TABLE OF ELEMENTS xix

Chapter I Understanding the Earth's Natural Resources: An Introduction I

Energy and Resources	3
Mineral Resources	3
Determination of Resource Prices	4
Resource Classification	6
Mineral Resources and Reserves	6
<i>Resource Evaluation</i>	7
Geochemical Cycles	8
<i>Water Cycle</i>	8
<i>Carbon Cycle</i>	8
Common Rocks	12
<i>Igneous Rocks</i>	13
<i>Sedimentary Rocks</i>	14
<i>Metamorphic Rocks</i>	14
Population Growth	16
<i>Mathematics of Growth</i>	17
<i>Fertility</i>	18
Distribution of People on the Earth as a Function of Time	19
<i>The Demographic Transition</i>	20
<i>Age Distribution of the Human Population</i>	21
The Earth's Human Carrying Capacity	22
Summary	24
Key Terms	25
Problems	25
References	26

Part One	Energy Resources	27
	<i>World Energy Consumption</i>	28
Chapter 2	Petroleum	31
	Organic Matter and Fossil Fuels	31
	<i>Petroleum Formation</i>	32
	<i>Fingerprinting Oil</i>	34
	Methods of Petroleum Source Rock Evaluation	34
	<i>Vitrinite Reflectance</i>	34
	<i>Van Krevelen Diagram</i>	34
	<i>Rock-Eval Pyrolysis</i>	35
	Age of Source Rocks	36
	Crude Oil Deposits	37
	Crude Oil Recovery	39
	<i>Operation of a Drill Rig</i>	40
	<i>Deepwater Production</i>	41
	<i>Primary Production</i>	42
	<i>Secondary Recovery</i>	42
	<i>Tertiary Recovery</i>	43
	<i>Abandonment</i>	43
	Peak Oil	44
	Oil Shale and Tar Sand	45
	<i>Oil Shale</i>	45
	<i>Tar Sand</i>	47
	Strategic Petroleum Reserve	48
	Crude Oil Refining	48
	Consumption and Production of Petroleum	50
	Summary	52
	Key Terms	53
	Problems	54
	References	54
Chapter 3	Natural Gas, Coal, and Related Resources	55
	Natural Gas	55
	<i>Conventional Natural Gas</i>	55
	<i>Unconventional Natural Gas</i>	55
	<i>Production and Reserves</i>	59
	<i>Hydrogen Gas Production</i>	60
	Coal	61
	<i>Coal Use</i>	61
	<i>Coal Formation</i>	61
	<i>Resource Location</i>	64
	<i>Production and Reserves</i>	65
	<i>Environmental Effects</i>	68
	Peat Resources	71
	Summary	72

Key Terms 73

Problems 73

References 74

Chapter 4 Alternative Energy Resources 75

Solar Energy 75

Low-Quality Solar Energy 76 *Turbines and Electrical Generators* 78 *Solar Power* 78

Fuel Cells for Energy and Hydrogen Gas 82

Water Power 84

Ocean Power 84 *Hydroelectric Power* 85

Electrical Power Grid 87

Wind Power 88

Concerns in Developing Wind Power 91

Biofuels 91

Ethanol 92

Geothermal Energy 93

Geothermal Power Plants 93 *Concerns in Developing Geothermal Power* 96 *Enhanced Geothermal Systems* 96 *Direct Use Geothermal* 97 *Geothermal Heat Pumps* 97

Total Cost of Electrical Production in the U.S. by Power Source 97

Summary 98

Key Terms 99

Problems 99

References 100

Chapter 5 Nuclear Power 101

Binding Energy 101

Nuclear Fission 101

Nuclear Fuel Cycle 102

Uranium (U) 102 *Radium and Radon* 103 *Uranium Ores* 103 *Uranium Prices* 105 *Uranium Reserves* 106 *Uranium Production* 107

