Some maths revision	xxxii
<b>1 Why is my evil lecturer forcing me to learn statistics?</b>	<b>1</b>
1.1. What will this chapter tell me? ①	1
1.2. What the hell am I doing here? I don't belong here ①	2
1.2.1. The research process ①	3
1.3. Initial observation: finding something that needs explaining ①	3
1.4. Generating theories and testing them ①	4
1.5. Data collection 1: what to measure ①	7
1.5.1. Variables ①	7
1.5.2. Measurement error ①	10
1.5.3. Validity and reliability ①	11
1.6. Data collection 2: how to measure ①	12
1.6.1. Correlational research methods ①	12
1.6.2. Experimental research methods ①	13
1.6.3. Randomization ①	17
1.7. Analysing data ①	18
1.7.1. Frequency distributions ①	18
1.7.2. The centre of a distribution ①	20
1.7.3. The dispersion in a distribution ①	23
1.7.4. Using a frequency distribution to go beyond the data ①	24
1.7.5. Fitting statistical models to the data ①	26
What have I discovered about statistics? ①	28
Key terms that I've discovered	28
Smart Alex's tasks	29
Further reading	29
Interesting real research	30

<b>2</b>	<b>Everything you ever wanted to know about statistics (well, sort of)</b>	<b>31</b>
2.1.	What will this chapter tell me? ①	31
2.2.	Building statistical models ①	32
2.3.	Populations and samples ①	34
2.4.	Simple statistical models ①	35
2.4.1.	The mean: a very simple statistical model ①	35
2.4.2.	Assessing the fit of the mean: sums of squares, variance and standard deviations ①	35
2.4.3.	Expressing the mean as a model ②	38
2.5.	Going beyond the data ①	40
2.5.1.	The standard error ①	40
2.5.2.	Confidence intervals ②	43
2.6.	Using statistical models to test research questions ①	48
2.6.1.	Test statistics ①	52
2.6.2.	One- and two-tailed tests ①	54
2.6.3.	Type I and Type II errors ①	55
2.6.4.	Effect sizes ②	56
2.6.5.	Statistical power ②	58
	What have I discovered about statistics? ①	59
	Key terms that I've discovered	59
	Smart Alex's tasks	59
	Further reading	60
	Interesting real research	60
<b>3</b>	<b>The SAS environment</b>	<b>61</b>
3.1.	What will this chapter tell me? ①	61
3.2.	Versions of SAS ①	62
3.3.	Getting started ①	62
3.4.	Libraries ①	63
3.5.	The program editor: getting data into SAS ①	65
3.5.1.	Entering words and numbers into SAS with the program editor ①	66
3.5.2.	Entering dates ①	69
3.6.	Entering data with Excel ①	71
3.6.1.	Saving the data ①	72
3.6.2.	Date formats ①	72
3.6.3.	Missing values ①	73
3.7.	The DATA step ①	73
3.8.	SAS formats ①	74
3.8.1.	Built in formats ①	74
3.8.2.	User-defined formats ①	76
3.9.	Variable labels ①	77
3.10.	More on DATA steps ①	79
3.10.1.	Calculating a new variable ①	79
3.10.2.	Conditional (If ...then...) statements ①	79
3.10.3.	Getting rid of variables ①	81
3.10.4.	Getting rid of cases ①	81

