Preface to the Second Edition	xx
Preface to the Third Edition	xx

INTRODUCTION

CHAPTER I. <i>A brief survey of the history of linguistics.</i>	1
CHAPTER II. <i>Data and aims of linguistics: connexions with related sciences.</i>	6
CHAPTER III. <i>The object of study.</i>	
1. On defining a language	8
2. Linguistic structure: its place among the facts of language	11
3. Languages and their place in human affairs. Semiology	15
CHAPTER IV. <i>Linguistics of language structure and linguistics of speech.</i>	18
CHAPTER V. <i>Internal and external elements of a language.</i>	21
CHAPTER VI. <i>Representation of a language by writing.</i>	
1. Why it is necessary to study this topic	24
2. The prestige of writing: reasons for its ascendancy over the spoken word	24
3. Systems of writing	26
4. Causes of inconsistency between spelling and pronunciation ...	27
5. Consequences of this inconsistency	29
CHAPTER VII. <i>Physiological phonetics.</i>	
1. Definition of the subject	32
2. Transcription	33
3. Writing as evidence	34

APPENDIX PRINCIPLES OF PHYSIOLOGICAL PHONETICS

CHAPTER I. <i>Sound types.</i>	
1. On defining speech sounds	39
2. The vocal apparatus and how it works	41

3. Classification of sounds by oral articulation	44
CHAPTER II. <i>Sounds in spoken sequences.</i>	
1. Necessity of studying sounds in spoken sequences	50
2. Adduction and abduction	52
3. Combinations of adduction and abduction in the spoken sequence	54
4. Syllabic boundaries and vocalic peaks	57
5. Criticism of theories of syllabification	58
6. Duration of adduction and abduction	59
7. Sounds of aperture 4. Diphthongs. Questions of spelling.	60
Editorial note	62

PART ONE GENERAL PRINCIPLES

CHAPTER I. <i>Nature of the linguistic sign.</i>	
1. Sign, signification, signal	65
2. First principle: the sign is arbitrary	67
3. Second principle: linear character of the signal	69
CHAPTER II. <i>Invariability and variability of the sign.</i>	
1. Invariability	71
2. Variability	74
CHAPTER III. <i>Static linguistics and evolutionary linguistics.</i>	
1. Internal duality of all sciences concerned with values	79
2. Internal duality and the history of linguistics	81
3. Examples of internal duality	83
4. Difference between the two orders illustrated by comparisons	87
5. Synchronic and diachronic linguistics. Their methods and principles contrasted	89
6. Synchronic laws and diachronic laws	90
7. Is there a panchronic point of view?	94
8. Consequences of the confusion of synchrony with diachrony ..	94
9. Conclusions	96

PART TWO SYNCHRONIC LINGUISTICS

CHAPTER I. <i>General observations.</i>	99
CHAPTER II. <i>Concrete entities of a language.</i>	
1. Entities and units. Definitions	101
2. Methods of delimitation	102
3. Practical difficulties of delimitation	103
4. Conclusion	105
CHAPTER III. <i>Identities, realities, values.</i>	106

CHAPTER IV. <i>Linguistic value.</i>	
1. The language as thought organised in sound	110
2. Linguistic value: conceptual aspects	112
3. Linguistic value: material aspects	116
4. The sign as a whole	118
CHAPTER V. <i>Syntagmatic relations and associative relations.</i>	
1. Definitions	121
2. Syntagmatic relations	122
3. Associative relations	123
CHAPTER VI. <i>The language mechanism.</i>	
1. Syntagmatic interdependences	126
2. Simultaneous functioning of both types of group	127
3. Absolute arbitrariness and relative arbitrariness	130
CHAPTER VII. <i>Grammar and its subdivisions.</i>	
1. Definitions. Traditional divisions	133
2. Rational divisions	135
CHAPTER VIII. <i>Abstract entities in grammar.</i>	136

PART THREE DIACHRONIC LINGUISTICS

CHAPTER I. <i>General observations.</i>	139
CHAPTER II. <i>Sound changes.</i>	
1. Their absolute regularity	143
2. Conditioning of sound changes	143
3. Methodological considerations	145
4. Causes of sound change	146
5. The scope of sound change is unpredictable	150
CHAPTER III. <i>Grammatical consequences of phonetic evolution.</i>	
1. Breaking grammatical links	152
2. Obliteration of word-composition	153
3. There are no phonetic doublets	154
4. Alternation	155
5. Laws of alternation	157
6. Alternation and grammatical link	159
CHAPTER IV. <i>Analogy.</i>	
1. Definition and examples	160
2. Analogies are not changes	162
3. Analogy as the creative principle in languages	164
CHAPTER V. <i>Analogy and evolution.</i>	
1. How an analogical innovation enters the language	167
2. Analogical innovations as symptoms of changes in interpretation	168
3. Analogy as a principle of renovation and conservation	170
CHAPTER VI. <i>Popular etymology.</i>	172

CHAPTER VII. *Agglutination.*

1. Definition175
2. Agglutination and analogy176

CHAPTER VIII. *Diachronic units, identities and realities.*178

APPENDICES

- A. *Subjective and objective analysis*182
- B. *Subjective analysis and determination of units smaller than the word*183
- C. *Etymology*187

PART FOUR GEOGRAPHICAL LINGUISTICS

CHAPTER I. *On the diversity of languages.*189CHAPTER II. *Geographical diversity: its complexity.*

1. Coexistence of several languages in the same place192
2. Literary language and local dialect193

CHAPTER III. *Causes of geographical diversity.*

1. Time, the essential cause196
2. Linguistic areas affected by time198
3. Dialects have no natural boundaries200
4. Languages have no natural boundaries202

CHAPTER IV. *Propagation of linguistic waves.*

1. Force of intercourse and parochialism204
2. A single principle underlying both forces206
3. Linguistic differentiation in separate areas206

PART FIVE QUESTIONS OF RETROSPECTIVE LINGUISTICS CONCLUSION

CHAPTER I. *The two perspectives of diachronic linguistics.*211CHAPTER II. *Earliest languages and prototypes.*214CHAPTER III. *Reconstructions.*

1. Their nature and purpose217
2. Degree of certainty of reconstructions219

CHAPTER IV. *Linguistic evidence in anthropology and prehistory.*

1. Languages and races221
2. Ethnicity222
3. Linguistic paleontology223
4. Linguistic types and group mentality225

CHAPTER V. *Language families and linguistic types.*227

INDEX231
