

Contents

Contributors	xiii
Preface	xvii
Acknowledgments	xxi
1 Disturbance and Succession	1
<i>Edward A. Johnson and Kiyoko Miyanishi</i>	
Introduction	1
Disturbance as the Nemesis of Succession	2
The Chronosequence Basis of Succession	5
Coupling Disturbance and Vegetation Processes	6
Conclusion	10
2 The Turbulent Wind in Plant and Forest Canopies	15
<i>John J. Finnigan</i>	
Introduction	15
The Structure of the Atmospheric Boundary Layer	
Over Land	17
Characteristics of Turbulent Flow In and Above Plant	
Canopies	22
Effects of Topography and Heterogeneity	36
Implications of This Velocity Structure for Canopy	
Disturbance	49
Summary	54

3	Microbursts and Macrobursts: Windstorms and Blowdowns	59
	<i>Mark R. Hjelmfelt</i>	
	Introduction	59
	Convective Storms and Downbursts	60
	Vertical Equation of Motion	68
	Climatology	71
	Downdrafts, Mesocyclones, and Outflows	75
	Microbursts	80
	Large-Scale Systems	87
	Summary	95
4	Understanding How the Interaction of Wind and Trees Results in Windthrow, Stem Breakage, and Canopy Gap Formation	103
	<i>Christopher P. Quine and Barry A. Gardiner</i>	
	Introduction	103
	Theoretical Core	107
	Applied Force	110
	Resistive Force	123
	Direct Consequences	128
	Subsequent Impact of Windthrow, Stem Breakage, and Gap/Patch Formation	137
	Summary and Conclusions	141
	Appendix 1: Glossary and Definitions	153
5	Meteorological Conditions Associated with Ice Storm Damage to Forests	157
	<i>Kaz Higuchi and Amir Shabbar</i>	
	Introduction	157
	Synoptic Conditions for Freezing Rain	158
	Climatology of Freezing Rain in Canada	167
	Meteorological Evolution of Ice Storm '98	169
	Possible Changes in Ice Storm Frequency Under a Warming Climate	176
	Summary	177
6	The Effect of Icing Events on the Death and Regeneration of North American Trees	181
	<i>David F. Greene, Kathleen F. Jones, and Olga J. Proulx</i>	
	Introduction	181
	The Biomechanics of Branch Breakage During Ice Events With and Without Wind	185

Ice Measurements in the Field	200
A Review of the Literature on Tree Damage Caused By Icing Events	201
The Population Consequences of Major Ice Events	206
7 Disturbance Processes and Dynamics in Coastal Dunes	215
<i>Patrick A. Hesp and M. Luisa Martínez</i>	
Introduction	215
Dune Types and Disturbance Types and Processes	216
Conclusion	240
8 Coastal Dune Succession and the Reality of Dune Processes	249
<i>Kiyoko Miyanishi and Edward A. Johnson</i>	
Introduction	249
Traditional Dune Succession Hypothesis	252
Problems with the Dune Succession Hypothesis	255
Process-Response Alternative to Traditional Succession Hypothesis	261
Conclusion	273
9 Fluvial Geomorphic Disturbances and Life History Traits of Riparian Tree Species	283
<i>Futoshi Nakamura and Satomi Inahara</i>	
Introduction	283
Geomorphic Classification of Riparian Zones and Disturbance Regimes in A Catchment	286
Disturbance, Reliability of Regeneration Habitat, and Life History of Dominant Tree Species	290
Conclusion	304
10 Water Level Changes in Ponds and Lakes: The Hydrological Processes	311
<i>Masaki Hayashi and Garth van der Kamp</i>	
Introduction	311
Water Balance	312
Case Study: Northern Prairie Wetlands	329
Conclusions	334

