Section I

Special Issue

Designing Engineering Design Education in Canada

Guest Editors

**Christopher Rennick, Ada Hurst, Steve Lambert, Meagan Flus –
University of Waterloo, Ontario, Canada**

Editorial	1
<i>Ahmad Ibrahim</i>	
Guest Editorial	2–3
<i>Christopher Rennick, Ada Hurst, Steve Lambert and Meagan Flus</i>	
Overview of the Inaugural Canadian Design Workshop (CDW1): From Vision to Evaluation	4–13
<i>Christopher Rennick, Ada Hurst, Steven Lambert and Meagan Flus</i>	
Design at Scale in a First-Year Transdisciplinary Engineering Design Course	14–24
<i>Marnie V. Jamieson, Ahmed S. Ead, Aidan Rowe, Janice Miller-Young and Jason P. Carey</i>	
Development and Implementation of an Integrative and Experiential Design Project: Design, Build and Test a Scanning Tunneling Microscope	25–35
<i>Jennifer A. Coggan and Christopher Rennick</i>	
Hackathons as a Novel Pedagogy in Engineering Design Education	36–44
<i>Meagan Flus and Ada Hurst</i>	
Distilling Sustainable Design Concepts for Engineering Design Educators	45–55
<i>Jordan Nickel, P. Robert Duimering and Ada Hurst</i>	
Characterizing Engineering Design Activities Using Jonassen's Design Theory of Problem Solving	56–66
<i>Christopher Rennick, Gregory Litster, Ada Hurst, Carol C. W. Hulls and Sanjeev Bedi</i>	
A Qualitative Analysis of Collaborative Computer-Aided Design Experiences to Inform Teaching	67–80
<i>Kevin A. Leonardo and Alison Olechowski</i>	
On Teaching Tacit Knowledge in Engineering Design and Professional Practice	81–89
<i>M. V. Jamieson, M. Naef and J. M. Shaw</i>	

Section II

Contributions in: Spatial Skills, Embedded Systems, Sustainability, Personalized Learning, Engineering Identity, Depth of Discipline, Virtual Reality, Challenge-Based Learning, Cooperative Programs, Assessment, Academic Dishonesty, Depth vs. Breadth, Leadership, Entrepreneurship, Service Learning, Laboratory Work

Enhancing Undergraduate Engineering Students' Spatial Skills Through a New Virtual and Physical Manipulatives (VPM) Technology	90–100
<i>Ning Fang, Ahmad Farooq and Wade Goodridge</i>	
Introduction to Embedded Systems Course: An Engineering Design Approach	101–109
<i>M. A. Ali, O. Waqar, S. Afridi and N. Ali</i>	
Phenomenon- and Project-Based Learning Through the Lens of Sustainability	110–116
<i>Riadh Habash, Md Mahmud Hasan, Jonathan Chiasson and Milad Tannous</i>	
The Design and Implementation of an Intelligent Education Prototype for an Electronic Systems Course	117–129
<i>Dong Liang, Wenyan Li, Nan Wang, Jiaxuan Gao and Hao Jin</i>	
The Effect of a Caring Intervention on Engineering Identity: Insights from a One-Day Outreach Event with Elementary and Middle School Girl Scouts	130–144
<i>Maya E. Denton, Indu Venu Sabaraya, Navid B. Saleh and Mary Jo Kirisits</i>	

Depth of Discipline as an Influencing Factor of Engineering Identity	145–157
<i>Jenna Johnson, Lesley Strawderman, Reuben Burch, M. Jean Mohammadi-Aragh and Jennifer Easley</i>	
Development of Interactive Textbooks by Applying STEAM and Virtual Reality Concepts	158–170
<i>Chih-Chao Chung, Bo-Yuan Cheng, Yuh-Ming Cheng and Shi-Jer Lou</i>	
Applying Challenge Based Learning to Teach Mass Transfer	171–180
<i>Cristina Barrera, María Luisa Castelló Lucía Seguí, Ana Heredia and Jorge García-Hernández</i>	
Role of Cooperative Programs in the University-to-Career Transition: A Case Study in Construction Management Engineering Education	181–199
<i>M. E. Al-Atroush and Y. E. Ibrahim</i>	
Invigilated Lab Exams as an Effective Strategy to Reduce Academic Dishonesty	200–210
<i>María Sofía Martínez-García, Angel de Castro, Alberto Sanchez, Yasamin Ambrollahi and Javier Garrido</i>	
Specificity of Discipline as an Influence on Entry-Level Engineering Occupational Alignment	211–223
<i>Jenna Johnson, Lesley Strawderman, Reuben Burch, M. Jean Mohammadi-Aragh and Jennifer Easley</i>	
Uncovering the Hidden Curriculum of Leadership Education in Civil Engineering	224–236
<i>Madeline Polmear, Nicholas Clegorne and Denise R. Simmons</i>	
Application of Entrepreneurial Minded Learning Design Projects to Develop First-Year Engineering Students' Entrepreneurial Mindset	237–252
<i>Alexandra Jackson, Cheryl A. Bodnar, Scott Streiner, Kevin Dahm, Kaitlin Mallouk and Bruce Oestreich</i>	
Impact of Service Learning on Engineering Student Development	253–263
<i>Jennifer Benning, Christopher Shearer, Stuart Kellogg and William Oakes</i>	
Improving Student Learning Experience in Fluid Mechanics with Lecture/Lab Alignment and Post-Lab Discussion	264–282
<i>Ásdís Helgadóttir, Halldór Pálsson and Guðrún Geirsdóttir</i>	
Guide for Authors	283
