

# Content

|  |           |
|--|-----------|
| <b>Content</b>   | <b>5</b>  |
| <b>1 Basic terms</b>   | <b>9</b>  |
| 1.1 Cartography, cartographic interpretation and visualization ..... | 9         |
| 1.2 Models of communicating information in cartography .....         | 10        |
| 1.3 Maps .....   | 11        |
| 1.4 Institutional arrangements .....                                 | 14        |
| <b>2 Mathematical principles of maps</b>                             | <b>16</b> |
| 2.1 Approximation of the Earth .....                                 | 16        |
| 2.2 Coordinate systems .....   | 17        |
| 2.3 Geodetic basis of maps .....                                     | 21        |
| 2.3.1 Positional networks .....                                      | 21        |
| 2.3.2 Levelling networks .....                                       | 23        |
| 2.3.3 Gravity (gravimetric) networks .....                           | 23        |
| 2.4 Map projections .....  | 24        |
| 2.4.1 Simple map projections .....                                   | 27        |
| 2.4.2 General projections .....                                      | 33        |
| 2.4.3 Geodetic projections .....                                     | 34        |
| 2.4.4 The choice of a cartographic projection .....                  | 36        |
| <b>3 Map content</b>   | <b>38</b> |
| 3.1 Content of topographic maps .....                                | 38        |
| 3.1.1 Elevation features .....                                       | 38        |
| 3.1.2 Topography .....   | 40        |
| 3.2 Thematic content .....   | 41        |
| 3.3 Complementary and construction (mathematic) map elements .....   | 43        |
| <b>4 Thematic maps design (conception and composition)</b>           | <b>45</b> |

|          |   |           |
|----------|---|-----------|
| 4.1      | Conception of map design .....                  | 45        |
| 4.2      | Composition of map design .....                 | 48        |
| <b>5</b> | <b>Cartographic visualization</b> .....         | <b>52</b> |
| 5.1      | Map symbols .....                               | 55        |
| 5.1.1    | Point symbols .....                             | 55        |
| 5.1.2    | Line symbols .....                              | 57        |
| 5.1.3    | Area symbols .....                              | 58        |
| 5.2      | Charts .....                                    | 59        |
| 5.3      | Diagrams .....                                  | 60        |
| 5.4      | Attributes of map symbols.....                  | 61        |
| 5.4.1    | Raster.....                                     | 61        |
| 5.4.2    | Colour in the map content .....                 | 63        |
| 5.4.3    | Map fonts.....                                  | 71        |
| <b>6</b> | <b>Visualization of quantitative data</b> ..... | <b>73</b> |
| 6.1      | Cartogram (choropleth) method.....              | 73        |
| 6.1.1    | Construction of cartogram .....                 | 73        |
| 6.1.2    | Types of cartograms .....                       | 80        |
| 6.2      | Proportional symbols method .....               | 86        |
| 6.2.1    | Types of diagram maps.....                      | 89        |
| 6.3      | Dot method .....                                | 99        |
| 6.4      | Method of isolines .....                        | 101       |
| 6.5      | Dasymetric method.....                          | 103       |
| 6.6      | Method of cartographic anamorphosis .....       | 104       |
| 6.7      | Method of cartotypogram .....                   | 105       |
| 6.7.1    | Centrogram.....                                 | 105       |
| 6.7.2    | Typogram.....                                   | 106       |
| 6.7.3    | Typograph.....                                  | 108       |
| 6.8      | Method of point symbols.....                    | 108       |

|           |   |            |
|-----------|---|------------|
| 6.9       | Method of linear symbols.....                                       | 109        |
| 6.10      | Method of areal symbols.....  | 110        |
| <b>7</b>  | <b>Extremes of statistical data sets</b>                            | <b>111</b> |
| 7.1       | Working with the extremes of statistical data sets.....             | 111        |
| 7.2       | Graphical representation of extreme values.....                     | 113        |
| <b>8</b>  | <b>Labels in maps</b>   | <b>116</b> |
| 8.1       | Geographical terminology and its forms.....                         | 116        |
| 8.2       | Labelling of map symbols.....                                       | 118        |
| 8.2.1     | Point symbol labelling.....   | 119        |
| 8.2.2     | Linear symbols labelling.....                                       | 119        |
| 8.2.3     | Labelling of areal symbols.....                                     | 120        |
| <b>9</b>  | <b>Generalization of a map content</b>                              | <b>122</b> |
| 9.1       | Generalization methods.....   | 124        |
| 9.1.1     | Method of normative selection.....                                  | 124        |
| 9.1.2     | Method of censual selection.....                                    | 124        |
| 9.1.3     | Geometrical generalization.....                                     | 125        |
| 9.1.4     | Operations with areas.....  | 127        |
| 9.1.5     | Spatial reduction.....  | 128        |
| 9.1.6     | Highlighting (exaggeration, overly drawing).....                    | 128        |
| 9.1.7     | Map (cartographic) abstraction.....                                 | 128        |
| 9.1.8     | Methods of generalization of qualitative and quantitative data..... | 129        |
| <b>10</b> | <b>Czech map series</b>   | <b>131</b> |
| 10.1      | Basic state map series.....   | 131        |
| 10.1.1    | Thematic state map works.....                                       | 134        |
| 10.2      | Military map series.....  | 134        |
| <b>11</b> | <b>Literature</b>   | <b>137</b> |