Uranium Isotope Separation and Nuclear Fuel 108

Zirconium (Zr) and Hafnium (Hf) 108

Nuclear Reactor Types 108

Boiling Water Reactor 109 *Pressurized Water Reactor* 109

<i>Fast Neutron Reactor</i>	111
<i>Pebble Bed Reactor</i>	111
Reactor Operation	112
Nuclear Reactor Safety	112
<i>Three Mile Island Reactor Accident</i>	112
<i>Chernobyl Nuclear Accident</i>	113
<i>Fukushima Nuclear Accident</i>	113
Permanent Disposal of Concentrated Nuclear Waste	114
<i>Waste Isolation Pilot Plant</i>	115
<i>Civilian High-Level Waste</i>	115
<i>Reprocessing Spent Nuclear Fuel</i>	116
Thorium (Th)	116
Nuclear Power Production	117
Nuclear Radiation	119
<i>Radiation Exposure and Risks</i>	120
Nuclear Fusion	120
Summary	121
Key Terms	123
Problems	124
References	124
Part Two	Metals 125
Chapter 6	Abundant Metals 127
Iron (Fe)	128
Use	128
<i>Oxidation State of Iron in the Earth</i>	128
Resource Location	129
<i>Iron Minerals and Ore Deposits</i>	130
Production and Reserves	133
Aluminum (Al)	138
Use	139
Resource Location	139
Production and Reserves	140
Silicon (Si)	141
Use	141
Resource Location	142
Production and Reserves	142
Magnesium (Mg)	142
Use	143
Production and Reserves	143
Titanium (Ti)	145
Use	145
Production and Reserves	145

Manganese (Mn)	147
<i>Use</i>	147
<i>Resource Location</i>	147
<i>Production and Reserves</i>	147
Summary	148
Key Terms	150
Problems	150
References	151

Chapter 7 Scarce Metals: Ferro-Alloy Metals..... 153

Scarce Metals	153
<i>Common Ore Minerals</i>	153
<i>Sulfides</i>	153
<i>Concentration of Scarce Metal Ores</i>	156
Ferro-Alloys	159
Chromium (Cr)	159
<i>Use</i>	159
<i>Resource Location</i>	159
<i>Production and Reserves</i>	161
<i>Health Concerns</i>	162
Vanadium (V)	162
<i>Use</i>	162
<i>Resource Location</i>	162
<i>Production and Reserves</i>	163
<i>Health Concerns</i>	164
Nickel (Ni)	164
<i>Use</i>	164
<i>Resource Location</i>	164
<i>Production and Reserves</i>	168
Molybdenum (Mo)	169
<i>Use</i>	169
<i>Resource Location</i>	169
<i>Production and Reserves</i>	169
Cobalt (Co)	169
<i>Use</i>	170
<i>Resource Location</i>	170
<i>Production and Reserves</i>	172
Tungsten (W)	172
<i>Use</i>	172
<i>Resource Location</i>	173
<i>Production and Reserves</i>	174
Summary	174
Key Terms	175
Problems	176
References	176

Chapter 8 Scarce Metals: Base Metals 177

Copper (Cu)	177
Use	177
Resource Location	177
Production and Reserves	186
Lead (Pb)	186
Use	186
Resource Location	188
Production and Reserves	190
Health Effects	190
Zinc (Zn)	191
Use	191
Resource Location	192
Production and Reserves	192
Tin (Sn)	193
Use	193
Resource Location	193
Production and Reserves	194
Mercury (Hg)	194
Use	194
Resource Location	196
Production and Reserves	196
Health Concerns	197
Cadmium (Cd)	198
Use	198
Resource Location	198
Production and Reserves	198
Health Concerns	199
Fluorine (F)	199
Use	199
Resource Location	199
Production and Reserves	200
Summary	200
Key Terms	201
Problems	201
References	202

Chapter 9 Scarce Metals: Precious and Specialty Metals ... 203

Precious Metals	204
Gold (Au)	204
Use	204
Resource Location	205
Production and Reserves	209

Silver (Ag)	211
Use	211
Resource Location	212
Production and Reserves	214
Platinum Group Metals (Pt, Pd, Rh, Ir, Ru, Os)	215
Use	215
Resource Location	216
Production and Reserves	216
Specialty Metals	218
Pegmatite	218
Cesium (Cs)	218
Rhenium (Re)	218
Tellurium (Te)	219
Niobium (Nb) and Tantalum (Ta)	219
Arsenic (As)	221
Antimony (Sb)	222
Bismuth (Bi)	223
Use	223
Resource Location	223
Germanium (Ge), Gallium (Ga), and Indium (In)	224
Use	224
Beryllium (Be)	225
Rare Earth Elements	226
Summary	228
Key Terms	229
Problems	229
References	230

