

Content

1.	Introduction	3
1.1.	Particles emitted by internal combustion engines	3
1.2.	Engine emissions and health effects	4
2.	Major aims of MEDETOX project	7
3.	Emissions sampling and measuring systems demonstrated (MEDETOX Action 3)	7
3.1.	On-board emissions monitoring system	7
3.2.	Proportional sampling system	10
	Working principle	10
	Dilution ratio and dilution air consideration	11
	Exhaust flow determination	12
	Transient response improvement	12
3.3.	Comparison tests and reference systems	13
3.4.	High-Volume Combustion Aerosol Sampling using Tandem Atmospheric Samplers	14
3.5.	Portable on-board FTIR	15
4.	Toxicity tests optimization (MEDETOX Action 4)	18
4.1.	Toxicity evaluation methods	18
4.1.1.	Cytotoxicity tests	19
	Trypan blue cell viability test	19
	WST-1 test for the quantification of cell proliferation, cell viability, and cytotoxicity	19
4.1.2.	Analysis of DNA adducts of polycyclic aromatic hydrocarbons by ³² P-postlabeling	19
4.1.3.	Oxidative damage of DNA, proteins and lipids in human lung cell lines	21
	Oxidative damage of DNA	21
	Oxidative damage of proteins by DEP – protein carbonyl assay	21
	Lipid peroxidation by DEP – 15-F2t-Isoprostane immunoassay	22
4.1.4.	Genotoxicity induced by DEP – Comet assay	22
4.1.5.	Chromosomal damage by DEP – Micronucleus test	23
4.2.	Acellular and cellular systems for in vitro toxicity testing of engine emissions – advantages and limitations	23
4.3.	Biomarkers of biological effects of DEP	24
5.	Real Traffic and Biofuel Toxicity case studies (MEDETOX Actions 5–7)	27
5.1.	Case study #1: Genotoxicity of diesel emissions in real world driving: Effects of cold starts, congestion, and DPF	27
5.2.	Case study #2: Simulation of extended idling in the laboratory: Polycyclic aromatic hydrocarbons (PAHs) and their genotoxicity in exhaust emissions from a diesel engine during extended low-load operation on diesel and biodiesel fuels	32
5.3.	Case study #3: DNA damage potential of engine emissions measured in <i>in vitro</i> systems by micronucleus test	37
	Engine emissions collection	37
	Cell line description	38
	Cell cultivation and treatment conditions	38
	Micronuclei analysis	38
	Statistical analysis	40
	Current research and new results	44
	Recommendation for future research	45
6.	Current and envisioned impacts of the project	48
7.	References	51
	Contacts	61
	Partners	61