3.11.	Procs for checking data ①	81
3.12.	Output and results ①	82
3.13.	Looking at data with PROC CONTENTS ①	85
3.14.	What have I discovered about statistics? ①	85
3.15.	Key terms that I've discovered	86
3.16.	Smart Alex's tasks	86
3.17.	Further reading	87
<b>4</b>	<b>Exploring data with graphs</b>	<b>88</b>
4.1.	What will this chapter tell me? ①	88
4.2.	The art of presenting data ①	88
4.2.1.	What makes a good graph? ①	89
4.2.2.	Lies, damned lies, and ... erm ... graphs ①	91
4.3.	Charts in SAS ①	92
4.4.	Histograms: a good way to spot obvious problems ①	93
4.5.	Boxplots (box-whisker diagrams) ①	95
4.6.	Graphing means: bar charts and error bars ①	100
4.6.1.	Simple bar charts for independent means ①	100
4.6.2.	Clustered bar charts for independent means ①	101
4.6.3.	Simple bar charts for related means ①	102
4.6.4.	Clustered bar charts for 'mixed' designs ①	104
4.7.	Graphing relationships: the scatterplot ①	106
4.7.1.	Simple scatterplot ①	106
4.7.2.	Grouped scatterplot ①	108
4.7.3.	Simple and grouped 3-D scatterplots ①	108
4.7.4.	Matrix scatterplot ①	110
	What have I discovered about statistics? ①	111
	Key terms that I've discovered ①	112
	Smart Alex's tasks	112
	Further reading	112
	Interesting real research	112
<b>5</b>	<b>Exploring assumptions</b>	<b>113</b>
5.1.	What will this chapter tell me? ①	113
5.2.	What are assumptions? ①	114
5.3.	Assumptions of parametric data ①	114
5.4.	The assumption of normality ①	115
5.4.1.	Oh no, it's that pesky frequency distribution again: checking normality visually ①	116
5.4.2.	Quantifying normality with numbers ①	117
5.4.3.	Exploring groups of data ①	121
5.5.	Testing whether a distribution is normal ①	127
5.5.1.	Doing the Kolmogorov-Smirnov test on SAS ①	127
5.5.2.	Output from the explore procedure ①	128
5.5.3.	Reporting the K-S test ①	130
5.6.	Testing for homogeneity of variance ①	130
5.6.1.	Levene's test ①	131
5.7.	Correcting problems in the data ②	133

5.7.1.	Dealing with outliers ②	133
5.7.2.	Dealing with non-normality and unequal variances ②	134
5.7.3.	Transforming the data using SAS ②	136
5.7.4.	When it all goes horribly wrong ③	140
	What have I discovered about statistics? ①	142
	Key terms that I've discovered	143
	Smart Alex's tasks	143
	Further reading	143

## 6 Correlation 144

6.1.	What will this chapter tell me? ①	144
6.2.	Looking at relationships ①	145
6.3.	How do we measure relationships? ①	145
6.3.1.	A detour into the murky world of covariance ①	145
6.3.2.	Standardization and the correlation coefficient ①	147
6.3.3.	The significance of the correlation coefficient ③	149
6.3.4.	Confidence intervals for $r$ ③	150
6.3.5.	A word of warning about interpretation: causality ①	151
6.4.	Data entry for correlation analysis using SAS ①	152
6.5.	Bivariate correlation ①	152
6.5.1.	General procedure for running correlations on SAS ①	152
6.5.2.	Pearson's correlation coefficient ①	154
6.5.3.	Spearman's correlation coefficient ①	157
6.5.4.	Kendall's tau (non-parametric) ①	159
6.6.	Partial correlation ②	160
6.6.1.	The theory behind part and partial correlation ②	160
6.6.2.	Partial correlation using SAS ②	162
6.6.3.	Semi-partial (or part) correlations ②	163
6.7.	Comparing correlations ③	164
6.7.1.	Comparing independent $r$ s ③	164
6.7.2.	Comparing dependent $r$ s ③	165
6.8.	Calculating the effect size ①	166
6.9.	How to report correlation coefficients ①	166
	What have I discovered about statistics? ①	168
	Key terms that I've discovered	169
	Smart Alex's tasks	169
	Further reading	170
	Interesting real research	170

## 7 Regression 171

7.1.	What will this chapter tell me? ①	171
7.2.	An introduction to regression ①	172
7.2.1.	Some important information about straight lines ①	173
7.2.2.	The method of least squares ①	174
7.2.3.	Assessing the goodness of fit: sums of squares, $R$ and $R^2$ ①	175
7.2.4.	Assessing individual predictors ①	178

