Preface

1. Land-use changes and ecosystem services	1
Paulo Pereira, Miguel Inacio, Marius Kalinauskas, Katažyna Bogdzevič, Igor Bogunovic and Wenwu Zhao	
1.1 Background	1
1.2 Regulating ecosystem services	3
1.3 Provisioning ecosystem services	9
1.4 Cultural ecosystem services	12
1.5 Concluding remarks	14
Acknowledgements	15
References	15
2. Future land use/cover changes and participatory planning	29
Eduardo Gomes, Arnaud Banos, Patrícia Abrantes and Jorge Rocha	
2.1 Introduction	29
2.2 The theoretical framework	30
2.2.1 Landscape transformations	30
2.2.2 Land use planning	31
2.2.3 Participatory planning: public participation and stakeholders' engagement	32
2.2.4 Land use/cover changes, geographic information systems and spatial modelling	33
2.3 Conceptual framework to develop a participatory planning process in future land use and land cover changes	39
2.3.1 Future land use and land cover changes and participatory planning	40
2.3.2 Limitations and uncertainties	43
2.3.3 Future work	43
2.4 Conclusion	43
Acknowledgement	44
Declaration of interest statement	44
References	44

3. Connecting peri-urban theory with policy: implications for practice	55
Michael Buxton	
3.1 Introduction	55
3.2 International development pressures	56
3.3 Towards peri-urban theory	58
3.4 The peri-urban as interface	62
3.5 Rural and urban perspectives	64
3.6 Structure and function	66
3.7 Resilience theory and peri-urban development	68
3.8 Theory and policy	71
3.8.1 Urban growth boundaries	71
3.8.2 Green belts	73
3.8.3 Peri-urban land uses	77
3.8.4 Production and consumption	79
3.9 Peri-urban practice	81
3.9.1 France	82
3.9.2 London green belt	82
3.9.3 North American examples	83
3.9.4 Australian examples	85
3.10 Conclusion — lessons learned	87
References	88
4. Spatial analysis, geospatial data and land-change models for modelling agricultural land changes	95
Cláudia M. Viana	
4.1 Introduction	95
4.2 Historical background of agricultural land systems research	96
4.3 Modelling agricultural land changes	97
4.3.1 Spatial analysis, geospatial data and land-change models	98
4.4 Agricultural land changes: the case study of Portugal	100
4.5 Conclusion	104
Funding	104
References	105
5. Identifying data challenges to representing human decision-making in large-scale land-use models	115
Derek T. Robinson, Jasper van Vliet, Calum Brown, Nicholas Dendoncker, Sascha Holzhauser, Darren Moseley, Gregor Vulturius and Mark D.A. Rounsevell	
5.1 Background	115

5.2	Agent types as a way to apply agent-based models to large geographic extents	117
5.3	Data acquisition for models based on agent types	119
5.4	Conclusion	121
	Acknowledgements	122
	References	122
6.	Land use change in Italian lowlands: a lesson of landscape transformation, climate change and hydrological extremes	127
	Anton Pijl and Paolo Tarolli	
6.1	Land transformation in one of Europe's most anthropogenic lowland society	127
6.1.1	Urban growth and the 'città diffusa'	128
6.1.2	Industrialisation in urban and rural contexts	130
6.1.3	Transformation of the agricultural landscape	131
6.1.4	Climate change: additional pressure on the agro-hydraulic system	133
6.2	Case study: quantifying the hydrological impacts in a Veneto subbasin	134
6.2.1	Reconstruction of historical and modern land use scenarios	134
6.2.2	Hydrological modelling workflow and climatic changes	136
6.2.3	Impact quantification of land use change over half a century	137
6.3	Challenges for sustainable land and water management	139
	References	140
7.	Drivers of land use and land cover changes in South America. A review focused on drylands	143
	Cecilia Rubio, Facundo Rojas, María Clara Rubio, Romina Sales, Fernanda Rubio, Luis Verdugo, Gabriel Greco and Facundo Martín	
7.1	Introduction	143
7.2	Methodological framework	148
7.3	Results	150
7.4	Conclusions and discussion	162
	Acknowledgements	164
	References	164
8.	Land-use modelling by CLUMondo under contrasting scenarios: a case study in the Yanhe watershed (China)	173
	Siqi Yang, Wenwu Zhao and Paulo Pereira	
8.1	Introduction	173
8.2	Materials and methods	174

