

PREFACE.....	9
CHAPTER 1 The influenza virus (<i>Hlinkova Sona</i>).....	11
Introduction	11
Classification and structure of the influenza viruses.....	12
Haemagglutinin.....	15
Neuraminidase	16
M2 protein	17
NS1 protein	17
NS2 protein	18
The genome of influenza viruses	19
Replication and synthesis of the influenza viruses.....	21
Entry and uncoating of the influenza virus.....	21
Transcription	23
Replication.....	24
Synthesis of viral components.....	25
References.....	28
CHAPTER 2 Evolution and ecology of influenza viruses (<i>Hlinkova Sona</i>).....	33
Introduction	33
The natural host of influenza viruses	34
Transmission of influenza viruses among species.....	35
Phylogenetic evolution of influenza viruses.....	37
Comparison of evolutionary influenza types A, B and C viruses.....	39
Genetic recombination of influenza viruses (reassortment).....	40
Conclusion.....	45
References.....	46

CHAPTER 3 Influenza epidemics and pandemics (<i>Hlinkova Sona</i>).....	49
Introduction	49
Influenza epidemics	50
Influenza pandemics	52
Pandemic in 1918	53
Pandemic in 1957	54
Pandemic in 1968	55
The time interval between pandemics.....	55
Current Situation	56
Surveillance of the influenza.....	58
Virological surveillance	60
Conclusion.....	61
References.....	63

CHAPTER 4 Circulation of the selected types of influenza viruses in birds in Slovakia, 2001–2004 (<i>Hlinkova Sona</i>).....	67
Introduction	67
Materials and Methods	70
Collection of samples.....	70
Sampling cloacal swabs.....	73
Sampling blood samples	73
Virus isolation	73
Hemagglutination test.....	74
Processing of blood from wild and farmed ducks	75
Haemagglutination inhibition test.....	75
Ab ELISA test.....	77
Results	77
The results of presence of the antibodies against influenza virus in wild ducks, collared dove and Common Pheasant.....	79
Discussion	80
Conclusion.....	82
References.....	83

CHAPTER 5 Seroprevalence of antibodies against the influenza virus in selected pigs herds in Slovakia, 2001–2004 (<i>Hlinkova Sona</i>).....	87
Introduction	87
Materials and Methods	89
Results	90
Discussion	92
Conclusion.....	94
References.....	96
 CHAPTER 6 Human influenza (<i>Lesnakova Anna</i>).....	 101
Introduction	101
Pathogenesis.....	102
Viral entry into the cell	107
Clinical manifestation.....	108
Course.....	110
Complications	112
Respiratory complications	113
Non-respiratory complications.....	114
Neurological complications	114
Cardiac Complications.....	115
Toxic Shock Syndrome.....	115
Reye's Syndrome.....	116
Other complications.....	116
Chronic Diseases	117
Age	117
Diagnosis	120
Collection of clinical material	121
Direct diagnosis	122
Indirect – serological diagnosis	124
Treatment	125
Prevention and prophylaxis	129

Vaccination	130
Immunological aspects of vaccination against influenza	132
When and whom to vaccinate	133
Adverse reactions after vaccination	134
Preparation of a universal vaccine	135
Vaccines in the case of pandemic influenza occurrence	136
Conclusion.....	137
References.....	142

CHAPTER 7 Epidemiological situation of influenza
and influenza-like acute respiratory diseases in Slovakia

in 2012–2013 influenza season (<i>Lesnakova Anna</i>).....	151
Introduction	151
Surveillance of influenza.....	153
Incidence of seasonal influenza in Slovakia	154
Influenza and influenza-like acute respiratory diseases in Slovakia in the 2012/2013 season	155
Course of influenza season	156
Laboratory diagnosis.....	168
Complications	170
Evaluation of vaccination against influenza in influenza season 2012–2013.....	171
Conclusion.....	175
References.....	176