<b>7.3.</b>	Doing simple regression on SAS ①	179
<b>7.4.</b>	Interpreting a simple regression ①	180
7.4.1.	Overall fit of the model ①	180
7.4.2.	Model parameters ①	181
7.4.3.	Using the model ①	182
<b>7.5.</b>	Multiple regression: the basics ②	183
7.5.1.	An example of a multiple regression model ②	184
7.5.2.	Sums of squares, $R$ and $R^2$ ②	185
7.5.3.	Methods of regression ②	186
<b>7.6.</b>	How accurate is my regression model? ②	188
7.6.1.	Assessing the regression model I: diagnostics ②	188
7.6.2.	Assessing the regression model II: generalization ②	194
<b>7.7.</b>	How to do multiple regression using SAS ②	199
7.7.1.	Some things to think about before the analysis ②	199
7.7.2.	Main options ②	200
7.7.3.	Statistics ②	201
7.7.4.	Saving regression diagnostics ②	202
<b>7.8.</b>	Interpreting multiple regression ②	203
7.8.1.	Simple statistics ②	204
7.8.2.	Model parameters ②	207
7.8.3.	Comparing the models ①	211
7.8.4.	Assessing the issue of multicollinearity ①	211
7.8.5.	Casewise diagnostics ①	214
7.8.6.	Checking assumptions ②	216
<b>7.9.</b>	What if I violate an assumption? ②	221
<b>7.10.</b>	How to report multiple regression ②	221
<b>7.11.</b>	Categorical predictors and multiple regression ③	222
7.11.1.	Dummy coding ③	222
7.11.2.	SAS output for dummy variables ③	225
	What have I discovered about statistics? ①	228
	Key terms that I've discovered	229
	Smart Alex's tasks	229
	Further reading	230
	Interesting real research	230
<b>8</b>	<b>Logistic regression</b>	<b>231</b>
<b>8.1.</b>	What will this chapter tell me? ①	231
<b>8.2.</b>	Background to logistic regression ①	232
<b>8.3.</b>	What are the principles behind logistic regression? ③	232
8.3.1.	Assessing the model: the log-likelihood statistic ③	234
8.3.2.	Assessing the model: $R$ , $R^2$ and $c$ ③	235
8.3.3.	Assessing the contribution of predictors: the Wald statistic ②	237
8.3.4.	The odds ratio ③	238
<b>8.4.</b>	Assumptions and things that can go wrong ④	239
8.4.1.	Assumptions ②	239
8.4.2.	Incomplete information from the predictors ④	240
8.4.3.	Complete separation ④	240
<b>8.5.</b>	Binary logistic regression: an example that will make you feel eel ②	242

8.5.1.	The main analysis ②	243
8.5.2.	Obtaining predicted probabilities and residuals ②	244
8.5.3.	Final syntax	245
<b>8.6.</b>	Interpreting logistic regression ②	245
8.6.1.	The initial output ②	245
8.6.2.	Intervention	246
8.6.3.	Listing predicted probabilities ②	250
8.6.4.	Interpreting residuals ②	251
8.6.5.	Calculating the effect size ②	253
<b>8.7.</b>	How to report logistic regression ②	253
<b>8.8.</b>	Testing assumptions: another example ②	254
8.8.1.	Testing for linearity of the logit ③	255
8.8.2.	Testing the assumption of linearity of the logit	256
<b>8.9.</b>	Predicting several categories: multinomial logistic regression ③	258
8.9.1.	Running multinomial logistic regression in SAS ③	259
8.9.2.	The final touches ③	260
8.9.3.	Interpreting the multinomial logistic regression output ③	260
8.9.4.	Reporting the results ③	264
	What have I discovered about statistics? ①	265
	Key terms that I've discovered	265
	Smart Alex's tasks	265
	Further reading	267
	Interesting real research	267
<b>9</b>	<b>Comparing two means</b>	<b>268</b>
<b>9.1.</b>	What will this chapter tell me? ①	268
<b>9.2.</b>	Looking at differences ①	269
<b>9.3.</b>	The <i>t</i> -test ①	269
9.3.1.	Two example data sets ①	270
9.3.2.	Rationale for the <i>t</i> -test ①	271
9.3.3.	Assumptions of the <i>t</i> -test ①	273
<b>9.4.</b>	The dependent <i>t</i> -test ①	273
9.4.1.	Sampling distributions and the standard error ①	274
9.4.2.	The dependent <i>t</i> -test equation explained ①	274
9.4.3.	The dependent <i>t</i> -test and the assumption of normality ①	276
9.4.4.	Dependent <i>t</i> -tests using SAS ①	276
9.4.5.	Output from the dependent <i>t</i> -test ①	277
9.4.6.	Calculating the effect size ②	278
9.4.7.	Reporting the dependent <i>t</i> -test ①	279
<b>9.5.</b>	The independent <i>t</i> -test ①	280
9.5.1.	The independent <i>t</i> -test equation explained ①	280
9.5.2.	The independent <i>t</i> -test using SAS ①	284
9.5.3.	Output from the independent <i>t</i> -test ①	285
9.5.4.	Calculating the effect size ②	286
9.5.5.	Reporting the independent <i>t</i> -test ①	287
<b>9.6.</b>	Between groups or repeated measures? ①	288
<b>9.7.</b>	The <i>t</i> -test as a general linear model ②	288
<b>9.8.</b>	What if my data are not normally distributed? ②	290
	What have I discovered about statistics? ①	291
	Key terms that I've discovered	291

