|-----|
| Introduction: What Is Biological Anthropology? | 1 |
| PART I Mechanisms of Evolution | |
| 1 Origins of Evolutionary Thought | 13 |
| 2 Genetics: Cells and Molecules | 35 |
| 3 Genetics: From Genotype to Phenotype | 68 |
| 4 The Forces of Evolution and the Formation of Species | 96 |
| 5 Human Variation: Evolution, Adaptation, and Adaptability | 121 |
| PART II Primates | |
| 6 The Primates | 160 |
| 7 Primate Behavior | 202 |
| PART III Paleontology and Primate Evolution | |
| 8 Fossils in Geological Context | 226 |
| 9 Origin of Primates | 260 |
| PART IV The Human Fossil Record | |
| 10 Early Hominins | 291 |
| 11 Origin and Evolution of the Genus <i>Homo</i> | 331 |
| 12 Archaic <i>Homo sapiens</i> and Neandertals | 370 |
| 13 The Emergence and Dispersal of <i>Homo sapiens</i> | 406 |
| PART V New Frontiers in Biological Anthropology | |
| 14 Evolution of the Brain and Language | 439 |
| 15 Biomedical Anthropology | 467 |
| 16 The Evolution of Human Behavior | 497 |
| 17 Bioarchaeology and Forensic Anthropology | 526 |
