ARTICLES

Egg size and hybrid syndrome-dependent embryo mortality in <i>Chironomus</i> hybrids (Diptera: Chironomidae) — K. HÄGELE & M. KASPER-SONNENBERG	1
Allozyme polymorphism in isolated populations of the moth <i>Coenophila subrosea</i> (Lepidoptera: Noctuidae) from three Central European peat bogs — J. ŠULA & K. SPITZER	7
Insemination and fertilization in the seed bug <i>Lygaeus simulans</i> (Heteroptera: Lygaeidae) — T. MICHLITSCH, P. KRÜGEL & G. PASS	13
Photoperiodic control of the intensity of diapause and diapause development in the bean bug, <i>Riptortus clavatus</i> (Heteroptera: Alydidae) — K. NAKAMURA & H. NUMATA	19
Activation of gonads and disruption of imaginal diapause in the apple blossom weevil, <i>Anthonomus pomorum</i> (Coleoptera: Curculionidae), with juvenoids in laboratory and field trials — J. ŽĎÁREK, R. ČTVRTEČKA, O. HOVORKA & V. KOŠTÁL	25
Exploration and assessment of the oviposition substrate by the cabbage root fly, <i>Delia radicum</i> (Diptera: Anthomyiidae) — V. KOŠTÁL, R. BAUR & E. STÄDLER	33
Jumping technique and climbing behaviour of the collembolan <i>Ceratophysella sigillata</i> (Collembola: Hypogastruridae) — J. ZETTEL, U. ZETTEL & B. EGGER	41
Webs, diet, and fecundity of <i>Theridion impressum</i> (Araneae: Theridiidae) — S. PEKÁR	47
Species of the genus <i>Folsomia</i> (Collembola: Isotomidae) of northern Asia — M.B. POTAPOV & A.B. BABENKO	51
Revision of the genus <i>Mimesthes</i> (Coleoptera: Meloidae: Mylabrini) — M.A. BOLOGNA	75
Separation of <i>Aspidiotes</i> species using morphometric analysis (Coleoptera: Curculionidae) — M. SÁNCHEZ-RUIZ & I. SANMARTÍN	85
Phylogenetic relationships among social parasites and their hosts in the ant tribe Tetramoriini (Hymenoptera: Formicidae) — M. SANETRA & A. BUSCHINGER	95
Review of the Afrotropical subgenus <i>Disneyempis</i> (Diptera: Empididae) — C. DAUGERON	119
Description of the immature stages of <i>Syritta flaviventris</i> (Diptera: Syrphidae) and new data about the life history of European species of <i>Syritta</i> on <i>Opuntia maxima</i> — C. PÉREZ-BAÑÓN & M.A. MARCOS-GARCÍA	131

NOTE

The guarding posture of females in the subsocial bug <i>Elasmucha dorsalis</i> (Heteroptera: Acanthosomatidae) — S. KUDO	137