Smart Alex's task	291
Further reading	292
Interesting real research	292
<b>10 Comparing several means: ANOVA (GLM 1)</b>	<b>293</b>
10.1. What will this chapter tell me? ①	293
10.2. The theory behind ANOVA ②	294
10.2.1. Inflated error rates ②	294
10.2.2. Interpreting $F$ ②	295
10.2.3. ANOVA as regression ②	295
10.2.4. Logic of the $F$ -ratio ②	300
10.2.5. Total sum of squares ( $SS_T$ ) ②	302
10.2.6. Model sum of squares ( $SS_M$ ) ②	302
10.2.7. Residual sum of squares ( $SS_R$ ) ②	303
10.2.8. Mean squares ②	304
10.2.9. The $F$ -ratio ②	304
10.2.10. Assumptions of ANOVA ③	305
10.2.11. Planned contrasts ②	306
10.2.12. <i>Post hoc</i> procedures ②	317
10.3. Running one-way ANOVA on SAS ②	319
10.3.1. Planned comparisons using SAS ②	320
10.3.2. <i>Post hoc</i> tests in SAS ②	322
10.3.3. Options ②	322
10.3.4. ODS graphics ②	323
10.4. Output from one-way ANOVA ②	324
10.4.1. Output for the main analysis ②	324
10.4.2. Output for trends and planned comparisons ②	327
10.4.3. Output for <i>post hoc</i> tests ②	328
10.4.4. Graph output for one-way ANOVA using PROC GLM ②	330
10.5. Calculating the effect size ②	331
10.6. Reporting results from one-way independent ANOVA ②	333
10.7. Violations of assumptions in one-way independent ANOVA ②	333
What have I discovered about statistics? ①	334
Key terms that I've discovered	334
Smart Alex's tasks	335
Further reading	336
Interesting real research	336
<b>11 Analysis of covariance, ANCOVA (GLM 2)</b>	<b>337</b>
11.1. What will this chapter tell me? ②	337
11.2. What is ANCOVA? ②	338
11.3. Assumptions and issues in ANCOVA ③	339
11.3.1. Independence of the covariate and treatment effect ③	339
11.3.2. Homogeneity of regression slopes ③	341
11.4. Conducting ANCOVA on SAS ②	341
11.4.1. Inputting data ①	341
11.4.2. Initial considerations: testing the independence of the independent variable and covariate ②	343
11.4.3. The main analysis ②	344

