<i>Preface</i>	x
<i>List of acronyms</i>	xii
1 Transport, Economics, and Economists	1
1.1 Some background	1
1.2 A brief history of transport economics	5
1.3 The subject matter of transport economics	8
1.4 The economic characteristics of transport	15
1.5 This book	17
References	20
2 Transport and the Economy: Some Numbers	22
2.1 Introduction	22
2.2 The global picture	24
2.3 Transport at the national level	31
2.4 Local transport	37
2.5 Emerging trends	44
2.6 Some comments on the short-term effects of Covid-19 on transport	50
2.7 Where are the numbers?	52
References	54
<i>Exhibit Response of air transport to a pandemic</i>	46
3 Transport and Location	55
3.1 The desire for movement and mobility	55
3.2 Transport: the 'chicken' or the 'egg'?	57
3.3 Industrial location and transport	60
3.4 Economic gateways and corridors	67
3.5 Output, market areas, and transport costs	70
3.6 Urban transport and land values	74
3.7 Urban wages	80
References	83
<i>Exhibit The impact of parking policy on house prices in the Netherlands</i>	79
4 The Demand for Transport	85
4.1 Demands for transport	85
4.2 Influences on travel demand	87

4.3	Pricing a transport service	90
4.4	Trip purpose	96
4.5	Levels and methods of charging	97
4.6	The time period	98
4.7	The absolute level of the price change	100
4.8	Income levels	101
4.9	The price of other transport services	104
4.10	Tastes, human desires, and motives	106
4.11	The notion of a 'need' for transport	109
4.12	The valuation of travel time savings	112
4.13	The demand for car ownership	119
4.14	What does 'behavioral economics' tell us?	126
	References	130
	<i>Exhibit Demand shocks on airline fares produced by high-speed rail transport</i>	91
	<i>Exhibit Fuel efficiency of United States cars following the 1973 and 1979 oil crises</i>	93
	<i>Exhibit Meta-analytical synthesis of demand elasticity results</i>	103
	<i>Exhibit The role of ancillary revenues in airline finances</i>	108
	<i>Exhibit When London Underground workers go on strike</i>	128
5	Direct Costs of Transport	134
5.1	Factors influencing the supply of transport	134
5.2	Fixed and variable costs	136
5.3	Economies of scale, scope, density, experience, and commonality	149
5.4	Specific, joint, and common costs	155
5.5	Problems of common cost allocation: the road and rail track cases	157
5.6	Transport user costs and the notion of generalized costs	164
5.7	The bunching of public transport services	170
5.8	Economic performance	172
5.9	Costs and the measurement of economic efficiency	175
	References	182
	<i>Exhibit The container and world trade</i>	143
	<i>Exhibit Measuring perceived costs of driving</i>	167
6	The External Economic Costs of Transport	186
6.1	Introduction	186
6.2	Externalities	187
6.3	Transport's implications for the environment	190
6.4	The valuation of externalities	193
6.5	The magnitude of the environmental externality problem	201
6.6	Energy use	214
6.7	Introduction to traffic congestion	219
6.8	The economic costs of congestion	225

