<i>Abbreviations</i>	xv
<i>Table of Cases</i>	xxi
<i>Table of Legislation</i>	xxxix
<i>Table of Treaties and Conventions</i>	lvi
<i>Table of University Legislation, Policies, and Documents</i>	lix
1 Introduction	
A. Illustrating the issues	1.02
B. Terminology	1.12
C. The significance of intellectual property	1.18
D. Outline of the book	1.20
2 What is a University?	
A. The inquiry—an on-line view	2.01
B. The university in history	2.13
C. Transplanting universities to new worlds and the emergence of the modern research university	2.19
D. The modern university	2.23
E. The aims of universities	2.25
F. What is a university?	2.37
G. Are universities ‘special’?	2.41
3 What is University Intellectual Property?	
A. Introduction	3.01
B. Terminology	3.02
C. The purpose of IPR	3.06
D. The international background	3.09
E. The principal kinds of IPR	3.14
F. Concluding comments	3.103
4 Identifying the Creators and the Circumstances of Creation	
A. Introduction	4.01
B. Creators	4.07
C. Collaborative circumstances in which the IP is created	4.59
D. Merits of university-industry relationships	4.89
E. Summary	4.95

5	Allocating the Rights—The Legal Background	
	A. Introduction	5.01
	B. Notion of co-ownership	5.05
	C. Patents for inventions	5.07
	D. Plant breeders' rights	5.65
	E. Designs	5.76
	F. Topographies of semiconductor products & integrated circuits	5.90
	G. Copyright	5.97
	H. Trade secrets & confidential information	5.165
	I. Dealing in rights	5.203
6	Policy Developments and Specific Challenges	
	PART I: POLICY DEVELOPMENTS	6.01
	A. Introduction	6.01
	B. National events influencing IP policy development	6.05
	PART II: SPECIFIC CHALLENGES	6.56
	C. Issues that arise in relation to patents	6.56
	D. Issues that arise in relation to copyright	6.118
	E. Confidential information—secrecy and the role of an academic?	6.168
	F. Overlapping proprietary rights in university generated research products	6.180
7	How Universities Allocate Intellectual Property Rights through Institutional Policies	
	A. Introduction	7.01
	B. Methodology	7.05
	C. Ownership and allocation of IPR: general principles	7.12
	D. The material in which universities claim rights: patents	7.73
	E. The material in which universities claim rights: copyright	7.98
	F. The material in which universities claim rights: confidential information	7.196
	G. The material in which universities claim rights: trade marks, plant breeders' rights, integrated circuits, & designs	7.212
	H. Final comments	7.213
8	Reporting, Rights Allocation, and Other Matters	
	A. Introduction	8.01
	B. Procedures for identification, assessment, and protection of IP	8.05
	C. Allocation of rights in IP	8.44
	D. Academic attitudes to ownership of IPR	8.68

E. Academic attitudes to rights allocation	8.79
F. Mechanisms for distribution of profits from successful exploitation	8.89
G. Mechanisms adopted for resolving disputes	8.93
H. Means adopted to bind members of the university to the policies	8.98
9 Exploitation of Intellectual Property: Universities as Entrepreneurs	
A. Introduction	9.01
B. Barriers to effective exploitation of IP	9.08
C. Technology transfer office structures	9.20
D. Methods of commercial exploitation of IP	9.39
E. The conflicts that can arise from IP exploitation	9.74
F. Concluding comments	9.140
10 Future Directions: Ownership	
A. Introduction	10.01
B. Copyright	10.08
C. Patents, trade secrets, and other forms of IP	10.56
D. Extended claims	10.61
E. Concluding comments on ownership of university IP	10.71
11 Future Directions: Commercial Exploitation	
A. Introduction	11.01
B. Conflicts of interest and commitment: the need for universal guidelines	11.29
C. Secrecy in research	11.47
12 Looking to the Future	545
Appendix A: Ownership and Exploitation of Intellectual Property in Universities: A national, comparative and theoretical study	553
Appendix B: Comparison of respondents with the original sample	569
<i>Bibliography</i>	571