11.4.4.	Contrasts and other options ②	344
<b>11.5.</b>	Interpreting the output from ANCOVA ②	345
11.5.1.	What happens when the covariate is excluded? ②	345
11.5.2.	The main analysis ②	346
11.5.3.	Contrasts ②	348
11.5.4.	Interpreting the covariate ②	349
<b>11.6.</b>	ANCOVA run as a multiple regression ②	351
<b>11.7.</b>	Testing the assumption of homogeneity of regression slopes ③	351
<b>11.8.</b>	Calculating the effect size ②	353
<b>11.9.</b>	Reporting results ②	355
<b>11.10.</b>	What to do when assumptions are violated in ANCOVA ③	356
	What have I discovered about statistics? ②	356
	Key terms that I've discovered	357
	Smart Alex's tasks	357
	Further reading	358
	Interesting real research	358
<b>12</b>	<b>Factorial ANOVA (GLM 3)</b>	<b>359</b>
<b>12.1.</b>	What will this chapter tell me? ②	359
<b>12.2.</b>	Theory of factorial ANOVA (between groups) ②	360
12.2.1.	Factorial designs ②	360
12.2.2.	An example with two independent variables ②	361
12.2.3.	Total sums of squares ( $SS_T$ ) ②	362
12.2.4.	The model sum of squares ( $SS_M$ ) ②	364
12.2.5.	The residual sum of squares ( $SS_R$ ) ②	366
12.2.6.	The $F$ -ratios ②	367
<b>12.3.</b>	Factorial ANOVA using SAS ②	368
12.3.1.	Exploring the data: PROC MEANS ②	368
12.3.2.	Contrasts and estimates ②	369
12.3.3.	<i>Post hoc</i> tests ②	370
12.3.4.	Simple effects ②	371
12.3.5.	ODS graphics ②	371
<b>12.4.</b>	Output from factorial ANOVA ②	372
12.4.1.	The main ANOVA tables ②	372
12.4.2.	Contrasts	375
12.4.3.	Least squares means and <i>post hoc</i> analysis ②	375
12.4.4.	Simple effects	377
12.4.5.	Summary	378
<b>12.5.</b>	Interpreting interaction graphs ②	379
<b>12.6.</b>	Calculating effect sizes ③	382
<b>12.7.</b>	Reporting the results of two-way ANOVA ②	384
<b>12.8.</b>	Factorial ANOVA as regression ③	384
<b>12.9.</b>	What to do when assumptions are violated in factorial ANOVA ③	388
	What have I discovered about statistics? ②	390
	Key terms that I've discovered	390
	Smart Alex's tasks	390
	Further reading	391
	Interesting real research	392

<b>13</b>	<b>Repeated-measures designs (GLM 4)</b>	<b>393</b>
13.1.	What will this chapter tell me? ②	393
13.2.	Introduction to repeated measures designs ②	394
13.2.1.	The assumption of sphericity ②	395
13.2.2.	How is sphericity measured? ②	395
13.2.3.	Assessing the severity of departures from sphericity ②	396
13.2.4.	What is the effect of violating the assumption of sphericity? ③	396
13.2.5.	What do you do if you violate sphericity? ②	397
13.3.	Theory of one-way repeated measures ANOVA ②	398
13.3.1.	The total sum of squares ( $SS_T$ ) ②	400
13.3.2.	The within-participant sum of squares ( $SS_W$ ) ②	401
13.3.3.	The model sum of squares ( $SS_M$ ) ②	402
13.3.4.	The residual sum of squares ( $SS_R$ ) ②	403
13.3.5.	The mean squares ②	403
13.3.6.	The $F$ -ratio ②	403
13.3.7.	The between-participant sum of squares ②	404
13.4.	One-way repeated-measures ANOVA using SAS ②	404
13.4.1.	The main analysis ②	404
13.4.2.	Defining contrasts for repeated measures ②	405
13.5.	Output for one-way repeated-measures ANOVA ②	407
13.5.1.	Model description	407
13.5.2.	Assessing and correcting for sphericity: Mauchly's test ②	408
13.5.3.	The main ANOVA ②	409
13.5.4.	Contrasts ②	411
13.6.	Effect sizes for repeated-measures ANOVA ③	414
13.7.	Reporting one-way repeated-measures ANOVA ②	415
13.8.	Repeated-measures with several independent variables ②	416
13.8.1.	Calculating and comparing means ②	418
13.8.2.	The main analysis ②	419
13.9.	Output for factorial repeated-measures ANOVA ②	421
13.9.1.	Descriptive statistics ②	421
13.9.2.	Main analysis ②	422
13.9.3.	The effect of drink ②	424
13.9.4.	The effect of imagery ②	424
13.9.5.	The interaction effect (drink $\times$ imagery) ②	424
13.9.6.	Contrasts for repeated-measures variables ②	426
13.10.	Effect sizes for factorial repeated-measures ANOVA ③	430
13.11.	Reporting the results from factorial repeated-measures ANOVA ②	431
13.12.	What to do when assumptions are violated in repeated-measures ANOVA ③	432
	What have I discovered about statistics? ②	432
	Key terms that I've discovered	433
	Smart Alex's tasks	433
	Further reading	434
	Interesting real research	435
<b>14</b>	<b>Mixed design ANOVA (GLM 5)</b>	<b>436</b>
14.1.	What will this chapter tell me? ①	436
14.2.	Mixed designs ②	437

