

CONTENTS

1 ANATOMY AND HISTOLOGY, 1

Gross examination and orientation of an enucleated eye, 1
Ocular structure, 1
Embryology, 2
Microscopic anatomy of the eye, 6
Histologic stains, 29

2 CONGENITAL MALFORMATIONS AND PEDIATRIC OCULAR DISEASES, 31

Anophthalmia and cyclopia, 32
Typical colobomas, 34
Atypical colobomas, 43
Congenital and infantile lens abnormalities, 48
Leukocoria, 63

3 CORNEA, 86

General discussion of inflammation, 86
Morphology of inflammatory cells, 87
Ulcerative inflammatory conditions, 91
Nonulcerative inflammatory conditions, 99
Sequelae of corneal inflammations and degenerative corneal diseases, 102
Corneal pigmentations, 107
Miscellaneous corneal diseases, 110
Corneal dystrophies, 114
Metabolic disorders causing corneal clouding, 125

4 LENS AND GLAUCOMA, 130

Lens, 130
Glaucoma, 139

5 UVEA, 163

Uveitis, 163

Tumors of the uvea, 172

6 DISEASES AFFECTING THE OCULAR FUNDUS, 217

Retinal vascular diseases, 217

Chorioretinal inflammation, 242

Central serous choroidopathy and detachment of the pigment epithelium, 249

Retinal dysplasia, 255

Retinal and choroidal dystrophies and degenerations, 259

Optic nerve, 283

Phakomatoses, 291

Retinoblastoma, 303

7 CONJUNCTIVA AND EYELIDS, 319

Conjunctiva, 319

Eyelids, 345

8 OCULAR TRAUMA, 384

Nonperforating trauma (contusions), 384

Perforating trauma, 384

Miscellaneous conditions, 396

Complications and sequelae of trauma, 408