8.2.1	Study area	174
8.2.2	Data preparation	175
8.2.3	Scenario setting and description	177
8.2.4	Model description	177
8.2.5	Land-use change calculation	181
8.3	Results	181
8.3.1	Model validation	181
8.3.2	Land-use dynamics from 2000 to 2028	183
8.3.3	Land-use changes under the three scenarios	186
8.4	Discussion	187
8.5	Conclusion	189
	Acknowledgements	189
	References	190
9.	Land use management for coastal flooding prevention: a participatory simulation platform applied to Camargue (France)	193
	Elise Beck, Amélie Monfort, Marion Amalric, Brice Anselme, Nicolas Becu, Ahmed Laatabi and Cécilia Pignon-Mussaud	
9.1	Introduction	193
9.2	General context and objective of the study	194
9.3	State of the art	195
9.4	Description of the LittoSIM platform	197
9.4.1	What is the LittoSIM platform?	197
9.4.2	What is a LittoSIM workshop session?	200
9.4.3	Land use management profiles in LittoSIM	200
9.4.4	Adaptation of LittoSIM platform to different geographical configurations	201
9.4.5	Evaluation methodology	202
9.5	The case study: LittoSIM-Camargue	202
9.5.1	Adapting LittoSIM to the Camargue area	202
9.5.2	Description of the initial conditions of the districts in the LittoSIM platform	205
9.5.3	Deployment of the LittoSIM workshop in Camargue	207
9.6	Results on land use change strategies	209
9.6.1	Change in land use management profiles	209
9.6.2	Scoring of the different land use strategies	211
9.6.3	Effects on flooded areas	213
9.7	Discussion	214
9.7.1	Discussion of the results of the workshop	214

9.7.2	LittoSIM, an innovative approach in Camargue	215
9.7.3	Limitations	216
9.8	Conclusion	217
	Acknowledgements	218
	References	219
10.	Setting up a Land Use Cover Change model application for Greater Sydney. Lessons learnt and challenges ahead	223
	David García-Álvarez, Christopher J. Pettit, Simone Zarpelon Leao and Hedwig Van Delden	
10.1	Introduction	223
10.2	Greater Sydney: a metropolis of three cities	224
10.3	The Metronamica modelling framework	226
10.4	Data	228
10.4.1	Land Use Cover maps	228
10.4.2	Factors	228
10.5	Model conceptualisation	229
10.5.1	The modelled transitions	229
10.5.2	The time frame	230
10.5.3	The spatial detail	231
10.5.4	The system regionalisation	231
10.5.5	The factors	232
10.6	Model calibration and validation	234
10.7	Discussion	235
10.7.1	The conceptual model: too simple?	235
10.7.2	The regionalisation of Greater Sydney	237
10.7.3	Developing scenarios useful for spatial and strategic planning	239
10.8	Conclusions	239
	Acknowledgements	240
	References	240
11.	Future land use/cover change and tourism development: integrating land use policy and tourist decision behaviour	243
	Inês Boavida-Portugal	
11.1	Background	243
11.2	Potential for coupling agent-based model and Cellular Automata in tourism land use/cover change research	245
11.3	Materials and methods	247

11.3.1	Case study description	247
11.3.2	Agent-based model for tourist decision-making	251
11.3.3	Cellular Automata scenario of tourism development impact on land use/cover change	252
11.3.4	Coupling Cellular Automata and agent-based models to simulate tourism demand—induced land use/cover change	254
11.4	Results	255
11.5	Discussion	258
11.6	Conclusions	261
	Acknowledgments	262
	References	262
12.	Modelling land use changes and impacts on the visual fragility of a UNESCO Landscape Heritage Site (Viñales, Cuba)	265
	Ricardo Remond-Noa, Roberto González-Sousa, Freddy Lemay Cámara-García, Nidia Cabrera, Carlos Quintana-Cortina and Juan F. Martínez-Murillo	
12.1	Introduction	265
12.2	Materials and methods	267
12.2.1	Study area	267
12.2.2	Data	269
12.2.3	Data processing	270
12.3	Results	278
12.3.1	Land use transformations in the heritage landscape area from 1999 to 2019	278
12.3.2	Prediction of urban growth	285
12.3.3	The impact of land use transformations on the visual landscapes of the heritage area	286
12.4	Discussion	289
12.5	Final remarks and conclusions	291
	References	292
13.	Land use and land cover change future projection in Kolkata Metropolitan Area, Eastern India	299
	Manob Das, Ashis Mandal, Arijit Das and Paulo Pereira	
13.1	Introduction	299
13.2	Materials and method	301
13.2.1	Study area: Kolkata Metropolitan Area	301
13.2.2	Framework, data sources and processing	303
13.2.3	Land use and land cover classification	303

13.2.4	Future projection of land use and land change	303
13.3	Results	305
13.3.1	Land Use/Land Cover Change in Kolkata Metropolitan Area	305
13.4	Discussion	307
13.4.1	Limitations and uncertainties	310
13.4.2	Implications for management	311
13.5	Conclusion	312
	References	313
	Index	321