Part Three Life-Supporting Resources: Building and Industrial Material, Chemical Minerals, Fertilizer, and Gases 231

Chapter 10 Building Material and Industrial Minerals 233

Wood	233
Manufacture of Lumber	234
Stone	235
Building Stone	235
Construction Aggregates	236
Cement, Plaster, and Bricks	241
Portland Cement	241
Concrete	241
Plaster	242
Clay Products	243
Glass	245
Selenium (Se)	246
Glass Production	246

Asbestos	247
<i>Health Concerns and Demand</i>	247
Major Production Products	248
<i>Refractories</i>	248
<i>Foundry Sand</i>	249
<i>Fluxes</i>	249
<i>Mineral Fillers</i>	249
<i>Pigments</i>	250
<i>Graphite</i>	250
Diamonds and Other Abrasives	252
<i>Diamonds</i>	252
<i>Other Natural Abrasives</i>	254
Barite	254
Zeolites	255
<i>Production</i>	256
Gemstones	257
<i>Shapes and Cuts</i>	258
<i>Pearls</i>	258
<i>Turquoise</i>	259
<i>Garnet</i>	259
Summary	260
Key Terms	261
Problems	261
References	262

Chapter 11 *Chemicals from Evaporation of Water and Gaseous Elements from Air* 263

Resources from Evaporites	263
<i>Nonmarine Evaporates</i>	263
<i>Marine Evaporites</i>	267
Elements for Agriculture	273
<i>Major Agricultural Crops</i>	273
<i>Fertilizer Resources</i>	275
<i>Environmental Concerns of Fertilizers</i>	282
Gaseous Elements and Molecules from Air	283
<i>Use</i>	283
<i>Production</i>	284
Gases from Petroleum	284
<i>Helium (He)</i>	284
<i>Hydrogen (H₂)</i>	285
Summary	285
Key Terms	286
Problems	286
References	287

Part Four Water and Soil Resources 288

Chapter 12 The Distribution and Movement of Water 291

Global Distribution of Water 291

Hydrologic Cycle 292

Rainfall Patterns 293

Evapotranspiration 297

Groundwater 298

Vadose Zone 298

Aquifers 299

Groundwater Supply Problems 304

Rivers 307

River Sediments 310

Hydrograph 310

Floods and Flood Control 311

Water Transportation and Diversion Systems 313

Summary 320

Key Terms 322

Problems 322

References 322

Chapter 13 Water Quality, Usage, and Law 325

Water Composition and Quality 325

Rainwater 325

Rivers 327

Lakes 328

Groundwater 328

Seawater 329

Desalination of Water 329

Drinking Water Contaminants 330

Global Water Usage 335

United States Water Usage 336

Water Law 339

Water Law in the U.S. 339

International Water Law 340

Summary 342

Key Terms 343

Problems 343

References 344

Chapter 14 Soil as a Resource 345

Composition and Description 345

Soil Characteristics 345

Soil Classification 348

Soil Distribution 348

Soil Development	348
Physical Properties	352
Soil Organisms	353
Chemical Properties	353
Clays	356
Soil and Land Management	357
Land Reclamation and Restoration	358
Farmland	359
Degradation of Soils	361
Desertification	361
Soil Erosion	362
Salinization	365
Wetlands	366
Summary	369
Key Terms	369
Problems	370
References	371
 <i>Appendix A</i>	 <i>Prefix Multipliers for Metric Quantities</i>
	373
 <i>Appendix B</i>	 <i>Common Ore Minerals</i>
	375
 <i>Appendix C</i>	 <i>Energy and Power Conversion Factors</i>
	379
 <i>Appendix D</i>	 <i>U.S. Primary Drinking Water Standards</i>
	381
 <i>Glossary</i>	 391
 INDEX	 409
