Contents

List of contributors	page	x
Preface		xiii
PART I Introductory perspectives		1
1 When is a landscape perspective important? LENORE FAHRIG		3
2 Incorporating geographical (biophysical) principles in studies of landscape systems JERZY SOLON		11
PART II Theory, experiments, and models in landscape ecology		21
3 Theory in landscape ecology R. V. O'NEILL		23
4 Hierarchy theory and the landscape... level? or, Words do matter ANTHONY W. KING		29
5 Equilibrium versus non-equilibrium landscapes H. H. SHUGART		36
6 Disturbances and landscapes: the little things count JOHN A. LUDWIG		42
7 Scale and an organism-centric focus for studying interspecific interactions in landscapes RALPH MAC NALLY		52
8 The role of experiments in landscape ecology ROLF A. IMS		70
9 Spatial modeling in landscape ecology JANA VERBOOM AND WIEGER WAMELINK		79

10	The promise of landscape modeling: successes, failures, and evolution DAVID J. MLADENOFF	90
PART III Landscape patterns		101
11	Landscape pattern: context and process ROY HAINES-YOUNG	103
12	The gradient concept of landscape structure KEVIN MCGARIGAL AND SAMUEL A. CUSHMAN	112
13	Perspectives on the use of land-cover data for ecological investigations THOMAS R. LOVELAND, ALISA L. GALLANT, AND JAMES E. VOGELMANN	120
PART IV Landscape dynamics on multiple scales		129
14	Landscape sensitivity and timescales of landscape change MICHAEL F. THOMAS	131
15	The time dimension in landscape ecology: cultural soils and spatial pattern in early landscapes DONALD A. DAVIDSON AND IAN A. SIMPSON	152
16	The legacy of landscape history: the role of paleoecological analysis HAZEL R. DELCOURT AND PAUL A. DELCOURT	159
17	Landscape ecology and global change RONALD P. NEILSON	167
PART V Applications of landscape ecology		179
18	Landscape ecology as the broker between information supply and management application FRANS KLIJN	181
19	Farmlands for farming and nature KATHRYN FREEMARK	193
20	Landscape ecology and forest management THOMAS R. CROW	201
21	Landscape ecology and wildlife management JØRUND ROLSTAD	208
22	Restoration ecology and landscape ecology RICHARD J. HOBBS	217

23	Conservation planning at the landscape scale CHRIS MARGULES	230
24	Landscape conservation: a new paradigm for the conservation of biodiversity KIMBERLY A. WITH	238
25	The “why?” and the “so what?” of riverine landscapes HENRI DÉCAMP	248
PART VI Cultural perspectives and landscape planning		257
26	The nature of lowland rivers: a search for river identity BAS PEDROLI	259
27	Using cultural knowledge to make new landscape patterns JOAN IVERSON NASSAUER	274
28	The critical divide: landscape policy and its implementation NANCY POLLOCK-ELLWAND	281
29	Landscape ecology: principles of cognition and the political-economic dimension JÁN OT’AHEL’	296
30	Integration of landscape ecology and landscape architecture: an evolutionary and reciprocal process JACK AHERN	307
31	Landscape ecology in land-use planning ROB H. G. JONGMAN	316
PART VII Retrospect and prospect		329
32	The land unit as a black box: a Pandora’s box? I. S. ZONNEVELD	331
33	Toward a transdisciplinary landscape science ZEV NAVEH	346
34	Toward fostering recognition of landscape ecology MICHAEL R. MOSS	355
35	Toward a unified landscape ecology JOHN A. WIENS	365
Index		374
