

Content

Keynotes:

Future of Mechanical Engineering	9
Residual Stress Measurement Using Ring-Core Method	13
Drives & Control (oral presentations):	
Drive Based Vibration Reduction for Production Machines	19
Real-Time Implementation of a Novel Transmission Line Matrix (TLM) Model for High Speed Feed Drives	25
CNC Injection and Encapsulation	31
Potential of State-Feedback Control for Machine Tool Drives	35

Design (oral presentations):

Design of Information System for Risk Valuation of Technological Workshop with CNC Machine Pinnacle PK - VMC 1100S	43
Role of Design when the Order Passes through the Company	49
Operational Behaviour of a High Spindle Unit	53
Advance Positioning Units for Production and Robotic Systems	59
Primary Structural Parts of Machine Tools Made from Unconventional Materials	65
Machine Tool with Undisturbed Frame	71
Computer Modelling and Simulation of Robot Manipulator	77
Reconfigurable Machine Tool: Method of Reconfigurable Machine Tool Design	81

Numerical Analysis of the Rotary Tool Drive at a Vertical Machining Centre.....	89
Energy Consumption Forecasting and Optimisation for Tool Machines	95
Possibilities of Assembly Automation	101
Innovation of Gantry Design	105
Proposal of Exchanging Table for Plasma Cutting Center.....	109

Models & Simulation (oral presentations):

Machine Tool Virtual Models	115
Development of Experiment Control Graphical User Interface for Hardware in the Loop (HIL) Simulations	123
Machine Tool Lightweight Design and Advanced Control Techniques	129
Modelling Methods for Computation of Parameter Errors on the TCP of Redundant PKMs	135
Influence of Thermo-Mechanical Condition of Rolling Bearings on the Dynamics of Machine Tool Spindles	141
Modelling of Thermal Processes in a Cooled Ball Screw Feed Drive	147
Effective Techniques for Building FEM Submodels of Components and Structural Joints.....	153

Drives & Control (posters):

Compensation of Frictional Forces	161
Biosimulator Control System for Testing of Knee Joint Replacements.....	165
Dynamical Errors in Five Axis Milling.....	171
Acceleration as an input of the velocity controller.....	175

Design (posters):

SDV - Intelispin	181
Design of Additional Check with Intelligent Camera System	187
New CNC Abilities Support	191
Heat Transfer Coefficient Evaluation on Machine Tool	195
Software for Selection Components of Ball Screw Drive	201
Real-Time Compensation of Weight and Thermal Deformations of Horizontally Expandable Spindle Rams	207
Design of Structural Changes of Movable Nodes for Wood-Working Machines	211

Models & Simulation (posters):

Computer Analysis of the Worm and Gear's Meshing	217
Simulations of Behaviour of Hydrostatic Guideway	221
Thermomechanical Transfer Functions and Control of a Machine Tool Cooling System	225
Virtual Design in the Branch of Metal Forming Machines	229
Complex Model of Telescopic Cover: Wiper Simulation	233
The Flexible Model of Spindle Tooling Interface	239
Mechatronic Approach in Modelling, Identification and Control of Thermal Deformation of Quill	245