<b>14.3.</b>	What do men and women look for in a partner? ②	438
<b>14.4.</b>	Mixed ANOVA on SAS ②	438
<b>14.5.</b>	Output for mixed factorial ANOVA: main analysis ③	441
14.5.1.	The main effect of gender ②	443
14.5.2.	The main effect of looks ②	445
14.5.3.	The main effect of charisma ②	447
14.5.4.	The interaction between gender and looks ②	447
14.5.5.	The interaction between gender and charisma ②	449
14.5.6.	The interaction between attractiveness and charisma ②	550
14.5.7.	The interaction between looks, charisma and gender ③	453
14.5.8.	Conclusions ③	457
<b>14.6.</b>	Calculating effect sizes ③	458
<b>14.7.</b>	Reporting the results of mixed ANOVA ②	459
<b>14.8.</b>	What to do when assumptions are violated in mixed ANOVA ③	462
	What have I discovered about statistics? ②	462
	Key terms that I've discovered	463
	Smart Alex's tasks	463
	Further reading	464
	Interesting real research	464
<b>15</b>	<b>Non-parametric tests</b>	<b>465</b>
<b>15.1.</b>	What will this chapter tell me? ①	465
<b>15.2.</b>	When to use non-parametric tests ①	466
<b>15.3.</b>	Comparing two independent conditions: the Wilcoxon rank-sum test and Mann–Whitney test ①	466
15.3.1.	Theory ②	468
15.3.2.	Inputting data and provisional analysis ①	471
15.3.3.	Running the analysis ①	473
15.3.4.	Output from the Wilcoxon two-sample test ①	474
15.3.5.	Calculating an effect size ②	476
15.3.6.	Writing the results ①	476
<b>15.4.</b>	Comparing two related conditions: the Wilcoxon signed-rank test ①	478
15.4.1.	Theory of the Wilcoxon signed-rank test ②	478
15.4.2.	Running the analysis ①	481
15.4.3.	Output for the alcohol group ①	481
15.4.4.	Output for the ecstasy group ①	482
15.4.5.	Writing the results ①	482
<b>15.5.</b>	Differences between several independent groups: the Kruskal–Wallis test ①	483
15.5.1.	Theory of the Kruskal–Wallis test ②	484
15.5.2.	Inputting data and provisional analysis ①	486
15.5.3.	Doing the Kruskal–Wallis test on SAS ①	487
15.5.4.	Output from the Kruskal–Wallis test ①	487
15.5.5.	<i>Post hoc</i> tests for the Kruskal–Wallis test ②	488
15.5.6.	Writing and interpreting the results ①	492
<b>15.6.</b>	Differences between several related groups: Friedman's ANOVA ①	493
15.6.1.	Theory of Friedman's ANOVA ②	494
15.6.2.	Inputting data and provisional analysis ①	495
15.6.3.	Doing Friedman's ANOVA on SAS ①	496

