1 Introduction	1
-----------------------	----------

2 Stress and deprivation during the years of growth and development and adulthood	6
--	----------

2.1 Introduction	6
------------------	---

2.2 Growth and development: skeletal	8
--------------------------------------	---

2.3 Growth and development: dental	23
------------------------------------	----

2.4 Skeletal and dental pathological markers of deprivation	29
---	----

2.5 Adult stress	56
------------------	----

2.6 Summary and conclusions	61
-----------------------------	----

3 Exposure to infectious pathogens	64
---	-----------

3.1 Introduction	64
------------------	----

3.2 Dental caries	65
-------------------	----

3.3 Periodontal disease (periodontitis) and tooth loss	77
--	----

3.4 Nonspecific infection	82
---------------------------	----

3.5 Specific infectious diseases: treponematoses, tuberculosis, and leprosy	93
---	----

3.6 Summary and conclusions	107
-----------------------------	-----

4 Injury and violent death	109
-----------------------------------	------------

4.1 Introduction	109
------------------	-----

4.2 Accidental injury	110
-----------------------	-----

4.3 Intentional injury and interpersonal violence	119
---	-----

4.4 Medical care and surgical intervention	152
--	-----

4.5 Interpreting skeletal trauma	154
----------------------------------	-----

4.6 Summary and conclusions	159
-----------------------------	-----

5 Activity patterns: 1. Articular and muscular modifications	161
---	------------

5.1 Introduction	161
------------------	-----

5.2 Articular joints and their function	162
---	-----

5.3 Articular joint pathology	162
-------------------------------	-----

5.4	Nonpathological articular modifications	185
5.5	Nonarticular pathological conditions relating to activity	188
5.6	Summary and conclusions	193
6	Activity patterns: 2. Structural adaptation	195
6.1	Bone form and function	195
6.2	Cross-sectional geometry	197
6.3	Histomorphometric biomechanical adaptation	219
6.4	Behavioral inference from whole bone measurements	220
6.5	Summary and conclusions	224
7	Masticatory and nonmasticatory functions: craniofacial adaptation	226
7.1	Introduction	226
7.2	Cranial form and function	227
7.3	Dental and alveolar changes	242
7.4	Dental wear and function	247
7.5	Summary and conclusions	268
8	Isotopic and elemental signatures of diet and nutrition	270
8.1	Introduction	270
8.2	Isotopic analysis	271
8.3	Elemental analysis	290
8.4	Methodological issues in bioarchaeological chemistry	300
8.5	Summary and conclusions	300
9	Historical dimensions of skeletal variation: tracing genetic relationships	302
9.1	Introduction	302
9.2	Classes of biodistance data	305
9.3	Biohistorical issues: temporal perspectives	310
9.4	Biohistorical issues: spatial perspectives	324
9.5	Summary and conclusions	331
10	Changes and challenges in bioarchaeology	333
10.1	Introduction	333
10.2	Sample representation	334
10.3	Data recording standards	340
10.4	Bioarchaeology and cultural patrimony	341