6.9	Refinements on the basic congestion model	227
6.10	Some broad aggregate calculations	232
	References	233
	<i>Exhibit The economic costs of CO₂ emissions</i>	196
	<i>Exhibit The economic costs of the Amoco Cadiz oil spill</i>	198
7	The Pricing of Transport	236
7.1	The principles of pricing	236
7.2	Matching supply with demand	237
7.3	Marginal cost pricing	243
7.4	Difficulties of 'second-best' situations	246
7.5	Price differentiation, price discrimination, and yield management	249
7.6	Pricing with stochastic demand	265
7.7	The problem of the peak	267
7.8	Transport subsidies, operational objectives, and pricing	270
7.9	Market instability, suboptimal supply, and the empty core	273
7.10	Indirect pricing	276
	References	278
	<i>Exhibit The issue of predatory pricing</i>	240
8	Containing the Environmental Costs of Transport	281
8.1	Introduction	281
8.2	The main economic approaches	282
8.3	Marketable and tradeable permits	283
8.4	The OECD's 'polluter-pays principle'	287
8.5	More on environmental standards	294
8.6	Transport subsidies and the environment	298
8.7	Protecting the sufferers	303
8.8	Energy use	304
8.9	Safety and accidents	315
	References	318
	<i>Exhibit Marketable permits for lead in gasoline</i>	286
	<i>Exhibit The 'Ubernomics' of app-based ride-hailing</i>	301
	<i>Exhibit 'Boris bikes'</i>	311
9	Optimizing Traffic Congestion	320
9.1	Economics and optimal traffic	320
9.2	'Road pricing'	321
9.3	Applications of urban road pricing	326
9.4	Some difficulties with road pricing	329
9.5	Impacts of road pricing	338
9.6	Parking policies	342
9.7	Congestion pricing at airports	344
9.8	Seaports congestion	356

9.9	Non-pricing options for reducing congestion	358
9.10	'Micromobility'	362
	References	363
	<i>Exhibit The initial London congestion charge scheme</i>	340
10	Economics and Transport Logistics	366
10.1	Introduction	366
10.2	Transport logistics	367
10.3	The costs of warehousing and inventory holdings	370
10.4	Consolidation and trans-shipment	375
10.5	Mode choice	376
10.6	Urban logistics	380
10.7	Green logistics	382
10.8	International logistics	384
10.9	Big data, supply chains, and economics	386
10.10	Security	387
	References	395
	<i>Exhibit Costs and benefits of transport security</i>	389
11	Investment Criteria: Private and Public Sector Analysis	398
11.1	Transport and infrastructure	398
11.2	Basic theories of investment policies	400
11.3	Commercial and social approaches to investment	403
11.4	Public-private partnerships	407
11.5	The theory of cost-benefit analysis	412
11.6	Coping with network effects	417
11.7	Cost-benefit analysis in practice and variations on the theme	419
11.8	Comparability between appraisal techniques	428
11.9	Assessing the effect on national income	431
11.10	Some institutional considerations	434
	References	436
	<i>Exhibit The Third London Airport Study</i>	421
12	Transport Planning and Forecasting	438
12.1	The development of transport planning	438
12.2	The ethos of transport planning	443
12.3	Traffic modeling and forecasting	448
12.4	Sequential travel demand forecasting	453
12.5	Disaggregate modeling	460
12.6	Interactive and stated-preference modeling	463
	References	465
	<i>Exhibit Blue-print planning: L'Enfant's transport plan for Washington DC</i>	439
	<i>Exhibit Accuracy in traffic demand forecasting</i>	451

13	Transport and Economic Development	468
13.1	Transport's Role in Development	468
13.2	Economic growth theory and transport	469
13.3	Transport infrastructure investment and economic productivity	476
13.4	The multiplier impacts of a transport investment	481
13.5	Transport economics in less developed countries	486
13.6	The transport policy of the European Union	492
13.7	Transport effects on regional and urban development	504
	References	512
	<i>Exhibit Employment implications of the United States' federal highway system</i>	471
	<i>Exhibit Railroads and canals in the United States' economic development</i>	474
	<i>Exhibit Infrastructure investment and economic productivity</i>	478
	<i>Exhibit Some macro- and microeconomics of elevator travel</i>	506
14	Political Economy and Transport Regulation	514
14.1	Underlying issues	514
14.2	Regulation theory	517
14.3	Monopoly power	522
14.4	Prioritizing transport policies	530
14.5	Paths of regulatory reform	541
14.6	Studying regulatory reform	546
14.7	Disruptive innovation	551
14.8	Coordination via the market, or by direction?	554
	References	557
	<i>Exhibit Regulated and unregulated airlines</i>	526
	<i>Name index</i>	559
	<i>Subject index</i>	567
