

Contents

1 Introduction	1
References	2
2 Notes to Theory and Data	5
2.1 Theory	5
2.2 Data—Gravity Field Models	9
2.3 Data—Magnetic Field Models	10
2.4 Data—Surface Topography Model	11
2.5 Our Figures	11
References	12
3 Gravitational Field of the Moon	15
3.1 Introductory Notes	15
3.2 From Historical Models to the Present Time	17
3.3 Main Characteristics of the Gravity Field of the Moon	18
References	21
4 Magnetic Field of the Moon	23
4.1 Introduction	23
4.2 Data—Magnetic Field	23
4.3 Origin of the Moon	24
References	25
5 Surface Topography of the Moon	27
References	30
6 Geology and Geomorphology of the Moon—A Necessary Introduction	33
6.1 Geology	33
6.2 Geomorphology	35
6.3 Earth Analogues	36
References	37

7	Geophysics of the Moon—A Necessary Introduction	39
7.1	Introduction to the Geophysics of the Moon	39
7.2	Magnetic Record of Lunar Samples	40
7.3	Water on the Moon	43
7.4	Conclusion	45
	References	46
8	Atlas of the Moon	49
8.1	Global Views	49
8.1.1	What Do the Maps Contain?	49
8.1.2	Notes: Observations Based on Figs. 81.1 to 81.8b	53
8.2	Segments	71
	References	231
9	Limits and Possibilities of Interpretation	233
9.1	Introduction	233
9.2	Mascons and Ghost Craters	234
9.3	Radial Structures	235
9.4	Polygonal Structures	237
9.5	The Significance of Strike Angles	240
9.6	Examples—Zooms	241
9.6.1	Introductory Notes	241
9.6.2	Copernicus Pair	242
9.6.3	Mare Crisium	245
9.6.4	South Pole–Aitken Basin (SPA)	249
9.6.5	Catena and Crater Michelson	252
9.6.6	Crater Schrödinger and Its Valleys	257
9.7	Concluding Remarks	259
	References	259
