<i>List of figures and tables</i>	vii
Introduction	1
1 Transport integration and value chains in continental Eurasia: limits and potential	8
2 The ‘continentalization’ of value chains: an opportunity for Eurasia transport integration	15
2.1 <i>Europe’s value chains ‘go east’: a new manufacturing core</i>	15
2.2 <i>China’s value chains ‘go west’: new inland production hubs</i>	17
3 The impact on east–west transit corridors: between integration and competition	19
3.1 <i>The catalytic role of the BRI</i>	19
3.2 <i>The Northern Corridor: routes via Russia or via Kazakhstan/Russia</i>	24
3.3 <i>The Middle Corridor: the trans-Caspian route</i>	28
3.4 <i>The Southern Corridor: the Iran–Turkey route</i>	30
4 Deepening trade ties with Asia: the future of Eurasia transport integration?	34
4.1 <i>The rise of Eurasian-Asian trade</i>	35
4.2 <i>The rise of Asia’s FDI in continental Eurasia: first steps, future trend?</i>	37
4.3 <i>Current limits and risks of Eurasia’s transport integration in Asia’s value and supply chains</i>	40

5 COVID-19 and the evolving EU–China relation: game changer for Eurasia transport integration?	44
5.1 <i>COVID-19: a trend accelerator</i>	44
5.2 <i>The EU between overreliance on China and strategic autonomy: back to Europe?</i>	46
5.3 <i>China's adjustment to a changing reality: the BRI between 'dual circulation' and Asia's free trade agreement</i>	48
5.4 <i>Implications for Eurasia's transport integration</i>	52
Conclusion: geopolitical and geo-economic implications	56