15.6.4.	Output from Friedman's ANOVA ①	497
15.6.5.	<i>Post hoc</i> tests for Friedman's ANOVA ②	498
15.6.6.	Writing and interpreting the results ①	500
	What have I discovered about statistics? ①	500
	Key terms that I've discovered	501
	Smart Alex's tasks	501
	Further reading	502
	Interesting real research	502
<b>16</b>	<b>Multivariate analysis of variance (MANOVA)</b>	<b>503</b>
16.1.	What will this chapter tell me? ②	503
16.2.	When to use MANOVA ②	504
16.3.	Introduction: similarities and differences to ANOVA ②	504
16.3.1.	Words of warning ②	506
16.3.2.	The example for this chapter ②	506
16.4.	Theory of MANOVA ③	507
16.4.1.	Introduction to matrices ③	507
16.4.2.	Some important matrices and their functions ③	509
16.4.3.	Calculating MANOVA by hand: a worked example ③	510
16.4.4.	Principle of the MANOVA test statistic ④	517
16.5.	Practical issues when conducting MANOVA ③	522
16.5.1.	Assumptions and how to check them ③	522
16.5.2.	Choosing a test statistic ③	523
16.5.3.	Follow-up analysis ③	524
16.6.	MANOVA on SAS ②	524
16.6.1.	The main analysis ②	525
16.6.2.	Multiple comparisons in MANOVA ②	525
16.7.	Output from MANOVA ③	526
16.7.1.	Preliminary analysis and testing assumptions ③	526
16.7.2.	MANOVA test statistics ③	527
16.7.3.	Univariate test statistics ②	528
16.7.4.	SSCP matrices ③	529
16.7.5.	Contrasts ③	530
16.8.	Box's test ③	531
16.9.	Reporting results from MANOVA ②	532
16.10.	Following up MANOVA with discriminant function analysis ③	533
16.11.	Output from the discriminant function analysis ④	533
16.12.	Reporting results from discriminant function analysis ②	536
16.13.	Some final remarks ④	536
16.13.1.	The final interpretation ④	536
16.13.2.	Univariate ANOVA or discriminant function analysis?	537
16.14.	What to do when assumptions are violated in MANOVA ③	537
	What have I discovered about statistics? ②	539
	Key terms that I've discovered	539
	Smart Alex's tasks	540
	Further reading	540
	Interesting real research	540

<b>17</b>	<b>Exploratory factor analysis</b>	<b>541</b>
17.1.	What will this chapter tell me? ①	541
17.2.	When to use factor analysis ②	542
17.3.	Factors ②	542
17.3.1.	Graphical representation of factors ②	544
17.3.2.	Mathematical representation of factors ②	545
17.3.3.	Factor scores ②	547
17.4.	Discovering factors ②	548
17.4.1.	Choosing a method ②	548
17.4.2.	Communality ②	549
17.4.3.	Factor analysis vs. principal component analysis ②	550
17.4.4.	Theory behind principal component analysis ③	551
17.4.5.	Factor extraction: eigenvalues and the scree plot ②	552
17.4.6.	Improving interpretation: factor rotation ③	554
17.5.	Research example ②	557
17.5.1.	Before you begin ②	559
17.6.	Running the analysis ②	562
17.6.1.	Factor extraction on SAS ②	562
17.6.2.	Rotation ②	563
17.6.3.	Saving factor scores	563
17.7.	Interpreting output from SAS	564
17.7.1.	Preliminary analysis ②	566
17.7.2.	Factor extraction ②	567
17.7.3.	Factor rotation ②	573
17.7.4.	Factor scores ②	578
17.7.5.	Summary ②	579
17.8.	How to report factor analysis ①	579
17.9.	Reliability analysis ②	582
17.9.1.	Measures of reliability ③	582
17.9.2.	Interpreting Cronbach's $\alpha$ (some cautionary tales) ②	583
17.9.3.	Reliability analysis on SAS ②	585
17.9.4.	Interpreting the output ②	585
17.10.	How to report reliability analysis ②	589
	What have I discovered about statistics? ②	590
	Key terms that I've discovered	590
	Smart Alex's tasks	591
	Further reading	593
	Interesting real research	593
<b>18</b>	<b>Categorical data</b>	<b>594</b>
18.1.	What will this chapter tell me? ①	594
18.2.	Analysing categorical data ①	595
18.3.	Theory of analysing categorical data ①	595
18.3.1.	Pearson's chi-square test ①	596
18.3.2.	Fisher's exact test ①	598
18.3.3.	The likelihood ratio ②	598
18.3.4.	Yates's correction ②	599

