

CONTENTS

Introduction	3
Scheme of classification	5
Part I. Papers published in scientific periodicals:	
1. Occupational Physiology	7
2. Industrial Hygiene	16
a) Industrial hygiene in mining	19
b) Industrial hygiene in agriculture	20
c) Air conditioning, heating, ventilation	23
d) Dust	30
e) Shocks. Noise.	34
f) Radiation	37
g) High and low temperatures	47
3. Toxicology	50
a) Analytic methods. Chemistry	53
b) Fluor	57
c) Carbon disulfide	59
d) Mercury	61
e) Lead, Edathamil Calcium Disodium (EDTA)	64
f) Organic phosphorus compounds, phosphorus insecticides	69
g) Trichlorethylene	73
h) Benzene and derivates	75
4. Industrial Medicine - Clinical and Experimental - Occupational Diseases	79
a) Noxious effects of radiation	81
b) Treatment of post-irradiation damage, biological and chemical protection against ionizing radiation	95
c) Heart and blood-vessels	101
d) Blood and blood-forming organs	104

e) Upper respiratory tract, Ear	109
f) Bronchial tubes. Lungs	113
g) Pneumoconioses	121
h) Pathogenesis of pneumoconiosis	126
ch) Skin	136
i) Nervous system	140
k) Infections. Mycoses.	143
Part II. Books published	148
Author index ,	151
Subject index . . . ;	155
Contents ,	161
