2. Roof failures.....	6
2. 1 Diagnosis of roof failures.....	6
2. 2 Diagnosis of roof failures <i>verbatim repetition</i>	14
2. 2. 1 Static failures	14
2. 2. 2 Thermal engineering and moisture failures.....	15
2. 2. 3 Waterproofing failures.....	18
2. 3 Causes of roof failures.....	19
2. 3. 1 Roof failures caused by the building designer.....	20
2. 3. 2 Roof failures caused by the building contractor.....	32
2. 3. 3 Failures caused by defects in the material used.....	38
2. 3. 4 Failures caused by the investor.....	39
2. 3. 5 Failures caused by the user of the building.....	39
2. 3. 6 Failures caused by external influences.....	39
2. 3. 7 Failures caused by unforeseen events.....	40
2. 3. 8 Failures caused by neglect of maintenance.....	40
2. 3. 9 Failures caused by natural wear of the material, material fatigue and ageing.....	41
3. Failures and reconstruction of flat roofs.....	42
3. 1 Repair of waterproof coating by local re-bonding.....	42
3. 2 Waterproofing over existing waterproofing.....	43
3. 3 Replacement of existing waterproofing with new.....	49
3. 4 Additional insulation of single-skin flat roofs (PLUS system and DUO system).....	53
3. 5 Replacing layers with new layers.....	58
3. 6 Change of a non-walkable roof to an operational roof.....	59
3. 7 Conversion of a single skin flat roof to a double skin roof.....	61
3. 8 Conversion of a double skin flat roof to a single skin roof.....	65
3. 9 Change from unventilated to ventilated flat roof.....	66
3. 10 Change from ventilated to unventilated flat roof.....	67
3. 11 Additional insulation of a double-skin roof.....	69
3. 12 Roof superstructure design.....	70
4. Failure and reconstruction of pitched and steep roofs.....	71
4. 1 Failure in the area of the stacked coverings.....	71
4. 1. 1 Insufficient roof plane slope.....	71
4. 1. 2 Mechanical damage to roofing.....	72
4. 1. 3 Insufficient overlap of the elements of the tiled roofing.....	72
4. 1. 4 Tiled roofing does not meet technical requirements.....	73
4. 1. 5 Insufficient stiffness of roofing elements.....	73
4. 1. 6 Insufficient quality of roofing elements.....	74
4. 2 Failures due to errors in details.....	77
4. 3 Thermal engineering and moisture disturbances.....	79
4. 3. 1 Roofs over attic (unheated) space.....	79
4. 3. 2 Roofs over living (heated) space.....	81
4. 3. 3 Causes of moisture disturbances in pitched and steep roofs.....	84
4. 4 Static failures of load-bearing structures.....	95