<b>18.4.</b>	Assumptions of the chi-square test ①	599
<b>18.5.</b>	Doing chi-square on SAS ①	600
18.5.1.	Entering data: raw scores ①	600
18.5.2.	Entering data: weight cases ①	600
18.5.3.	Running the analysis ①	601
18.5.4.	Output for the chi-square test ①	601
18.5.5.	Breaking down a significant chi-square test with standardized residuals ②	604
18.5.6.	Calculating an effect size ②	606
18.5.7.	Reporting the results of chi-square ①	607
<b>18.6.</b>	Several categorical variables: loglinear analysis ③	609
18.6.1.	Chi-square as regression ④	609
18.6.2.	Loglinear analysis ③	615
<b>18.7.</b>	Assumptions in loglinear analysis ②	617
<b>18.8.</b>	Loglinear analysis using SAS ②	617
18.8.1.	Initial considerations ②	617
18.8.2.	The loglinear analysis ②	619
<b>18.9.</b>	Output from loglinear analysis ③	620
<b>18.10.</b>	Following up loglinear analysis ②	624
<b>18.11.</b>	Effect sizes in loglinear analysis ②	625
<b>18.12.</b>	Reporting the results of loglinear analysis ②	626
	What have I discovered about statistics? ①	626
	Key terms that I've discovered	627
	Smart Alex's tasks	627
	Further reading	628
	Interesting real research	628
<b>19</b>	<b>Multilevel linear models</b>	<b>629</b>
<b>19.1.</b>	What will this chapter tell me? ①	629
<b>19.2.</b>	Hierarchical data ②	630
19.2.1.	The intraclass correlation ②	632
19.2.2.	Benefits of multilevel models ②	633
<b>19.3.</b>	Theory of multilevel linear models ③	634
19.3.1.	An example ②	634
19.3.2.	Fixed and random coefficients ③	636
<b>19.4.</b>	The multilevel model ④	638
19.4.1.	Assessing the fit and comparing multilevel models ④	641
19.4.2.	Types of covariance structures ④	641
<b>19.5.</b>	Some practical issues ③	643
19.5.1.	Assumptions ③	643
19.5.2.	Sample size and power ③	644
19.5.3.	Centring variables ④	644
<b>19.6.</b>	Multilevel modelling on SAS ④	645
19.6.1.	Entering the data ②	646
19.6.2.	Ignoring the data structure: ANOVA ②	646
19.6.3.	Ignoring the data structure: ANCOVA ②	648
19.6.4.	Factoring in the data structure: random intercepts ③	650
19.6.5.	Factoring in the data structure: random intercepts and slopes ④	652
19.6.6.	Adding an interaction to the model ④	659

19.7.	Growth models ④	662
19.7.1.	Growth curves (polynomials) ④	662
19.7.2.	An example: the honeymoon period ②	663
19.7.3.	Restructuring the data ③	664
19.7.4.	Running a growth model on SAS ④	667
19.7.5.	Further analysis ④	670
19.8.	How to report a multilevel model ③	672
	What have I discovered about statistics? ②	673
	Key terms that I've discovered	674
	Smart Alex's tasks	674
	Further reading	674
	Interesting real research	675
	Epilogue: Life after Discovering Statistics	676
	Glossary	679
	Appendix	695
A.1.	Table of the standard normal distribution	695
A.2.	Critical values of the <i>t</i> -distribution	701
A.3.	Critical values of the <i>F</i> -distribution	702
A.4.	Critical values of the chi-square distribution	706