11	Development of Post-Disturbance Vegetation in Prairie Wetlands	341
	<i>Arnold G. van der Valk</i>	
	Introduction	341
	Wet-Dry Cycles	344
	Marsh Ecology Research Program	345
	Coenocline Development: Same Pre- and Post-Disturbance Water Levels	348
	Coenocline Development: Different Pre- and Post-Disturbance Water Levels	357
	Models of Coenocline Development	362
	Conclusions	366
12	Modeling Heating Effects	371
	<i>Geoffry N. Mercer and Rodney O. Weber</i>	
	Introduction	371
	Conservation Laws	372
	Simple Examples	373
	Application to More Realistic Scenarios	382
	Case Study: A Model of Seed Survival	387
	Conclusion	392
	Appendix: Notation	393
13	Fire Effects on Grasslands	397
	<i>Paul H. Zedler</i>	
	Introduction	397
	The Grass Growth Form	399
	Regeneration from Seed	403
	Grasses as Fuel, Mulch, and Forage	405
	Drought Disturbance: A Primary Driver	413
	Direct Fire Effects	415
	Grassfire and Nutrients	424
	Grasses and Woody Plants	425
	A Final Caution—Grasses and Fires	430
14	Wildfire and Tree Population Processes	441
	<i>Sheri L. Gutsell and Edward A. Johnson</i>	
	Introduction	441
	Wildfire Processes and Characteristics	443
	Local Populations and Processes	455
	Regional Populations and Processes	471
	Conclusions	477

15	Insect Defoliators as Periodic Disturbances in Northern Forest Ecosystems	487
	<i>Barry J. Cooke, Vincent G. Nealis, and Jacques Régnière</i>	
	Introduction	487
	Defoliating Insects as a Distinct Class of Forest Disturbance	491
	The Process of Insect Disturbance	495
	Population Dynamics of Foliage-Grazers	502
	Conclusion	518
16	Dynamics of Mountain Pine Beetle Outbreaks	527
	<i>Justin Heavilin, James Powell, and Jesse A. Logan</i>	
	Introduction	527
	Derivation of the Red Top Model	531
	Results of the Fully Developed Model	547
	Discussion and Conclusion	550
17	Relationship Between Spruce Budworm Outbreaks and Forest Dynamics in Eastern North America	555
	<i>Hubert Morin, Yves Jardon, and Réjean Gagnon</i>	
	Introduction	555
	History of Spruce Budworm Outbreaks Over the Past 8600 Years	559
	Variation in Temporal and Spatial Dynamics of Outbreaks: Reflection of Changes in Forest Structure	564
18	Impact of Beaver (<i>Castor canadensis</i> Kuhl) Foraging on Species Composition of Boreal Forests	579
	<i>Noble T. Donkor</i>	
	Introduction	579
	Herbivory in Boreal Forests	581
	Temporal Changes in Beaver Populations	582
	Traditional Understanding of Beaver Foraging Impact on Plant Community Structure	585
	Understanding Beaver Foraging Impacts on Composition and Dynamics of the Boreal Forest	588
	Conclusion	597

19	Beaver, Willow Shrubs, and Floods	603
	<i>J. Dungan Smith</i>	
	Introduction	603
	Background	607
	Theory for Interaction of Flow and Shrubs	622
	Model Results	638
	Discussion	648
	Summary and Conclusions	667
	Index	673
	16	Dynamics of Mountain Pine Beetle Outbreaks
		Introduction
		Derivation of the Red Top Model
		Results of the Fully Decoupled Model and the Red Top Model
		Discussion and Conclusion
		Conservation Laws
		Simple Examples
		17
		Relationship Between Spruce Budworm Outbreaks and Forest Dynamics in Eastern North America
		Introduction
		History of Spruce Budworm Outbreaks Over the Past 800 Years
		Variation in Temporal and Spatial Dynamics
		Outbreaks: Reflection of Changes in Forest Structure
		Impact of Beaver (<i>Castor canadensis</i> Kohl) Foraging on Species Composition of Boreal Forest
		Grasses as Fuel
		Drought Disturbance: A Primary Driver
		Direct Fire Effects
		Grassfire and Nutrients
		Temporal Changes in Beaver Populations
		Traditional Understanding of Beaver Foraging Impact on Plant Community Structure
		Understanding Beaver Foraging Impact on Composition and Structure of Boreal Forests
		Introduction
		Wildfire Processes and Characteristics
		Local Populations and Processes
		Regional Populations and Processes
		Conclusions
